

THI-SHOW TRANSCRIPT 2020-11-19

For Anthony Cuomo and the protestors outside of his house WE WILL ROCK YOU Tonight we go deep into the murky underworld with a series of exposes on groups, agencies and think tank clowns. THI as per usual gets a number of confirms on information we put out weeks, months or even years ago. This is another dot connecting show and reveals deep plans and issues ongoing globally and we why have to act as a collective, despite latest attempts in the alt media to divide all the listeners and followers into smaller and smaller groups. Smaller groups are easier to manage, a large collective is not, it's that simple. As Elon Musk gets tested 4 times and 2 came back positive and 2 negative, how does that work? well it proves it doesn't. Then the Mayor of Liverpool announces the results of the tests done by the Army. The antigen tests proved that the worse areas had a positive test rate of 0.7%, which also happens to be the rate of the false positive rate of the antigen tests, which means there is no Covid left. The governors of Texas, Florida and South Dakota said they have no plans to shutdown their states as a new wave of corona virus cases sweep the country. AstraZeneca's COVID-19 vaccine, beginning with the ChAdOx1-S(recombinant) designation on the label. This ingredient we discover is that the recombinant strains used in the vaccine are grown from the aborted fetal tissue of a 14-week-old aborted human baby. Canaan baal ism? As lead people demand we don't celebrate not holidays but holy days be it Thanksgiving and also calls to ban Xmas celebrations, how about we the people ban all their traditional holydays as all of them are pagan ritual sacrifice days and create our own days of rest? More than 60 percent of Americans say that the Trump administration's transition delay is a threat to national security, according to a new poll. Given the term National Security only applies to rogue elements of the Intelligence Agencies, that would be interesting if true. The 2020 US election campaigns smashed all records - with presidential and congressional candidates spending a total of almost \$14bn - more than double the price tag for 2016. What a complete and utter waste of money that is, that is two years worth of funds that it would take to eliminate poverty in America. All about priorities and clearly the people don't think enough about who or what is the priority. As Trump claims stock market high is indicative of a 95% effective vaccine, how many times does the narrative have to change before some clarity is stated? Trump told us all this in May and has repeated it since. President Trump says he would "rapidly" mobilize the U.S. military to distribute a corona virus vaccine once it's ready, focusing first on nursing homes and the elderly most vulnerable to deadly complications from the virus. Mr. Trump made the comments during an interview with Fox Business' Maria Bartiromo. "We're mobilizing our military and other forces, but we're mobilizing our military on the basis that we do have a vaccine. You know, it's a massive job to give this vaccine. Our military is now being mobilized so at the end of the year we're going to be able to give it to a lot of people very, very rapidly," the president said. "We will have a tremendous force because assuming we get it, then you have to distribute it," he added. "And unless you're mobilized and ready,

you're not going to be able to do it for a long time, so we're starting now." Why would he state we need a vaccine when he knows the truth about this virus? Why would we need the military to deliver or inject it? Is he stating our medical people are not capable? Has anyone asked why the military can suddenly engage on our own soil, when we were told that it is not allowed by law?

The people hold the power! The people of Denmark resisted a law of forced vaccinations and the people protested with a pots and pans protest in the streets and the government backed down... 9 days of protests over a new law that "would have been able to define groups of people who must be vaccinated. Well done the people of Denmark, now lets see it replicated everywhere.

NEWS: Two senior Department of Homeland Security officials have been forced to resign by the White House, according to sources familiar with the resignations. Among them was a top official in DHS's cyber arm, who resigned amid a national security shakeup by the Trump administration. Bryan Ware served as assistant director for cybersecurity at DHS' Cybersecurity and Infrastructure Security Agency (CISA). DHS assistant secretary for international affairs Valerie Boyd also resigned amid pressure from the White House, officials tell CNN. DHS, CISA and the White House declined to comment on the resignations.

President Trump announced on Twitter on Tuesday night that he's firing top cybersecurity official Christopher Krebs, whose agency recently issued a statement that the 2020 presidential election was secure. Until now, Krebs was the director of the Cybersecurity and Infrastructure Security Agency within the Department of Homeland Security. Mr. Trump claimed, falsely and with no evidence, that a statement from Krebs' CISA calling the 2020 election the most secure in history was "highly inaccurate." Mr. Trump's legal team has failed thus far to present credible evidence of mass fraud, and Joe Biden is the president-elect. "The recent statement by Chris Krebs on the security of the 2020 Election was highly inaccurate, in that there were massive improprieties and fraud - including dead people voting, Poll Watchers not allowed into polling locations, 'glitches' in the voting machines which changed...votes from Trump to Biden, late voting, and many more," the president tweeted. "Therefore, effective immediately, Chris Krebs has been terminated as Director of the Cybersecurity and Infrastructure Security Agency." Firing people for Cyber Security issues after the horse has bolted makes zero sense to me. You were warned several times Mr. Trump that the empire would fire back, was given a simple solution to end the fake pandemic and the election nonsense, and dallied and failed to act on both occasions. Firing people now, when you had the opportunity to correct it, looks like a lack of personal responsibility, but you are not alone in that exercise it seems these days.

Meanwhile back at the ranch and a month after I warned they would retaliate against Iran. Four current and former U.S. officials told the Times, that the president asked senior advisers in an Oval Office meeting Thursday if he had options to attack Iran's main nuclear site. His request came a day after the International Atomic Energy Agency reported that, the country's uranium stockpile was 12 times higher than allowed under the Iran nuclear deal, that the administration left in 2018. The international watchdog also reported Iran did not let inspectors enter a location, where there was evidence of past nuclear activity. The advisers who urged the president against such an attack reportedly included Vice President Mike Pence, Secretary of State Mike Pompeo, acting Secretary of Defense Christopher Miller and Gen. Mark Milley, the chairman of the Joint Chiefs of Staff. The advisers cautioned that the U.S. making such a move could increase tensions with Iran and could lead to a bigger conflict. Administration officials with knowledge of the meeting told the Times that officials left the meeting thinking a missile attack was not being considered. Pompeo is just another Israeli stooge, if they were that concerned about Iran and nuclear weapons, Israel would not have sold it to them in the 1990's, clearly that was a set up against Iran. But here is a common sense question, why if Israel has nuclear weapons, does Iran not have the right to nuclear weapons? More evidence of child like behavior from our so called top officials of, it is my ball and you can't have it. It is beyond child level thinking and behavior, in fact I do a disservice to children as most of them have more grasp of right and wrong than politicians and their army of so called intelligence goons. Has to be the biggest ever misnomer that, calling agency people Intelligence, as I see little to no evidence of adult levels of intelligence.

