The Gardening update.

The TPC Gardening and Non GMO Communal Gathering are working on Food and Soil Sustainability Solutions for the New Blueprint for Humanity Manifesto.

We have been discussing it in our zooms, and to keep moving forward we have gone back to weekly meetings.

Drafts of the document have been posted in the Gardening Non GMO Foods section of the TPC Communal Gatherings Forum under the Topic, New Blueprint for Humanity – Food and Soil Sustainability Solutions Development.

Based on everyone's feedback and suggestions, a third draft will be posted this week to be discussed and in our next zoom on Saturday at 9:00 am MST or 11:00 am EST.

We hope to have it finalized soon after that.

The zoom link can be found in the Community Gatherings Forum under the Gardening CG Zoom Link Topic.

Final Editing of the Cooking Herbs Section of the Garden Guide is almost complete, and the final editing of the Fruit and Nuts Section will be started next week.

Law Group update.

The Law Group hosted the Intro to Law Series Part 3 in June, and covered Estates, what they are, how they are created from a Trust and why they are relevant.

Some key revelations were that property means right of use and not right of ownership, that a right can be defined as a privilege, that a person is a legal fiction.

That there are different types of fiction person and how they are used to enclose rights, restricting the rights/privileges available depending, on which fiction person we are presumed to be i.e. employee, driver, police officer, traveler.

We also shared some recent experiences that are bringing this information to life, how one member had a Border Guard actually admit that he does not know what the law is that he is supposed to be enforcing, and to think of him as a robot just following instructions on his computer screen.

The importance of the information we are sharing is becoming more relevant.

In the recent border experience mentioned, the member of the Law Group crossed from the US to Canada.

By refusing to consent to Mandates and Public Orders, which are not law, remaining calm, and explaining the law to the official, no issues were encountered.

The Border Guard thanked him for being truthful, respectful and polite and admitted that the majority of Border Guards do not agree with the Mandates they are supposed to enforce.

Part 4 of the Intro to Law Zoom is scheduled for July 10, details on the Law Group MeWe page.

We will be covering Corporations, Funds and Property.

The Law Group is also taking on Law, Finance/Banking, Tax and Countries for the Solutions Project.

We have shared Poverty & Progress by Henry George with some members who want to take on the Tax Solution.

Henry George was an enlightened economist from the 19th century and his book clearly defines the root cause of poverty, how it relates to private land ownership and taxation of products and services, and a misunderstanding of what capital truly is.

Much of Henry George's aligns with the Ucadia model and work of Frank O'Collins.

The Law Group continues to study the Ucadia model, and much depth is being gained which is helping in other areas of research.

We encourage those interested to join the Law Communal Gathering, access and study the Ucadia University materials we have made available on the Law MeWe page.

Other members have shared recent experiences with us, and it is exciting to see how this information is changing people.

Helping us all gain the confidence and innerstanding to stand up for our natural rights, by knowing who we are and how to use the truth, rhetoric and logic to rebut presumptions, and create positive outcomes when dealing with the current system.

Health & Wellness update.

The Health & Wellness CG Forum got off to a good start, with several members participating in a discussion of the importance of good nutrition in maintaining health.

Personal health journeys, and dietary supplement suggestions were exchanged.

Two herbal articles were presented in the Herbal Remedies section, under the title, Kitchen Herbs for Healing Series, with more to come.

An additional sub-title, Simple Natural Treatments, was also added, with articles soon to follow.

NEWS:

Here is a quote that all should consider.

Today's America is no democracy, it's a degenerating tyranny, disfigured by its military-industrial-governmental cancer.

Our people are increasingly ashamed and terrified of their government, and rightly so, because we have no control over it, and it's become a deceitful monstrous danger to us and to the health of the planet.

We're not The Land of the Free and the Home of the Brave.

To the contrary: We, the people, are on our knees, cringing and whimpering in dismay and confusion, prostrate before the forces that have betrayed us. Richard Mynick.

The Government in the UK is facing calls to slim down its new Online Safety Bill, which is currently making its way through Parliament, amid concerns over its impact on people's freedoms and privacy, as well as innovation.

The new internet legislation will hand ministers unprecedented censorship powers, with significant implications for free speech, new research warns.

The legislation is set to require platforms legally to protect users from harmful content for the first time, with penalties for breaching the new rules, including fines that could run into billions of pounds for larger companies.

Culture Secretary Nadine Dorries has said it will make the UK the safest place in the world for our children to go online.

Ah the sweetener, we are protecting the children, yeah right.

But former ministers have claimed the Bill panders to the view of the perennially offended, and could end up being one of the most significant accidental infringements on free speech in modern times.

It is not an accident by any means, it is the weak and pathetic people who can't handle truth.

A new briefing paper from the Institute of Economic Affairs think tank warns that through the establishment of safety duties, the Bill risks digital platforms using automated tools in a cautious and censorious manner against content, that is only reasonably considered to be illegal.

It says the legislation will hand the Secretary of State and Ofcom unprecedented powers to define and limit speech, with limited parliamentary or judicial oversight.

He warned the Bill panders to the view of the perennially offended, those who think the Government should protect them from ever encountering anything they disagree with, adding that the Tories should not be putting this view into law.

What a control system that is, stupid and weak people creating Draconian laws, because they can't face reality.

Like I have said, it is the people who are the problem.

Despite all the sanctions against Russia, it doesn't extend to the Rothschild's based gold refineries it seems.

Switzerland imported gold from Russia for the first time since Vladimir Putin launched his war on Ukraine, suggesting that the self-sanctioning of some buyers may be easing.