The US has declared as anti-Semitic a prominent international movement which calls for a complete boycott of Israel over its treatment of the Palestinians. Secretary of State Mike Pompeo said Boycott, Divestment and Sanctions (BDS) was "a cancer", adding the US would stop funding groups linked to it. Israeli Prime Minister Benjamin Netanyahu called the move "wonderful". BDS however rejected the charge, saying it opposed "all forms of racism, including anti-Jewish racism". Formed in 2005, BDS has become prominent in many countries around the world. It calls for a total boycott of Israel, including cultural, economic and academic, over what it considers as Israeli repression of Palestinian rights. Israel has long claimed BDS opposes the country's very existence and is motivated by anti-Semitism. It vehemently rejects any comparison with the apartheid - the state-sanctioned racial discrimination of black people during white-minority rule in South Africa - as a smear tactic. Mr Pompeo announced the move on a visit to Jerusalem. "We will immediately take steps to identify organisations that engage in hateful BDS conduct and withdraw US government support for such groups," he said, standing alongside Israeli Prime Minister Benjamin Netanyahu. The rhetoric used by Pompeo is spell casting, using the term hateful, what is hateful about questioning illegal settlements achieved by bulldozing other peoples homes, businesses and farms? Have certain people changed the English language these days whereby asking questions is now deemed

hateful or hateraid? anything to deflect people questioning the narrative. The problem isn't the people questioning, the problem is why those people deny the question and just spit out words like hateful, hateraid and haters. Well to all the Israeli clubs (people who deem questions as hate) out there, the truth never fears investigation. Pompeo went on to say this gem as well, Mr Pompeo said: "As we have made clear, anti-Zionism is anti-Semitism. The United States is, therefore, committed to countering the Global BDS Campaign as a manifestation of anti-Semitism."

Fifteen Asia-Pacific countries on Sunday signed the world's biggest free trade deal, seen as a huge coup for China in extending its influence. The Regional Comprehensive Economic Partnership (RCEP) includes 10 Southeast Asian economies along with China, Japan, South Korea, New Zealand and Australia, with members accounting for around 30 percent of global GDP. First proposed in 2012, the deal was finally sealed at the end of a Southeast Asian summit as leaders push to get their pandemic-hit economies back on track. "Under the current global circumstances, the fact the RCEP has been signed after eight years of negotiations brings a ray of light and hope amid the clouds," said Chinese Premier Li Keqiang after the virtual signing. "It clearly shows that multilateralism is the right way, and represents the right direction of the global economy and humanity's progress." The agreement to lower tariffs and open up the services trade within the bloc does not include the United States and is viewed as a Chinese-led alternative to a now-defunct Washington trade initiative. The financial damage that will do to Europe and North America will be long lasting, until we put into a place a country based self sufficiency program. That increases jobs, improves the economy, avoids international conflicts and ends many of the bogus trade deals that operate for and by clowns.

Allies of President Trump have reportedly looked into investing in the conservative news outlet Newsmax to compete with Fox News, according to a report by The Wall Street Journal published on Sunday. Hicks Equity Partners, a private-equity firm with connections to a co-chair of the Republican National Committee, have been in discussions in recent months with the media company about investing in Newsmax. The Journal reports the talks may also be part of larger efforts that could include a streaming video service. Trump's allies have been exploring ways to compete with Fox News for the past two years, according to the Journal. Trump's relationship with the network has been complicated. He has often shown appreciation for the support he receives from Fox News hosts and the network's coverage of his presidency has often influenced decisions he's made inside the White House. He has also lashed out at the network when it criticized him. Newsmax stated they don't wish to harbor Mr. Trump's ideas or plans. We could have had a national TV service if Trump acted on the loopholes within the Telecommunications Act.

Our galaxy is filled with potentially habitable planets -- at least 300 million of them, according to NASA. The US space agency's Kepler Space Telescope spent nine years on a planet-hunting mission, successfully identifying thousands of exoplanets in our galaxy before running out of fuel in 2018. But the original mission's core question remained: how many of these planets are habitable? Scientists around the world pored over Kepler's data for years -- and they think they've found the answer. According to research released in *The Astronomical Journal*, there are roughly 300 million potentially habitable worlds in our galaxy, meaning rocky planets capable of supporting liquid water on their surface. no shit sherlock welcome to reality land NASA. Anyone else notice they throw these little truth nuggets out in times of the media being under stress? it's called distraction.

Almost 100,000 alleged victims of sexual abuse within the Boy Scouts of America (BSA) have come forward to claim compensation from the group. A lawyer for the plaintiffs called it the biggest-ever US sexual abuse case. The claims were filed ahead of a deadline on Monday evening. Internal files published in 2012 revealed decades of abuse. BSA - which filed for bankruptcy earlier this year - has apologised to victims, saying it was "devastated". Negotiations will now begin between the alleged victims, the BSA and their insurers. The organisation still has a considerable membership - more than two million youth participants ranging in age from five to 21. But this is about half of what it was in the 1970s, a decline that aligns with mounting scrutiny of the organisation. In February, BSA said was filing for bankruptcy protection to be in a position compensate victims. The proceedings in a federal bankruptcy court will eventually lead to the creation of a fund to settle abuse cases that are upheld. "It's by far the largest sexual abuse scandal in the US," attorney Paul Moses told the AFP news agency on Monday. In terms of current reported numbers, it dwarfs similar complaints made against the Catholic Church in the country. Glad it is now being dealt with, but money alone will not fix the problem, highlighting and reporting it will.

Mississippi Governor Tate Reeves has hit back against presumptive Democratic president-elect Joe Biden's plan for a six-week Covid-19 lockdown, denouncing the plan as wildly unreasonable and vowing to "fight that if necessary." Reeves, a Republican, put his foot down in response to the proposed shutdown during a Facebook Live, arguing the suggestion from one of Biden's "expert" pandemic advisers, was "totally and completely beyond reasonableness." "That's not the way the economy works," Reeves continued, arguing that while Biden and his 13-person panel of scientific experts might make policy recommendations regarding what to do during the pandemic, the presumed president lacked the constitutional basis to impose his advisors' desired crackdown across the nation. Nor would Mississippi take Biden's edicts lying down, the governor hinted. "We will certainly fight that if it becomes necessary," he said during the livestream. "We as a state are going to continue with our strategy," he said, insisting a strategy "targeted" at hotspots was the only way to avoid extensive collateral economic damage. The people of

Mississippi can't just go home, shut down their small businesses, shut down their restaurants, shut down their gyms for six weeks and just think that you can come back six weeks from now, flip a switch and everything's gonna be fine. I agree and we need many more to speak up now, before the next phase kicks in.