In May, over three tons of gold arrived in Switzerland from Russia, according to data from the Swiss Federal Customs Administration.

It marked the first Russian gold import for the European nation since February.

The move by Switzerland which holds four major gold refineries is notable because, most buyers stopped importing gold from Russia when the London Bullion Market Association removed the country from its accredited list.

It marked a de facto ban on Russian gold from the London market, but no explicit sanctions have been imposed that prohibit Russian metal from being processed in other nations or at other refiners.

So, the UK is blocked from getting gold, whilst the Rothschild's have free reign over that market.

Switzerland registered nearly all the gold it imported last month for refining or other processing, although the four largest refineries said they did not take the commodity.

Other buyers, meanwhile, still remain hesitant to import Russian metals, including palladium.

Switzerland, however, has continued to import palladium from Russia since April.

Despite sanctions imposed by Western nations, Russia continues to flex its muscles as a commodities provider, especially in energy as oil and gas revenues roll in.

Isn't it funny how they can get gold out of Russia, but not grain to feed the people?

Credit Suisse has been found guilty and fined for involvement in money laundering related to a Bulgarian drugs ring.

Bulgarian? Or CIA?

Switzerland's criminal court found that the bank did not do enough, to prevent members of the crime syndicate from profiting off the trafficking of cocaine in to Europe.

It was fined around £1.7m and ordered to pay £15m to the Swiss government.

The bank denies wrongdoing and said it would appeal against the ruling.

A former Bulgarian tennis player, Elena Pampoulova-Bergomi, who worked at the bank for a period, was found guilty of money laundering by Switzerland's highest criminal court and received a 20-month suspended prison sentence.

Her £1.7m fine was also suspended.

So no fine or sentence, yet Credit Suisse pay the Swiss Govt \$15M, or in reality, this is Rothschild's again laundering money, oh the irony of it.

The court heard evidence around the bank's role in accepting millions of Euros in bank deposits between 2004 and 2008, which it said was full of red flags.

Prosecutors said that Pampoulova-Bergomi had built an informal financial relationship with former Bulgarian wrestler Evelin Banev, who was a major figure in a European cocaine smuggling ring.

The court heard that the former tennis player regularly collected bags full of cash, some amounting to the equivalent of £400,000 from people known to the wrestler.

Prince Charles just got exposed for the same thing, a suitcase full of cash, but no charges there.

The Swiss court also heard testimony relating to the drug trafficking gang's activities, including murder.

Credit Suisse is Switzerland's second largest bank and denies wrongdoing.

It is the first time a Swiss bank has been subject to such criminal proceedings.

Bitcoin miners in New York state faced a regulatory blow, as the state denied air permits for a gas-fired power plant used to mine Bitcoin.

How ironic, an air permit is denied for fresh air tokens.

It's the latest step that New York has taken to crack down on crypto mining, as it tries to meet its goals on climate change.

The decision was made for the Greenidge Generating Station in New York's Finger Lakes region.

Bitcoin mining brought new life and renewed controversy to the embattled plant in 2020.

That drew outrage from some local residents worried about how the plant could affect fish and tourism, by discharging hot water into nearby Seneca Lake.

If only they were as outraged by the absolute theft of people's money, by these crypto-currency harvesting clowns.

NATO has announced plans to massively increase the number of its forces at high readiness to over 300,000 troops.

The bloc's rapid reaction force currently has 40,000 troops at its disposal, with many of those based along the alliance's eastern flank.

Which of course means it is next to Russia's border, all of which means it is they NATO, that caused the Ukraine war.

Secretary-General Jens Stoltenberg said the increase followed a direct threat from Russia to European security, it is vice versa jackass.

He earlier said that the new military blueprint would drastically upgrade the bloc's eastern defenses.

He also said several NATO battlegroups in eastern Europe would be bolstered to brigade level, tactical units of several thousand troops, which is intended to send a clear message of deterrence to Russia.

I'm confident that Moscow, President Putin, understands our collective security guarantees, understands the consequence of attacking a NATO-allied country.

It will trigger a response from the whole Alliance, and to underpin that message, we are increasing the NATO presence.

Yet despite all their mouthy rhetoric, they haven't defended Ukraine, funny that.

NATO's rapid reaction force is a combination of land, sea and air assets designed to be deployed quickly in the event of attack.

It has steadily grown in size from 13,000 troops to 40,000 since 2014.

In reality land, I hear they haven't got anywhere near the 300K and unlikely to achieve it.

Following Russia's invasion of Ukraine, many of these forces were placed at high readiness for the first time.

Multinational battlegroups are now active in a number of countries on Russia's border, including Latvia, Estonia, Lithuania and Poland.

There are additional plans to deploy more battlegroups in Bulgaria, Hungary, Romania and Slovakia.

The moves announced by Mr. Stoltenberg are expected to be approved at this week's NATO summit in Madrid, which will follow the G7 meeting.

Members are also expected to change the alliance's official stance towards Russia, which was adopted in 2010 and described Moscow as a strategic partner.

I expect that allies will state clearly that Russia poses a direct threat to our security, to our values, to the rules-based international order.

Rules based? What rules? International order? Oh, you mean hijacking countries on the bs notion that you are protecting them? Turn it in.

US officials have also briefed that new, strong language will be adopted towards China.

Woo, strong language, I am sure China will be terrified by that remark, not.

Both the US and UK have reportedly pushed for a more forceful stance to combat what they see as, an increasing threat of attack against the democratic island of Taiwan by Beijing.

It belongs to China, but thanks for the reminder of what Democratic means, hostile takeover of said country.

As NATO plans to expand its army, the US equivalent is collapsing in on itself.

The US military is posting the lowest recruitment numbers in decades, with the army doing worse than all the other service branches.

An op-ed on Monday carefully blamed an antiquated recruitment system and the recent woke ads as the main culprits, proposing an overhaul of both.

Earlier this month, the Pentagon confirmed that the military was 23% behind its recruiting goals for the year.

That will get worse, as people have had enough of being medical guinea pigs, used as cannon fodder for clown oriented wars, which they themselves won't fight in.

The problem was already apparent in April, when Senator Thom Tillis told the Armed Services Committee, that every single metric tracking the military recruiting environment is going in the wrong direction, and warned about the worst numbers in the last few decades.

According to an op-ed in Task and Purpose, authored by one current and one former US Army officer, the two principal problems are misguided advertising and an obsolete recruitment system.

No, people are starting to see through your lies, fake flag waving and fake Patriotism is what is really happening.

White House economic adviser Brian Deese suggested the pain at the pump was a price Americans had to pay for the future of the liberal world order.

Liberals are utter idiots, have zero common sense and zero solutions, either way it is a fake label it is a Jew World Order, or so they think.

A CNN Newsroom host Victor Blackwell played a clip of President Biden telling a reporter at Thursday's NATO Summit, that Americans can continue to pay a premium for gas as long as it takes to win the war in Ukraine.

The reporter then asked Biden how long it's fair to expect American drivers, and drivers around the world to pay that premium for this war, referencing Ukraine.

As long as it takes, so Russia cannot in fact, defeat Ukraine and move beyond Ukraine, Biden said.

We are going to support Ukraine as long as it takes, how about supporting Americans you jackass!

That is what mask man thinks of the American people, prefers political and clown level stunts to defeat the boogeymen Russia, they won't, over the pain of financial drain of the American people.

That says it all.

Here is a solution, make the Military pay their own gas and fuel, and see how long it lasts then?

Blackwell asked Deese how the White House would respond to Americans, worried that they won't be able to survive paying close to or over \$5 a gallon, potentially for years to come.

The military analysts, the Director of National Intelligence say this can be a long war measured in years.

I think everybody understands why this is happening, erm no we don't, what has Ukraine got to do with America?

But is it sustainable he asked?

What do you say to those families that say, listen we can't afford to pay \$4.85 a gallon for months, if not years.

This is just not sustainable, Blackwell questioned.

Deese initially responded, what you heard from the president today was a clear articulation of the stakes.

This is about the future of the liberal world order, and we have to stand firm.

Who is we Mr. Deese? Why are you employed in this country and who is paying your excessive wages?

Are just two of the questions that need to be answered by him nationally.

Mask man was not done with disrespecting Americans this week either.

President Biden hastily ended a press conference on Thursday, turning his back as reporters shouted questions and declaring, I'm out of here.

Biden answered several questions from a pre-determined list of reporters, for that, read puppets, because heaven forbid you ask him a common sense or solution-based question.

Multiple reporters still wanted to ask questions, and someone in the crowd promised to be quick, but Biden shut it down nonetheless.

There's no such thing as a quick one, I'm out of here Biden said, as he walked away from the podium as numerous reporters had their hands raised.

Biden, who has a history of walking away from reporters attempting to ask questions.

The problem is, he and they are allowed to get away with it.

And the jackass media never hold them accountable.

It seems there is a group going after John Skull & Bones Kerry and his fake climate change deal.

The Herald has been told details about Kerry's staff will be made public by October of 2024.

Other Freedom of Information Act requests about his travel and expenditures have also been postponed, the request was first submitted May 13, 2021.

As recently reported, U.S. Rep. Chip Roy, R-Texas, is so fed up with Kerry's secrecy he wants to defund the Climate Office.

We need to know what John Kerry is doing, Roy told the Herald.

Show us his calendar, speeches, we need that kind of transparency, he added, saying Kerry is probably also piggybacking off the State Department to fly all over the world on climate trips.

Good stuff, I like to see people being held accountable, it should happen more often.

The point is, is this the real John Kerry after being shot in Switzerland in 2015? Remember he said he fell off his bike, he lied.

An Australian digital bank has collapsed, leaving 140 employees without a job and 6,000 customers racing to withdraw their money before next week.

Volt Bank announced on Wednesday it was closing its deposit taking business, and will return its banking license after it couldn't raise enough funds to stay afloat.

Volt has made the difficult decision to close its deposit taking business, and has commenced the process of returning all deposits to its account holders, their website said.

Customers need to transfer the balances held in all Volt accounts to a nominated bank account with another financial institution before the 5th of July 2022.

Will customers get all their funds back is the great question?

This was just what I warned would happen with the great decentralization of banks, in the Clowns in Panic June 2019 show.

Since being elected to lead the World Council of Churches earlier this month, the Rev. Jerry Pillay, former general secretary of the Uniting Presbyterian Church in Southern Africa, has been rebuffing critics who accuse him of making antisemitic remarks by referring to Israel's treatment of Palestinians as tantamount to apartheid.

Pillay, the dean of the University of Pretoria, is slated to assume leadership of the global ecumenical Christian group at the beginning of next year.

As many in the WCC celebrated his June 17 election at a meeting of the group's central committee, some Jewish leaders expressed outrage that the WCC would elevate someone who has in the past called out Israel, in language that many Jews believe crosses a line.

The problem is with that group is, everything in critique or truth is deemed as crossing the line with them, overly sensitive and deeply troubled peoples.

If they don't like the comments, then the solution is simple, stop doing wrong and or bad things.

David Michaels, director of United Nations and intercommunal affairs at B'nai B'rith International, described Pillay's election as astounding and alarming.