Conservative activist Candace Owens on Sunday leveled harsh criticism against U.S. intelligence agencies, for their supposed inability to root out domestic terrorism, while simultaneously being able to "take out" terrorists overseas. "We're supposed to believe that our intelligence agencies can track and take out an Iranian terrorist (Soleimani) overnight, but they can't manage to get to the root of ANTIFA and black lives matter, well-funded domestic terrorist cells that have been operating unchecked for years," she tweeted. Iranian Gen. Qasem Soleimani, the head of the Islamic Revolutionary Guard Corps Quds Forces, was killed in a U.S. drone strike in Baghdad, Iraq on Jan. 3. Administration officials said the strike, authorized by President Trump, was conducted to deter imminent attacks on U.S. interests. Owens' comments follow an evening of unrest that came after the president's supporters were purportedly attacked at the so-called Million MAGA March in Washington, D.C. on Saturday. Many were quick to condemn the media's apparent lack of interest in covering the violence, directed at supporters of the president. In a Saturday tweet in which Owens likened "Black Lives Matter and Antifa" to the "absolute vermin of our society," the Blexit founder called out the "leftist-controlled media" for giving them a pass. "They were created as the Marxist foot soldiers of the Democrat Party and given a pass by the leftist-controlled media," Owens tweeted. "Pray for this young woman who was attacked." The tweet included a video of a young woman appearing to cry in fear, as she and another man were hit with eggs and an assortment of liquids as they navigate through a hostile crowd. Good piece but she has to understand the agencies are the problem behind it all, so you will not get any positive feedback or actions from that lot, they are the problem and always have been. They have been running the quasi government since their inception, and Soleimani was not taken out due to imminent attacks either, he was of a rival faction.

From CA Legislator Kevin Kiley's Blog: "Today, a California Superior Court ruled in favor of me and fellow legislator James Gallagher in our lawsuit challenging Gavin Newsom's abuse of power. The Judge ruled Newsom violated the Constitution by issuing Executive Order N-67-20. More importantly, she found good cause for an injunction restraining the Governor from issuing any more unconstitutional orders. The Court rejected Newsom's extraordinary claim that a State of Emergency "centralizes the state's powers in the hands of the Governor." This is the unlawful basis on which Newsom has collapsed California's system of checks and balances, issuing 57 Executive Orders and changing over 400 laws unilaterally. This ruling marks an end to Gavin Newsom's one-man rule. That was in November 5th show and one wonders how this latest news out of California plays out.

Gov. Gavin Newsom announced Monday he is “sounding the alarm” due to “the fastest increase California has seen” in corona virus cases. As a result, nearly three-quarters of the state's counties must now operate under the state’s strictest pandemic restrictions, and health officials are considering a statewide curfew. This will affect indoor dining, gyms and movie theaters, among other businesses; all must either remain closed or shut down in 41 of the state's 58 counties. Newsom said he anticipates even more restrictions coming Friday. In the last 10 days, new daily corona virus cases have doubled across California; last week, it was announced that the state had reached 1 million total cases. The state has blamed the increases on people, who have grown tired of dealing with the pandemic and ignored public health warnings to avoid socializing with friends and family members. In addition, the following new rules were added Monday to the Blueprint for a Safer Economy, the state's four-tiered, color-coded system for reopening: Counties will now move tiers after one week of increased COVID-19 cases, not two Counties can move back multiple tiers if they experience a significant increase Businesses must shut down within 24 hours, instead of 72, when counties move tiers The state will announce tier changes twice a week, instead of once per week The governor's action, which goes into effect Tuesday, will result in there being 41 counties in the most restrictive purple tier, 11 in the red tier, four in the orange tier and two in the least restrictive yellow tier. Last week, Newsom was joined by the governors of Oregon and Washington in issuing travel advisories that urged people to avoid traveling outside the state or country, and suggesting that those entering or returning self-quarantine in the hopes of slowing down the spread of the corona virus.

In a significant breakthrough for vaccine research, a flu jab grown in plants has passed two large-scale clinical trials. Researchers extracted virus-like particles from tobacco plants to create the inoculation. The boffins used native Australian tobacco relatives that were genetically modified to create the viral proteins. The two trials involved nearly 23,000 people and the results indicated, that the plant-derived vaccines are just as safe as current flu vaccines. The influenza virus poses fresh problems for vaccine developers every year as it constantly shapeshifts, the flu doesn't just the recording of it does. This is a massive undertaking and researchers have been crying out for an upgrade to the current technology. The breakthrough is the largest ever demonstration of the potential to produce vaccines using plants. Oh the irony of this piece after telling us for 3 decades smoking tobacco is bad for you, remember tobacco was the original COVID, as every disease or illness became smoking related, and now they are using the plant to fight off the flu? Ouroboros thinking again, natural tobacco is fine, processed cigarettes not, and neither is smoking pot.

Michael O,Bernicia..just now COVID-1984 NEWSFLASH | The prosecution in People's Union of Britain v Matt Hancock has just sent the executed form, applying for his arrest

warrant, to the court of issue. We have already got the green light from the court's legal advisers and now we have the chief magistrates' permission to proceed. They also sent us the form to fill out for the arrest warrant, which has now been acknowledged by the same as having been received. However, the form won't be processed till Monday, when it will be sent up to the crown court to be administered and then served upon the defendant, without delay, by the arresting officers, who will soon be appointed by the court. Therefore, the case will now proceed as directed, unless the Director of Public Prosecutions [DPP] intervenes, which is unlikely because nobody will want to take the poisoned chalice. However, even if they do, we can object on the ground that the DPP is working for the government, so they are obviously conflicted. If they refuse to back down, we will insist that the case proceeds with our legal team. In other words, my family, friends and growing army of peace-keepers and freedom fighters, we are all about to witness the most significant events that have transpired on these shores, since Charles I lost his head. Words simply cannot adequately express the truly humbling experience of the love, support and commitment I've received, from people who all tell me that my words have moved and inspired their hearts into resisting this tyranny, for the sake of our children and grandchildren. Thank you, from the bottom of my heart, for rising to the call. Very soon, our number will be millions. This truly is our moment to seize the opportunity to build an advanced civilisation, on the rubble of the corrupted one, which is crumbling around us by COVID-1984 design. In other words, fuck the great reset, the fourth industrial revolution and fraudulent debt based slavery. In that new civilisation, we will protect the unalienable birthrights of the individual from the tyranny of the collective, to become truly self-governed under the Common Law, as expressed in Magna Carta 2020, an idea whose time has come. From now until you see the arrest live-streamed on the mainstream and alternative media worldwide, let's make #ArrestMattHancock go viral on every platform, to the point where the People are chanting it in the streets nationwide. All sounds very good until the actual arrest takes place, this along with the Newsome stuff is filed under hopium, as it stands. Enforcement is and always was the issue with common or natural law, the key is to get in with the Constitutional Sheriff's and Militia and go from there. If the Magna Carta was all it was stated to be, why is it after 805 years do we the people still not own our own land? Nice to see other researchers condemning the Magna Carta, here is Thomas Sheridan from Ireland in his own unique words. Here we go again... The Freeman on the Land morons are going to use the Magna Carta to end the lockdown... christ on a bike, yet another new generation of future suicide cases to go with the decades of previous total and complete failure. I still see people calling John Harris 'a legend' - a guy who ended up swinging from a rope after thinking he was the second coming of Christ/rightful king of England after having destroyed the lives of hundreds of families with useless advice and Blacks Law Dictionary. They think the Magna Carte is some universal book of unconditional freedom when at the time it was written and remains for the benefit of the invading Norman landed gentry and no one else. You get these gobshites in council

estates with a spliff in their mouth constantly thinking they can apply the rights of French nobles to themselves. The Magna Carta was a forced handover of the land rights and citizens of the UK, done by the Knights of St. Jerusalem, and a power handover from the King domain, which is kingdom to the barons and nobles, who are known now as the nobility, black or otherwise. John Harris was fighting for the return of the monarchy, so king and queen ruling, how is that any different for we the people from nobility clowns? Think different FSS.

PROPAGANDA IS THE EXECUTIVE ARM OF THE INVISIBLE GOVERNMENT.. Maintaining the status quo is no longer a viable option...27 Trillion in bond debt, 200 Trillion in unfunded liabilities, 3700 Trillion or 3.7 Quadrillion in derivatives, that the top 10 US banks have to offset all their toxic assets trying to control the commodities and stock markets. 50 Million people on EBT, 25 Million unemployed over 20 Million home foreclosures and 6 Million homeless. Student debt slavery surpassed credit card debt last year, over 1.5 Trillion, the Banksters made over 50 Billion in profits off of student debt slavery more than Exxon. Whilst the FED reserve a private corporation prints 85 Billion a month, to hold up the stock market based on fiat currency that has no intrinsic value other than to create massive inflation and massive debt!! Infinite trillions spent on infinite wars and infinite murder, always based on false pretences into infinity with impunity since 1776.

You can help Mozilla and Princeton University researchers stop the spread of online disinformation. Donate your browsing data to Project Ion. Microsoft is finally jumping on the Bitcoin bandwagon with Project Ion, a decentralized Identity infrastructure built on Bitcoin. Microsoft believes every person needs a decentralized, digital identity they own and control, backed by self-owned identifiers that enable secure, privacy-preserving interactions. This self-owned identity must seamlessly integrate into their lives and put them at the centre of everything they do in the digital world. To help forward this vision Microsoft developed Identity Hubs. Identity Hubs provide secure, encrypted storage of personal data and they rely on decentralized systems (blockchains and distributed ledgers) to anchor their identifiers. Today Microsoft announced an upgrade to that service with an early preview of a Sidetree-based DID network, called ION (Identity Overlay Network). ION runs atop the Bitcoin blockchain based on an emerging set of open standards that Microsoft developed working with many of their partners in the Decentralized Identity Foundation. This approach greatly improves the throughput of DID systems to achieve tens-of-thousands of operations per second. And some people still think Bitcoin and Blockchain will benefit the people, no it benefits only greedy people.

A Muslim prayer time app with 100 million users is just one of the apps that had location data sold to the US military for reasons unknown, a VICE report says, those following

storms or posting on Craigslist are in the same boat. The US military is “buying the granular movement data of people around the world, harvested from innocuous-seeming apps,” Joseph Cox of VICE’s Motherboard wrote on Monday. Specifically, one of the buyers is the US Special Operations Command (USSOCOM), which deals with counter-insurgency, counter-terrorism and various covert activity around the globe. Two separate companies are taking part in this data harvesting, Motherboard claims to have discovered through “public records, interviews with developers, and technical analysis.” USSOCOM has confirmed using Babel Street’s Locate X, according to its spokesman, US Navy Commander Tim Hawkins. “Our access to the software is used to support Special Operations Forces mission requirements overseas,” he said in a statement. “We strictly adhere to established procedures and policies for protecting the privacy, civil liberties, constitutional and legal rights of American citizens.” you lie. What the military was doing with the data of non-US citizens, however, Hawkins didn’t say. Public records show the USSOCOM spent about \$90,000 to buy licenses for Locate X and text analysis tool Babel X in April. The other company is called X-Mode, and uses software development kits (SDK) in apps, to harvest data and sell it to third parties, including government contractors. For government contractors read Intelligence agency groups and their subsidiaries. While the report did not specify which apps had their data harvested by Locate X, it named a number of apps that sent data to X-Mode. Others include Accupedo, a step counter downloaded more than five million times on Android phones, CPlus for Craigslist, and Global Storms – both with over a million downloads, respectively. A Motherboard experiment also showed Muslim Mingle – a dating app developed by a Vietnamese company – sending data to X-Mode. Even the innocuous Bubble Level, a “must have device for any home or apartment” that helps people hang up shelves or paintings, was sending data to X-Mode, which was then reportedly sold to military contractors like the Sierra Nevada Corporation or Systems & Technology Research. The military is apparently not the only one using Locate X, with earlier reports pointing to the Customs and Border Protection (CBP), Immigration and Customs Enforcement (ICE) and the Secret Service also being the platform’s customers. While Motherboard admitted it “does not know of any specific operations in which this type of app-based location data has been used by the US military,” the outlet pointed out that, back in 2015, the military had admitted using such data to pinpoint targets of drone strikes in the Middle East. One thing you will not hear on our show is please sign up to our app, for those who had doubts why I have that stance, regardless of who is using them, there is your answer.

New York Governor Andrew Cuomo is telling citizens to stay home and cancel all Thanksgiving plans, attempting to enforce what people can do in the privacy of their own homes by implementing a 10-person maximum. However, New York sheriffs continue to publicly announce their refusal to abide by the Governor’s cap on gatherings. Over the weekend, Fulton County Sheriff Richard Giardino took to Facebook to express his unambiguous disagreement with Cuomo. “Frankly, I am not sure it could sustain a

Constitutional challenge in Court for several reasons including your house is your castle,” wrote Sheriff Giardino. “And as a Sheriff with a law degree I couldn’t in good faith attempt to defend it in Court, so I won’t. We have limited resources and we have to set priorities, so obtaining a Search Warrant to enter your home to see how many Turkey or Tofu eaters are present is not a priority” added Giardino. Monday, Saratoga County Sheriff Michael Zurlo expressed similar sentiments. “I can’t see how devoting our resources to counting cars in citizens’ driveways or investigating how much turkey and dressing they’ve purchased is for the public good,” said Zurlo in a press release. Two days after Cuomo announced the restrictions, Erie County Sheriff Tim Howard said his office would simply flat out ignore the mayor’s decision. Azzopardi added, “we urge everyone to continue to be smart and act responsibly” which is ironic considering New York has been allowed to act irresponsibly by protesting, rioting and looting, all under Cuomo’s leadership. Why is Cuomo still walking around and barking out orders, I thought the great leader of the rebellion and his multinational enforcement team was going to arrest him? I guess they only take out DUMBS, perhaps Cuomo was not dumb enough? Although there was some backtracking on DUMBS removal, it has now been switched to underground cities removals, one would think they would get that level of information correct, apparently not.