What is more alarming Mr. Michaels is, you and the army of others being right on the ball at any given time of the day or night, to counter criticism and only perceive Israel or Jews in good light, it is indicative of a system on 24/7 to counter argue points.

Why are they so scared of others opinions?

He accused him of espousing simplistic ideological extremism and having a problem with Jews, at least those supportive of Zionism.

Indeed, those that know the real truth all have an issue with Zionism Mr. Michael's.

Michaels and other critics pointed to a theological paper Pillay published in 2016 titled *Apartheid in the Holy Land: Theological reflections on the Israel and/or Palestine situation from a South African perspective*.

The paper concludes that a comparison between the Israel-Palestine conflict and the South African apartheid experience is, indeed, justifiable.

Exactly because it is true, but it is not just Palestinians, remember the African peoples story who said they were the descendants of the tribes and Hebrew, and how they were banned from living in Israel.

That is not only an apartheid regime, but a rampant racist one as well.

MEDICAL:

The World Health Organization is attempting to seize control over global pandemic monitoring and response, and ultimately, all health care decisions.

Predictably Bill Gates intends to play a key part in this takeover.

He's building a pandemic response team for the WHO, dubbed the Global Epidemic Response & Mobilization or GERM Team, how very amusing Mr. Gates, you do realize you are the germ, virus and parasite?

Which will have the authority to monitor nations and make pandemic response decisions, such as when to suspend civil liberties to prevent spread of an illness.

This is decentralized Government, I hope you all realize that.

Their plans are to have everyone stuck in their homes again.

The globalist cabal plans to seize control through biosecurity governance, and they're attempting to do this using two different avenues.

If we fail to fight off both attacks, we'll end up under totalitarian governance.

The first attack comes in the form of amendments to the International Health Regulations, which are currently being voted on by the World Health Assembly.

These amendments will strip member nations of their sovereignty, and give the WHO unprecedented power to restrict your medical freedoms and civil liberties in the name of biosecurity.

Unless rejected, they will become binding law in November 2022.

The second attack comes through a new international pandemic treaty with the WHO.

They intend to eliminate individualized medicine and provide blanket rulings for how a given threat is to be addressed, and this can only result in needless suffering, not to mention the loss of individual freedom.

We don't need greed based medical people deciding things for us.

You all have seen how they handled the Covid scam, they couldn't organize a piss up in a brewery.

Whilst this is a sad story there is some good news and I hope they go onto overcoming it and developing it more, and ditch their poisons.

US farmers have curbed the use of common weed killers, and changed their planting plans over persistent shortages of agricultural chemicals.

They said that spraying smaller volumes of herbicides and turning to less-effective fungicides, increase the risk of weeds and diseases crippling crop production at a time when global grain supplies are already tight.

This is off the charts, everything was delayed, delayed, delayed, said Shawn Inman, the owner of distributor Spinner Ag in Zionsville, Indiana.

According to him, supplies are currently the tightest in his 24-year career.

Prices for glyphosate and glufosinate herbicides soared more than 50% from last year.

The costs of glyphosate reached \$50-60 a gallon, up from less than \$20 a gallon in mid-2021.

Chemicals giant BASF said that the supply situation with glufosinate and other herbicides will not improve significantly next year.

Meanwhile, weed specialists at Texas A&M University have warned that reduced usage of herbicides this summer, would leave farmers with more weeds to fight for the next two years.

Another expose of the skullduggery and double dealing and standard of our so-called Agencies, although quite why they are called American is beyond me.

Countless pieces we have done now exposing that they are far from working for the American people, and actually in many cases working against America and its people.

In 1984, the CIA and the FBI were riding high.

Each of these powerful organizations were managing portfolios of Soviet agents who were ostensibly doing their bidding, spying against the USSR, and providing the United States with troves of secret information about the inner workings of the former superpower.

They lie, they were working together, and have been since their inception.

Then, between 1985 and 1986, the walls came tumbling down.

Thanks to three American traitors, the entire portfolio of spies being run by the CIA and FBI were rounded up by Soviet authorities.

Responsibility for this intelligence disaster would ultimately be assigned to two CIA officers, Edward Lee Howard, who gave away Adolf Tolkachev, the billion-dollar spy.

He was nicknamed that because the information he provided on Moscow's military capabilities, that saved the US a billion dollars in research and development costs.

Aldrich Ames, who betrayed 25 Soviet moles, 10 of whom were allegedly arrested and subsequently executed for their crimes, and one FBI man Robert Hansen who betrayed scores of Soviet agents, along with the names of so-called double agents.

Americans recruited by the Soviets to spy, but who were really working for either the CIA or FBI.

The CIA never fully recovered from the impact of the betrayals inflicted by the trio of traitors, Howard, Ames, and Hansen all of whom spied for the Soviets, and together were responsible for the literal annihilation of the CIA's human intelligence networks operating in the USSR during the mid-1980s.

Instead of accepting responsibility for its failures, however, the CIA sought to blame a ghost who became known as the so-called fourth man, typical deflection tactics they always use when exposed.

A spy that existed only in the imagination of those who spent years scouring the shadows for evidence, of his existence and turning up nothing.

It is the hunt for this mythical fourth man, that is the subject of Robert Baer's eponymously named book.

Baer, himself a former CIA operations officer, has tapped into his former life, prying open the memories of his former colleagues at the CIA to breathe life into a tale of betrayal and deception-driven paranoia, that does not cast a positive light on his former employer.

The Fourth Man, supposedly an explosive never-before-told story of the thrilling hunt for a KGB spy in the top ranks of the CIA, has been likened to a real-life version of John LeCarre's classic tale of espionage and betrayal, Tinker, Tailor, Soldier Spy.