On Tuesday, Joe Biden released a list of transition teams for the various departments in his future White House. The Pentagon transition team for Biden consists of 23 people, many of whom hail from hawkish think tanks. The team is led by Kathleen Hicks, who worked in the Pentagon under the Obama administration. Hicks most recent employer is the Center for Strategic and International Studies (CSIS), a think tank that receives contributions from arms makers like Northrop Grumman, Boeing, Lockheed Martin, and Raytheon, to name a few. Hicks is Vice President and Henry Kissinger is chairman, tells you all you need to know of that group. CSIS also receives contributions from governments. Dr. Hicks is concurrently the Donald Marron Scholar at the Kissinger Center for Global Affairs, Johns Hopkins School of Advanced International Studies. She serves on the Boards of Advisors for the Truman Center and Soldier Strong and is a member of the Council on Foreign Relations. Dr. Hicks served on the National Commission on the Future of the Army and currently serves on the Commission on the National Defense Strategy. Dr. Hicks all round globalist scumbag then. The think tank’s top government donors are the US, the UAE, Taiwan, and Japan. Two other CSIS employees are on the transition team; Andrew Hunter and Melissa Dalton, who both worked in the Pentagon under the Obama administration. CSIS employees author policy papers and Op-Eds that generally call for more US involvement around the world. In August, Hicks co-authored an Op-Ed in The Hill titled, “Pentagon Action to Withdraw from Germany Benefits Our Adversaries,” a piece that slammed Trump’s plan to draw down troops from Germany, which Biden could to call off. Two members of the transition team come from the Center for a New American Security (CNAS), Susanna

Blume, a former Pentagon employee, and Ely Ratner, who served as deputy national security advisor to then-vice president Joe Biden from 2015 to 2017. Blume which I suspect is short for Blumenthal and Ratner are both born to. CNAS is another think tank that enjoys hefty donations from weapons makers, major corporations, and governments. From 2019 to 2020, CNAS received at least \$500,000 from the US State Department and at least \$500,000 from Northrop Grumman, other donors include Google, Facebook, Raytheon, and Lockheed Martin. Three more team members list their latest employer as the RAND Corporation, Stacie Pettyjohn, a wargaming expert, Christine Wormuth, who held a few roles in the Obama administration, and Terri Tanielian, a behavioral scientist. RAND is another hawkish think tank that receives the bulk of its funding from the US government, including the US Army, Air Force, and Department of Homeland Security. RAND is also funded by the UAE, Qatar, and NATO. Funny that the Rand Corporation can get all that funding, yet Jared Rand can't get his med bed made public, through lack of funding, me thinks he doth protest too much. Rand also built and staffed some of the underground bases on top of the ET bases remember. A report from In These Times found at least eight out of the 23 team members come from organizations that receive funding from US weapons makers (not including RAND). Besides the CSIS and CNAS employees listed above, In These Times includes Sharon Burke, who works for New America, Shawn Skelly, from CACI International, and Victor Garcia, from Rebellion Defense. For those who ask for more women in power and things would be better, that piece included 11 people, 7 of which were females involved in hawkish warmongering games, the moral is male or female in power are no different, as evidenced by the Trustee. The solution is a balance of male and female with a more adult spiritual based thinking mindset, with mental plane levels of development, not astral levels.

Armenia, why is there war going on their now? Look at the map, the war zones in the whole of the Middle East, plus Saudi Arabian peninsula, expect Oman, UAE and Qatar, both of whom have done deals with the Israelis in recent times, backed and supported by Trump. Throw in Southern Turkey, Afghanistan and a picture emerges. Iraq and Kuwait, now Armenia, next stop Turkmenistan, why? because those are all countries that border Iran. Azerbaijan is clown controlled and why they are targeting that country, which has no oil, gold or jewels and so it becomes strategic. With Georgia now in the hands of clowns along with Azerbaijan, the acquiring of Armenia then also cuts off the country borders for Russia to reach Iran, once Armenia falls Iran is then isolated on all borders with the several countries connected to it. With Armenia gone, the opportunity for Russia to defend Iran becomes a more arduous one. Armenia has traditionally remained close to Russia, but the country experienced a regime change in 2018. After anti-government protests from April to May 2018 staged by various NGOs, and led by a member of the Armenian parliament, against Prime Minister Serzh Sargsyan. Nikol Pashinyan became the new PM, and soon aligned the country closer to the United States, I wonder why? perhaps we will find out. Since he came to power his anti-Russian actions, included

almost totally eliminating any Armenian participation on the CSTO, completely ceasing any collaboration with Russia (including in the intelligence and security domains). Purging the Armenian military and security forces from all the supposed “pro-Russian” elements, and banned Russian language schools. So who is this new Prime Minister? Nikol Pashinyan is a former criminal who spent time in prison, in 2009-2010 time. He went into hiding following an uprising of the people, and government forces killed 10 people. It was suspected he was hiding out in the US Embassy, but eventually gave himself up and received 7 years in jail, as they declared Pashinyan as the instigator of the violence. That sentence was then reduced to 3.5 years, in 2009 he ran for a government seat and became the first Armenian to contest a seat from prison. He was released from prison in 2011 and now he is Prime Minister, how does that happen? It happens because he has done a deal with the Intelligence community, you get free, we will make you Prime Minister and you do our bidding for us. It is the classic agency script, repeated over and over again, yet too few research enough into it, to see it all unfold.

First Draft News is an 'anti-disinformation' organization founded in 2015, conspicuously at the same time as NATO's drive to control the news narrative. It trains in how to launder black and grey propaganda. In their own words "First Draft's mission is to empower societies with accurate information in critical moments. We work to ensure the integrity of the world's information ecosystem, developing and delivering pioneering techniques, tools and training for how information is discovered, shared and presented to the public." Military/intelligence founders? First Draft formed as a coalition with nine founding partners in June 2015. One of the founding organizations is the NATO-close Bellingcat; and Eliot Higgins and Aric Toler are specifically thanked for their help. Another founder, Andy Carvin, works for the NATO-close Atlantic Council, in its Digital Forensic Research Lab, which also collaborates closely with the Integrity Initiative. Another founding member is Sam Dubberley, who is an "advisory board member for the Syrian Archive - a non-profit that aims to support human rights investigators, advocates, media reporters, and journalists in their efforts to document human rights violations in Syria"...through "open source tools", an activity that dovetails smoothly with what the British government was financing at the time (see: White Helmets). Laundering black propaganda Here is a generalized example from Syria of this laundering: People like Sam Dubberley get 'human rights investigators' in Syria (f.ex. the White Helmets) to collect or make videos and storylines etc for social media; this material is then lobbed over to 'laboratories' like Bellincat, who then, using 'forensic tools', declares that they are highly credible. These stories and videos can then be picked up by the Western corporate and government press, who then have done 'due dilligence' and have a 'fact checked' genuine atrocity story. All the steps in this process, from the making, collecting, analyzing to finally the spreading in media of this propaganda, is aided by intelligence services. Activities The project draws on experts and organisations working in the field, including reportedly, Eyewitness Media Hub, Storyful and Meedan. The group left Harvard

University after just over a year "citing problems with brand control". Fake news Sharyl Attkisson attributes the first usage of the words fake news, in its modern context, to articles published on First Drafts website. Reporting In 2020 the group published a lot of information about COVID-19. COVID-19 "Lockdown could last for months. It is likely this is only the beginning of a new trend in falsehoods as people come to terms with a new lifestyle. We all play a role in keeping each other safe from the virus and the impact it has on our lives. The information we share plays a big role here too. Let's apply the same level of care in not spreading viral misinformation as we do to the virus itself." Funding The network is lavishly financed by big corporations (Google, Twitter, Facebook) and foundations historically known to be close to the CIA (Ford Foundation, Open Society Foundations, and bears all the hallmarks of a covert government effort. A giveaway for this is that Bellingcat, with close ties to NATO, was one of the founding partners. It might be designed as an internal disciplining network, to steer the "primary target audience" journalists and academics to the 'right' kind of information sources, which might include easily twisted "open source" content à la Bellingcat. An this internal reinforcing function works with politics as well. "For example, We recognize the value in sharing our knowledge with policymakers. First Draft works to inform all who have a stake in the dissemination of accurate information, including governments". Open Source intelligence is NATO and the handbook for that was written by CIA agent Robert David Steele. Elliot Higgins who created Bellingcat, funny how many intelligence agencies use the term cat, like the show truthcat radio, and the other show AIM has a cat as it's logo, it is not a coincidence. Elliot Higgins looks like a born to and has all the hallmarks of a Mossad agent, attacks and blames Syrian Government, attacks Russia for Ukraine, blames Russia for MH17 downed plane, all very convenient if you ask me. He is often quoted as a valid source mainly by the New York Times, which has been dubbed Jew York Times by many, and with good cause to do so, it seems.

'Hammer' and 'Scorecard': Lt. Gen. McNerney explains the election hack by Democrats. By JD Rucker. The Democrats are either cheating or powers above them are cheating on their behalf. Either way, the election is in the process of being stolen if we're to believe Lt. Gen. Thomas McNerney during his most recent interview with Two Mikes. The election was stolen 4 years ago by the Trustee single handedly we are told, what is the difference? The General described "Hammer" and "Scorecard," a pair of programs initially designed for the CIA before being privatized by Deep State players from the Obama administration. That is like the Open Source program written by a CIA agent, outsourced by same agent who then sets up the aptly named company called OSS.net, who then gives the program details over to NATO as a private group, but that privatized group is still under the jurisdiction of the central group, the CIA. We explained how they work in an article last week, but the gist is this: "Hammer" or "THE HAMMER" is a counter-intelligence surveillance program used to spy on activities on protected networks (like voting machines) without detection ... "Scorecard" is a vote-manipulation

application that changes votes during transfer. It's the least detectable form of election manipulation, because it works during data transfer between voting stations and data storage hubs. Unless both sides are looking for irregularities, it's impossible to catch. If nefarious forces had people on one side or the other (or both) during data transfer, it cannot be exposed. What we're seeing happening in Michigan and Wisconsin have all of the trademarks of a "Hammer" and "Scorecard" operation. Lt. Gen. Tom McInerney exposes 'Scorecard,' the Democrats' voter fraud superweapon. by Scott Boyd. Voter fraud is happening right now. We all know it; one would be hard pressed to find a single American on either side of the aisle who would not acknowledge that it's taking place. Around half the country realizes (or is willing to admit) it's happening in favor of Democrats, but very few realize just how deep this particular rabbit hole goes. A CIA program known as "Scorecard" allows its users to change voting outcomes, by hacking into the transfer between local reporting stations and state or national data centers. According to McInerney, it's a small amount, under 3%, to keep it from triggering any alarms. He would know, he served in top military positions under the Secretary of Defense and the Vice President of the United States. Using software for elections is a grave error, if you want a honest and reliable count. Paper ballots filled in under supervision at a polling place after an ID check are relatively secure and can be recounted. UPDATE: Sidney Powell discusses Hammer and Scorecard with Lou Dobbs here. Explosive. UPDATE 12 Nov: Scorecard probably works via the "weighted race" feature of vote counting by computers, which allows fractional votes to be transferred from one candidate to another. See Michigan: MIT PhD Shows Trump's Margin Was Reduced by 138,000 Votes in Just Four Counties by a Counting Computer with the "Weighted Race" Feature Turned On, which Transferred Votes from Trump to Biden! This is the same or similar program ran by the CIA, of how they post incriminating evidence on people or official servers and leave no trace of where it came from, that program is what created the Russian collusion narrative. They say collect data and we say

Klaus Martin Schwab (born 30 March 1938 in Ravensburg, Germany) is a German engineer and economist best known as the founder and executive chairman of the World Economic Forum. In 1971, Schwab founded the European Management Forum, which in 1987 became the World Economic Forum, as a not-for-profit foundation committed to improving the state of the world. In 2015, the WEF was formally recognised by the Swiss Government as an "international body" Connected to the Rothschild's then. In 1998, Schwab and his wife founded the Schwab Foundation for Social Entrepreneurship, another NGO based in Geneva, Switzerland. In 2004, Schwab created a new foundation using the US\$1 million prize money from the Dan David Prize he received that year from Israel. Hmm how interesting. The Forum of Young Global Leaders aims to create a dynamic global community of exceptional people (under 40) with the vision, courage and influence to drive positive change in the world. Schwab was professor of business policy at the University of Geneva from 1972 to 2003, and since then, has been an Honorary