The book was said to be disappointing, described as a tiresome story that promised much but, in the end, was about nothing.

One disturbing aspect of Baer's book is that he puts a name to the fourth man, Paul Redmond, a retired CIA counterintelligence officer, whose job was to ostensibly hunt down the very spy Baer has tried to bring to life in his narrative.

After reading Baer's book, I walked away very uncomfortable about his assertion that Redmond, the man former CIA Director James Woolsey called a voice crying out in the wilderness, regarding the existence of a Soviet mole inside the CIA who turned out to be Aldrich Ames, was himself not just a spy, but the spy.

The one Baer claims was responsible not only for the inability of the CIA to reconstitute its human intelligence networks in Russia, but also the CIA's inability to predict the rise of

Vladimir Putin, and get a source close enough to Putin to better inform US policy makers about the Russian leader's intentions.

In short, according to Baer, Redmond is singularly responsible for the absolute failure of the CIA when it comes to producing quality intelligence about post-Soviet Russia.

While Baer is open about the many failures of the CIA and the FBI when it came to allowing Howard, Ames, and Hanson to inflict such harm on US intelligence operations, the story he weaves about why the CIA was never able to regain its lost position in Russia.

Because the fourth man, a person whom Baer calls the perfect spy, was able to tip the Russians off about everything the CIA was doing and thinking of doing regarding Russia.

For a layperson, Baer's foray into the world of LeCarre-like quasi-intellectualism might be believable, but the book comes off as too contrived, too speculative, and too incomplete to ever capture the imagination of the reader.

But Baer himself an experienced CIA case officer with experience in the former Soviet Union, provides too many clues as to the real reason behind the CIA's failures, namely the incompetence of the people it tasked with penetrating targets in Moscow.

Or perhaps they are complicit in it, and it was not a failure on their part, but a premeditated effort to not out certain targets or countries, because the CIA at the top are working directly with them.

Baer reveals two incidents that he was personally involved in, the unauthorized testing of a secret CIA satellite communications system in the Russian capital.

When he and other CIA agents in transit passed through a metal detector in Moscow on their way to destinations south, only to be casually waived through by the Russian customs officer, that together shed a light on the true reasons for the CIA's many failures.

Do you seriously think the Russians didn't spot that and or where complicit in it? As confirmed by this next piece.

Given what I know, and what Baer begrudgingly acknowledges, about the professionalism of the Russian security services, it is highly unlikely that either incident escaped the attention of Baer's Russian hosts, guaranteeing that Baer and his fellow travelers were completely compromised.

Simply put, if Baer's actions were indicative of the lax tradecraft used by the CIA in post-Soviet Russia, it doesn't take a rocket scientist or a crack CIA counterintelligence squad, to understand that the fourth man was the agency itself.

A fabrication derived from the collective imaginations of the amalgam of egotists, drunks and schizophrenics that populated the CIA, and who had been so unnerved by the consequences of the Howard, Ames, and Hansen betrayals.

That they allowed themselves to become paralyzed by fear, afraid to undertake any meaningful action against Russia target lest they fall victim to their own collective incompetence.

I rest my case, 140 IQ my ass.

The fourth man, Baer claims, was more senior and better placed than Aldrich Ames, someone who spied for the game and not money, and who was never caught, let alone charged with spying, what is described as the Holy Grail of American counterintelligence who knew how to play the game to win.

I remain unconvinced he said.

I look at the CIA's abysmal track record in post-Soviet Russia, and I see an agency trapped by mediocrity and a lack of imagination.

A Russia Department staffed by second-tier players, the first team was off fighting terrorists, which actually they created, and guided by erstwhile post-Soviet Russian experts.

Who comprehended the rise of Vladimir Putin even less than they understood post-Soviet Russia as a whole, and who were more than willing to allow the fiction of the fourth man to be promulgated, in order to absolve them of their utter incompetence.

But what is winning? Does anybody ask that question? Who really wins? Because it is seriously not the very people who are paying for this child level nonsense and rank incompetence.

What this and many other reports and incidences coming out of the CIA is revealing, it is not fit for purpose and a massive waste of public money.

OTHER PIECES:

This is a good news story that can begin to clean up the planet of trash, in particular the plastics problem.

Let's see if they roll this out as fast as the fake vaccines.

Researchers have developed an innovative way to convert plastics to ingredients for jet fuel and other valuable products, making it easier and more cost effective to reuse plastics.

The researchers converted 90% of plastic to jet fuel and other valuable hydrocarbon products within an hour at moderate temperatures, and easily fine-tuned the process to create the products that they want.

Plastics recycling has been problematic.

The most common mechanical recycling methods melt the plastic and remold it, but that lowers its economic value and quality for use in other products.

Chemical recycling can produce higher-quality products but it has required high reaction temperatures and a long processing time, making it too expensive and cumbersome for industries to adopt.

Because of its limitations, only about 9% of plastic in the U.S. is recycled every year.

Which tells you they are not interested in cleaning up the world, only in the cost and shekel values.

The researchers developed a catalytic process to efficiently convert polyethylene to jet fuel and high-value lubricants. Polyethylene, also known as #1 plastic, is commonly used in a huge variety of products from plastics bags, plastic milk jugs, and shampoo bottles to corrosion-resistant piping, wood-plastic composite lumber, and plastic furniture.

For the process, the team used a ruthenium on carbon catalyst and a commonly used solvent.

They were able to convert about 90% of the plastic to jet fuel components or other hydrocarbon products within an hour at a temperature of 220 °C (428 °F), which is more efficient and lower than temperatures that typically would be used.