Professor there. Since 1979, he has published the Global Competitiveness Report, an annual report assessing the potential for increasing productivity and economic growth of countries around the world, written by a team of economists. The report is based on a methodology developed by Schwab, measuring competitiveness not only in terms of productivity but also based on sustainability criteria. He is listed as the author of several books, including *The Fourth Industrial Revolution* (2016) and *Shaping the Fourth Industrial Revolution* (2018), both of which were ghost written by WEF employee Nicholas Davis. From 1993-1995, Schwab was a member of the UN High-Level Advisory Board on Sustainable Development. That is the Agenda 2021 or 2030 agenda program of population reduction. From 1996-1998, he was Vice-Chairman of the UN Committee for Development Planning. He also exercised a number of other functions, such as being a member of the Peres Centre for Peace and a member of the board of the Lucerne Festival. During the earlier years of his career, he was on a number of company boards, such as The Swatch Group, The Daily Mail Group, and Vontobel Holding, and he is a former member of the steering committee of the Bilderberg Group. Klaus Schwab, the founder of the globalist World Economic Forum and one of the principle architects of the so-called Great Reset, is saying that the world will never again return to normal as a result of the COVID-19 virus. Despite admitting that the virus is not an “existential threat,” Schwab believes that the world’s reaction to it will create the long awaited “new world order.” In his book *COVID-19: The Great Reset*, Schwab explains: “Many of us are pondering when things will return to normal. The short response is: never. Nothing will ever return to the ‘broken’ sense of normalcy that prevailed prior to the crisis because the corona virus pandemic marks a fundamental inflection point in our global trajectory.” This despite the pandemic not really being the massive crisis that the mainstream media and leftists insist that it is. Schwab admits: “Unlike certain past epidemics, COVID-19 doesn’t pose a new existential threat.” Despite the corona virus not being an “existential threat,” Schwab believes that it can and should be used as the catalyst to create a new world system, which he calls the “Great Reset.” A new system where capitalism still exists in a watered down form, but where the real power is wielded by a few global elites with more authoritarian forms of government aiding and abetting them. Clowns in Panic proven again, our show was criticized early in the year by some members for not covering the Covid story, I said it was bs then, and Schwab just proved it with comments in the last paragraph, "it doesn't pose an existential threat, and is being used for other purposes. This is why THI is always ahead of the game, we see through the bs distraction programs and focus in on the hidden hand agendas, his next comment proves that statement even more. Schwab also speaks of a coming Fourth Industrial Revolution, where most human jobs will be accomplished by robotics. “The COVID-19 crisis has shown us that our old systems are not fit anymore for the twenty-first century. It has laid bare the fundamental lack of social cohesion, fairness, inclusion and equality,” Schwab said. “In short, we need a great reset.” For Schwab, a choice exists between going back to the capitalist status quo, which has served most quite well since the end of

World War II, and a new system of capitalism-lite with Marxist elements thrown in. “Specifically, we will need to reconsider our collective commitment to ‘capitalism’ as we have known it,” Schwab writes. Schwab continued: “We must rethink what we mean by ‘capital’ in its many iterations, whether financial, environmental, social, or human. Humans as capital, now where have we heard that before, human resources anyone? Today’s consumers do not want more and better goods and services for a reasonable price. All very well Mr. Schwab, but where are the funds coming from to pay for these better goods and services, with jobs outsourced to an army of R2D2’s? ouroboros thinking patterns again Mr. Schwab. These people are so hellbent on control they lose sight of the fact, that the very people who keep them in control and rolling in currencies, are we the people, not robots. utter jackasses. Rather, they increasingly expect companies to contribute to social welfare and the common good.” In other words, corporations should no longer exist solely in order to create goods and gain profit, but to assist in curing society’s ills — almost if the companies themselves are a part of government. Hmm the corporate companies are a part of the government, do you think we are all stupid Mr. Schwab? all you are doing is revealing your hand, that was once hidden. USA Inc is a corporate company acting as a Government of America. “We have a choice. To remain passive which would lead to the amplification of many of the trends we see today: polarization, nationalism, racism and, ultimately, increased social unrest and confidence,” warned Schwab, all of which was created by think tank groups Schwab is a part of. But we have another choice, we can build a new social contract, particularly integrating the next generation. We don't want and need you con tracts, stick them where the sun don't shine. We can change our behavior to be in harmony with nature again.” haha now that is comedy at it's best, the same global elitists who have rampaged this planet of many resources to line their own pockets, and now they speak like they are environmentalists, environs no, mentalist definitely. “And we can make sure that the technologies of the fourth industrial revolution are best utilized to provide us with better lives.” In Schwab’s new world, things such as rolling lock-downs, crowd restrictions, and mask mandates will become a permanent part of not only America, but the entire world. This change, Schwab believes, is coming whether we like it or not. “Radical changes of such consequence are coming that some pundits have referred to as ‘before corona virus’ (BC) and ‘after corona virus’ (AC) era. We will continue to be surprised by both the rapidity and unexpected nature of these changes — as they conflate with each other, they will provoke second -, third -, fourth – and more-order consequences, cascading effects and unforeseen outcomes,” Schwab writes. When you break it all down, Schwab’s pronouncements are little more than a repackaging of the same globalist agenda that we’ve been hearing about since the 1990s. This time, however, globalists such as Schwab are using the COVID-19 pandemic as an excuse to foist their collectivist ideas on the world. It’s almost as if the pandemic itself was part of a plan; a triggering point in a global behavior-modification exercise. If that’s true, then the schemers deserve some credit. In less than a year, they’ve gotten the entire planet wearing unnecessary masks and

allowing themselves to be locked down in the name of public health. It makes one wonder, what is the next “radical change” going to be? “You’ll own nothing” — And “you’ll be happy about it.” “The U.S. won’t be the world’s leading superpower” “You won’t die waiting for an organ donor” — They will be made by 3D printers “You’ll eat much less meat” — Meat will be “an occasional treat, not a staple, for the good of the environment and our health.” “A billion people will be displaced by climate change” — Soros’ Open Borders “Polluters will have to pay to emit carbon dioxide” — “There will be a global price on carbon. This will help make fossil fuels history” “You could be preparing to go to Mars” — Scientists “will have worked out how to keep you healthy in space.” “Western values will have been tested to the breaking point.” — “Checks and balances that underpin our democracies must not be forgotten” Simon Peres center for peace oh my, Mr. Peres was responsible in building nuclear weapons for Israel in the 1960's, was involved in the planning of the Suez war, declared war on Egypt in 1956, spent most of his time bumming weapons of UK, America and in particular France, ordered a long-range Israeli airstrike against the PLO headquarters in Tunis, Morocco. He also initiated Operation Grapes of Wrath, in which 106 Lebanese civilians died and was a supporter of the mass genocide man, Ariel Sharon. And for all that you get a peace prize, the world is totally backwards, peace is peace and war is war, one doesn't kill and one does. We have to change their BC and AC descriptions, from before and after Covid to before and after clowns. Mr. Schwab is an all dancing puppet and clown of the highest order, but we thank him for his honesty and now we the people have a choice, globalist tyranny as warned in Clowns in panic or a new way as formulated by The Peoples Club?

If ever you thought for one minute the bantering war between America and China was government based, then this story blows that away. China has strongly rebuked the UK, the US, Australia, New Zealand and Canada after being accused of a concerted effort to silence critics in Hong Kong. The countries, which form the Five Eyes alliance, criticised China's imposition of new rules to disqualify elected legislators in Hong Kong. They urged Beijing to reverse course. A Chinese foreign ministry spokesman warned countries to stay out of China's affairs saying: "They should be careful or their eyes will be plucked out." "The Chinese never make trouble and are never afraid of anything," Zhao Lijian told journalists in Beijing on Thursday, saying it did not "matter if they had five or 10 eyes". The BBC which is MI5/6 said this in an effort to appease the non thinking people. Five Eyes is an intelligence-sharing alliance of the five Anglophone countries set up during the Cold War and initially developed to monitor the USSR and its allies. We on the other hand know different and will ask the BBC, then why is the KGB part of that network? So, now you know this war is a turf war on behalf of Intelligence agencies, at which point do the people and or governments not realise this as a fact, and stop it.