Adjusting processing conditions, such as the temperature, time, or amount of catalyst used, provided the critically important step of being able to fine-tune the process to create desirable products.

The process could work effectively with other types of plastics.

Good stuff, but will that make flights cheaper? Perhaps the greater question is, will there be any airlines left?

Just when you thought things of a bizarre or stupid nature has ran its course, think again.

As Louisiana Governor John Bel Edwards signed the CROWN Act into law on June 21, 2022.

Bell being the operative word.

According to the official website, the CROWN Act stands for Creating a Respectful and Open World for Natural Hair. (M)

A law prohibiting race-based hair discrimination.

The act protects a person from being denied employment and educational opportunities because of their hair texture.

Seriously, the country is falling apart and being asset stripped, and this is their focus?

This was written in 1953 by Ron Hubbard, and whilst I don't care too much for the man and what he was involved in, he had some valid points made in this piece, with bits added to it by myself.

An eloquent journey through life, matter, time and space.

1. Before the beginning was a cause and the entire purpose of the cause was the creation of effect.

We have covered this recently about the propensity to focus on the effect, and not the cause.

Reversing that will bring many solutions in many fields of operation.

2. In the beginning and forever is the decision and the decision is to be.
3. The first action of beingness is to assume a viewpoint.
4. The second action of beingness is to extend from the viewpoint, points to view, which are dimension points.
5. Thus, there is space created, for the definition of space is: viewpoint of dimension, and the purpose of a dimension point is space and a point of view.
6. The action of a dimension point is reaching and withdrawing.
7. From the viewpoint to the dimension points there are connection and interchange.

Thus new dimension points are made, thus there is communication.

8. And thus, there is light.
9. And thus, there is energy.
10. And thus, there is life.

By creating the space you are in essence creating a dimension, a space for thought, deep thinking and also a good space for meditation.

Create your own dimension and protect it, the dimension is then called the sacred space.

11. But there are other viewpoints and these viewpoints outthrust points to view.

There comes about an interchange amongst viewpoints; but the interchange is never otherwise than in terms of exchanging dimension points.

12. The dimension point can be moved by the viewpoint, for the viewpoint, in addition to creative ability and consideration, possesses volition and potential independence of action; and the viewpoint, viewing dimension points, can change in relation to its own or other dimension points or viewpoints.

Thus comes about all the fundamentals there are to motion.

13. The dimension points are each and every one, whether large or small, solid.

And they are solid solely because the viewpoints say they are solid.

That is your own manifestation skills in operation, if you can create a new dimension without knowing you have done so, imagine what else you can achieve by putting your mind and heart into it?

14. Many dimension points combine into larger gases, fluids or solids, and thus there is matter.

But the most valued point is admiration, and admiration is so strong its absence alone permits persistence.

15. The dimension point can be different from other dimension points and thus can possess an individual quality.

And many dimension points can possess a similar quality, and others can possess a similar quality unto themselves.

Thus, comes about the quality of classes of matter.

16. The viewpoint can combine dimension points into forms and the forms can be simple or complex, and can be at different distances from the viewpoints and so there can be combinations of form.

And the forms are capable of motion and the viewpoints are capable of motion and so there can be motion of forms.

All of which creates the flow, life and the controller have established and administered a lack of flow, which takes us back to scarcity again.

17. The opinion of the viewpoint regulates the consideration of the forms, their stillness or their motion, and these considerations consist of assignment of beauty or ugliness to the forms, and these considerations alone are art.

18. It is the opinion of the viewpoints that some of these forms should endure, thus, there is survival.

19. The viewpoint can never perish; but the form can perish.

20. The many viewpoints, interacting, become dependent upon one another's forms and do not choose to distinguish completely the ownership of dimension points, and so comes about a dependency upon the dimension points and upon the other viewpoints.

21. From this comes a consistency of viewpoint of the interaction of dimension points and this, regulated, is time.

22. And there are universes.

23. The universes then, are three in number: the universe created by one viewpoint, the universe created by every other viewpoint, the universe created by the mutual action of viewpoints which is agreed to be upheld, the physical universe.

That is the manifestation skills in action again, and you still think you have no power and are limited?

24. The viewpoints are never seen, and the viewpoints consider more and more that the dimension points are valuable.

Then the viewpoints try to become the anchor points and forget that they can create more points and space and forms.

Thus, comes about scarcity.

The dimension points can perish and so the viewpoints assume that they, too, can perish.

25. Thus, comes about death.

26. The manifestations of pleasure and pain, of thought, emotion and effort, of thinking, of sensation, of affinity, reality, communication, of behavior and being are thus derived, and the riddles of our universe are apparently contained and answered herein.

Yes, all the answers are within.

27. There is beingness, but Man believes there is only becomingness.

Which is bizarre as becoming is a future word, when the majority don't future think.

28. The resolution of any problem posed hereby is the establishment of viewpoints and dimension points, the betterment of condition and concourse amongst dimension points, and thereby viewpoints, and the remedy of abundance or scarcity in all things pleasant or ugly, by the rehabilitation of the ability of the viewpoint to assume points of view.

To create and uncreate, neglect, start, change and stop dimension points of any kind at the determinism of the viewpoint. Certainty in all three universes must be regained, for certainty, not data, is knowledge.

29. In the opinion of the viewpoint, any beingness, any thing, is better than no thing, any effect is better than no effect, any universe better than no universe, any particle better than no particle, but the particle of admiration is best of all.

30. Above these things there might be speculation only, and below these things there is the playing of the game.

It is only speculation as it has not been manifested, because people treat life like it is a set course, ran by the operators of it, but people forget we are the creators, not the followers.

The key is to not play their game, develop and play your own game it works better and is more sustainable.

But these things which are written here, Man can experience and know.

Some may care to teach these things and some may care to use them to assist those in distress, and some may desire to employ them to make individuals and organizations more able, and so give to Earth a culture of which we can be proud.

And this we what we at THI and the TPC are striving to achieve, where there is a will there is a way.

But it requires the participation of all, after all why wouldn't you wish a better life, a better world and a better society.

We can spend another decade pointing fingers at each other, or create innovative solutions and actions to actually fix the world together.

These next two pieces are about what you observe, not absorb others.

What is Personal Integrity:

What is true for you is what you have observed yourself, and when you lose that you have lost everything.

Personal integrity is knowing what you know, and to have the courage to know and say what you have observed.

That is integrity and there is no other integrity.

Of course we can talk about honor, truth and all these things, these are esoteric terms.

But I think they'd all be covered very well, if what we really observed was what we observed.

That we took care to observe what we were observing, that we always observed to observe.

Not necessarily maintaining a skeptical attitude, but a critical attitude, or an open mind.

But certainly maintaining sufficient personal integrity and sufficient personal belief and confidence in self, and courage that we can observe what we observe, and say what we have observed.

This requires the opening of the throat chakra, to then relay what you have observed.

That is your truth and matters not what others think of it, or you.

Nothing in life is true for you, unless you have observed it.

The key is to never let others sway you off of your path, mood, intention or standing.

That is the ultimate in self-mastery, when that is attained, life becomes much simpler unless you engage their world.

But, that is a lesson in mastery as well, you learn patience, tolerance, how to be and how not to be.

But what is observation? How do you observe is the question to ask yourselves? What does he mean how do I observe? Is there a different way of observing? Well yes there is.

Most people observe the effect of things, but not the cause, the cause can give you the full understanding of the created effect.

Who or what manifested the cause, that the effect of is seen by the observers?

The failed big bang theory only describes the effect, but not the cause, but without knowing the cause, how can you understand the effect? The answer is you can't.

As an example people see the point of light, a single light for most observers, which is the effect.

But a different observer will look behind the light and see the spectrum.

It is the same with information, there is a point of origin, but if you go behind it, you will see the spectrum of information and then understand it from several directions and perspectives.

The different observer is the mirror analogy we did in the show, the real observer is watching the copy of you, looking at a copy of you in the mirror.

So perhaps it is not what you observe, but how you observe that matters.

Here is another of their seeded debates and indeed ploys, this time what is reality?

They are trying to distract people from reality and install them in their metaverse realm.

Where people will become so immersed they will not be able to tell the reality world from the fictional one.

All done with mind meme and the hijacking of your brain via the Musk led Neurolink.

Stupid bots will do anything for entertainment, or so they think it is, in reality it is entrainment.

Musk is said to be working on being able to stream music directly into your brain, via the Neurolink.

The great question is, why would you want to? Likely all boils down to that word convenience again, all of which equals lazy people.

And therein lies the problem, a lack of THInking.

One of the biggest mysteries in quantum mechanics is whether physical reality exists independent of its observer.

New research from Brazil provides strong evidence that there might be mutually exclusive, yet complementary physical realities in the quantum realm.

Future research on the great quantum debate might give us super-disruptive quantum technologies, and probably startling answers to the world's greatest mysteries.

We can answer them now, if people grew a set and accepted the truth.

Does reality exist, or does it take shape when an observer measures it?

Akin to the age-old conundrum of whether a tree makes a sound if it falls in a forest with no one around to hear it, the above question remains one of the most tantalizing in the field of quantum mechanics, the branch of science dealing with the behavior of subatomic particles on the microscopic level.

In a field where intriguing, almost mysterious phenomena like quantum superposition prevail, a situation where one particle can be in two or even all possible places at the same time.

That already happens when a child is being created, you know why? Think multi-dimensionality, but these experts want everyone controlled in a box.

They deny dimensionality because, it brings in the unknown story of the Star Gates, different Universes and other things that the establishment doesn't want to be revealed.

That technology shows how you can transfer from one place or plane to the next in an instant, just like the cells.

Some experts (M) experts! say reality exists outside of your own awareness, and there's nothing you can do to change it.

For lazy thinkers yes, but manifesters can change everything once you grasp the reality of it.

Others insist quantum reality might be some form of Play-Doh you mold into different shapes with your own actions, erm that is called consciousness.

Now, scientists from the Federal University of ABC in the São Paulo Brazil, are adding fuel to the suggestion that reality might be in the eye of the observer.

Simple solution to that conundrum, whack the scientists over the head with a hammer, and see if that was their reality or they observed it.

In their new research, published in the journal Communications Physics in April, the scientists in Brazil attempted to verify the complementarity principle the famous Danish physicist Niels Bohr proposed in 1928.

Erm Neils Bohr was not Danish, his mother was an Adler from the Jewish banking fraternity.

It states that objects come with certain pairs of complementary properties, which are impossible to observe or measure at the same time, like energy and duration, or position and momentum.

For example, no matter how you set up an experiment involving a pair of electrons, there's no way you can study the position of both quantities at the same time: the test will illustrate the position of the first electron, but obscure the position of the second particle, called the complementary particle at the same time.

It's called time and space for a reason.

It is complimentary because it came from Source.

All people need is, just a little patience with themselves.

EXPOSE:

This is a very long piece done in 2 parts, the latter of which will come next week.

It is very topical at this time, and in particular for those that joined me on the trip.

Engagement to correct this is now underway.