The piece about the First Draft disinformation group earlier plays into the piece of intel this week. We have outed several of these behind the scenes operations ran by agencies,

and here is another one. Operation Timber Sycamore was a classified weapons supply and training operation run by the United States Central Intelligence Agency (CIA) and supported by some Arab intelligence services, such as the security service in Saudi Arabia. Launched in 2012 or 2013, it supplied money, weaponry and training to rebel forces fighting Syrian President Bashar al-Assad. According to US officials, the operation was run by the CIA's Special Activities Division and has trained thousands of rebels. The operation's existence was suspected after the US Federal Business Opportunities website publicly solicited contract bids to ship tons of weaponry from Eastern Europe to Taşucu, Turkey and Aqaba, Jordan. One consequence of the program has been a flood of US weapons including assault rifles, mortars and rocket-propelled grenades into Middle East's black market. Vice-President Joe Biden is known to have been an active proponent of Operation Timber Sycamore within the Obama administration, and the President secretly authorised the CIA to begin arming Syria's rebels in 2012. In July 2017, US officials stated that Timber Sycamore would be phased out, with funds possibly redirected to fighting the Islamic State of Iraq and the Levant (ISIL), or to offering rebel forces defensive capabilities.

The distraction information warfare is in full flow now, MSM and Alt Media, my advice is to best ignore most of it. THI has always called out bs, much of it not believed when originally stated, but over time each one we outed became more clear as time went on, that is the key to now. A week where the alt media descended into the same pit of the MSM and declares people who question anything are labeled as haters. Too little of the alt media now is borne in truth or facts, one alt media this week is proclaiming Robert David Steele as the new temporary President, as neither Trump nor Biden will cut it. Several alt media are proclaiming all top people are dead or in GITMO and yet there is zero evidence to support either. Two alt media are arguing over the validity of assemblies, due to the difference between a citizen and person, when both forget we have no government and so renders it mute. Recent additions to the alt media to control the narrative are, Gene decode - which is part of ashtar command and so bs, Gene decode is an interesting name given the timing, we will find out more about that soon. Charlie Ward is a high level currency dealer, is a Golden Dragon member, and so is connected to the former entity known as Neil Keenan and Langley 2. Drake, Tanaath and Kent Dunn all back out spouting varying levels of savior programs and it is loop time again. In case some get confused about recent second hand information put out by another show, I will give you the first hand information as to what is real and what is distraction. There were 21 Parents, there were 13 Covens and there are 39 species below our feet, those are the correct figures no matter how many times the deliverer of 2nd hand information wants to say it. Twisting the narrative to make it fit into a pattern the person doesn't understand, will not make the information correct. Except one group did warn of it several times in the past 3 months, and it all unfolded as stated, bar one caveat to date. If all these things had happened the world would be getting better, not worse. Cries of vote rigging, fake

ballots, missing ballots, trashed ballots are raging all over the internet, but what is wrong with these 4 year non memory loop people? that happens at every election, the only difference is you fell for the media led tribal battle syndrome, and the majority in the alt media lost. What is generally overlooked in these missing ballots and counting errors is, why should an election be any different to the day to day activities in America, where levels of incompetency are at record levels all across the country, nothing works least of all government departments. Whereby a simple license renewal turns into the most complex levels of absurdity and crass stupidity it boggles the mind, so why should an election vote be any different? The difference is your guy lost, nothing more and nothing less, the great question is, what actual concrete proof has Trump given to the people that things have improved in the last 4 years? the cold stark truth is, nothing. But it is all part of some secret plan or chess moves, but what happens if you are not on the chess board? All of it is to distract from the nuggets of truth permeating around the world, and the fact that the MSM and the Alt media clowns are losing the narrative, and badly. Fact checkers, news print articles to wash over the truth, MSM lying through their teeth and alt media personalities making shit up as they go along, and passing it off as fact, when evidence to support is nowhere to be seen, because if it was, things would be better. The world is being hypnotized by bullshit and walk around oblivious to the basic facts on evidence readily available. The UK and Irish governments both confirmed in the past 2 weeks that the virus doesn't exist, but all of that is washed over by people distracting the public with blatantly fake claims that literally defy belief. Remember one alt media stated the virus doesn't exist, then tried to sell \$25K machines, that was over 50% overpriced to cure the said virus, that doesn't exist. I warned it would get ugly, and it has on all levels, and the chronic lack of shadow and inner work now reveals itself to the all. The lack of balance in people now rendered clear for all to see, as their metronome clicks ever faster from side to side and common sense becomes a rare commodity, perhaps the rarest commodity on the planet currently. As people seek sensationalism over reality and thinking, the path to balance and common sense for many is now rendered mute. Whipped into a state of frenzy and almost ready to accept any solution from their own madness, the days of the vaccine ticks closer and closer, and it will be the people who ask for it, to cure their own unsanity. Personally now those wishing to take it, should be given it, and if the consequences of taking it are as bad as we have all suspected, then they themselves are responsible for their own downfall. If people are too stupid to research and think for themselves, why should we worry about their innate ability to fall for the most basic stupidity and falsehoods and pass them off as fact, because some alleged authority told them so. Nurses and doctors are alleged authority until they go against the higher authority, then the crushing arm of their Talmudic law comes down on them, and people follow suit accordingly. Police are the alleged authority, but one staged event a few months back changes that whole opinion, and now they should be defunded, but too few asks, what happens next? The Military are the authority, and remember they were asked 6 years back would they fire on Americans, the ones who wouldn't were no doubt

all discarded, as surplus to requirements. The Military in Florida this week placed robot dogs as sentry guards on their facilities, do you not see where that is going yet? The Military and Militia both had an oath and duty to protect the people and the country from tyranny, at which level of tyranny is required before they take action? Suddenly everyone has gone common law, given the levels of it, one believes it is a program being ran, just like the toilet paper program ran earlier in the year. Now common law can work, but only if all the people assemble in one group as a collective force, individual and separate groups has never and will never work, which is why it is being pushed in the alt media again. The overview of it is a distraction ultimately, but maybe we hold onto hope that Matt Hancock and Anthony Cuomo will be arrested, time always tells. It is time to step back and think for yourself, stay in balance, work on your shadow and inner work and find real and actionable solutions for us all. Our show will continue as it has always done, we are not here for donations, like clicks, popularity games, sensational headlines or claims with zero proof, we just stay calm and keep it real, and so should you all.