It involves word magic or spell casting, some elements of the scriptures, and the old chestnut of biblical prophecy.

Except they are not prophecy at all, they are plans.

The prophecies only came about because of the looping worlds, where everything repeats.

Who are the Hopi really related to, perhaps we are about to find out?

Hopi descend from Anasazi called the Ancient Ones, in Navaho language Enemy Ancestors and Puebloans Villagers in Spanish.

Interesting the Navaho call them enemy ancestors, suggestive of tribal wars of the past long before the so-called white man arrived.

Polytheists with gods seen in rivers, mountains, sky, earth etc, a similar type of enemy seen in Egypt in the Hyksos known as the foreign shepherds shortly before the Exodus.

Perhaps that line is indicative?

A Matriarchal Society, Hopi revere a deity called The Grandmother, regarding Mother Earth as a Living entity.

Chumolongmo the Earth Mother is Mt. Everest, the site of Noah's Ark and origination of Canaan, a product of Ham (Black) and his Cainite mother (Noah's wife) ultimately deriving from Eve and Cain.

Hopi Shaman predicted the inventions of the White Brother, a carriage or covered wagons pulled by animals.

The Hyksos introduced war chariots to Egypt, Israel encountered the same war chariots after the flood in war with the Hittites, whose God of the West was Santa.

Carriages running by themselves now called Automobiles, roads in every direction with water in front with asphalt or bitumen mortar was used in the Tower of Babel.

Land crossed with snakes of iron which is the railroad.

Communication through a cobweb which is telephone lines; Communication without wires became Radio/TV; Roads in the Sky became Commercial air travel; Gourds full of ashes became Nuclear weapons and finally Darkness.

Red Shaman/Kachina wearing a Red Cap/Hat/Coat is expected to purify humanity in the US, not a stretch to see this might be Santa Claus.

The US was predicted 400 years ago in New Atlantis: A work unfinished to be the Phoenix of the New Age; a Dark Winter? They predicted in 2021? It failed.

The last Cathar Perfecti Guillaume Belibaste was executed in fall 1321 predicting, in 700 years, the laurel will grow green again.

UN Peace and Security Guardian is to protect Central American replacement immigrants from Aztec lands taken from Mayans.

How interesting is that line?

MEChA, La Raza Unida, Voz de Aztlan encourage with US Government help the re-capture of Aztlan, which is, Arizona, New Mexico, southern Florida, southern 1/2 of California, west Texas.

The Aztec god Tezcatlipoca is the god of Providence; Providence means a God conceived as the power sustaining and guiding human destiny, the question is, which god?

Tezcatlipoca means smoking mirror, indeed.

Puritans justified the wholesale slaughter of Native Americans to the god of Providence.

Human sacrifices are offered to repay the Debt; foreign invaders in the Americas have racked up an impressive \$700T Debt so a lot of heads will roll.

Tezcatlipoca is also the god of invisible Darkness and the Ruler of the North, represented as Ursa Major, aka Big Dipper circling the Dragon Draco.

Sacrifices by Jaguar Priests were on a Cuauhxicalli the Eagle Bowl decorated as Jaguar/Eagle like the UN Idol.

Hopi Prophecy Rock depicts the story of humanity dividing; the Red Kachina will remove his mask before the uninitiated at the Plaza; that would be 777 UN Plaza.

In charge of the US-Mexico border during the Trump Administration was Chabad Lubavitch puppet Jared Kushner, Kushner means Furrrior, the type of fur Jacob used to impersonate his brother Esau; Kushner voted 8 years as a woman, so this is quite the impersonation.

In charge of the US-Mexico Border during the Biden-Harris Administration is Kamala Harris, Benghazi born Kamal Aroush also impersonating a woman, and the unconstitutionally selected VP by the Canadian based Dominion Voting.

Part of the Hopi life and positions that includes them doing certain task is called a Jaguar Priest, oh my a cat Cohen!

Here is the Jaguar Priests' Job Description from Book of the Jaguar Priest: To impersonate and invoke the deity, to offer food and drink to the idols.

Invoking the deity is the spell casting and encouraging walk ins.

To effect the drawing of the pebbles and regulate the calendar, to read weather and other omens in the clouds.

To study the night sky and interpret the appearance of the celestial bodies.

To determine the lucky and unlucky days for various mundane activities by the casting of lots.

To perform the numerous rituals of the cup, plate, etc. to work miracles and to concoct medicinal herbs into ceremonial drinks.

To predict the future, to announce the times for various agricultural and other activities, to insure adequate rainfall, to avert or bring to a timely end famine, drought, epidemics, plagues of ants and locusts and earthquakes.

To distribute food to the hungry in time of need, to cut the honey from the hives.

To determine the compensation to be placed on the crossroad altars, crossroad altars is the decision to decide what to sacrifice for the deity.

To read from the sacred scriptures the future road of the katun which is known as the calendar round.

To design and supervise the carving of stelae [stone monuments], the manufacture of wood and clay idols, and the construction of temples.

To construct tables of eclipses and heliacal risings of planets, such as are found in the Dresden Codex, which was originally an off-world book or instructions.

Quite a detailed list of tasks there.

Given the Maya had all this knowledge, and obvious connections to off world entities, add in the knowledge recently acquired that the Hopi mated with the ant people.

One has to ponder and ask the question, are tribal people originally from here at all?

The evidence within our own series, From his story to our story begs the question, add in the Cosmic Genetics series for more evidence.

You could then throw in the EBE from our Events that changed the world series, where he spoke of the tribal people in glowing terms in the past, and the questions that arose from that series, who are the hybrids and what is their purpose here?

If they can mate with an off world species that is not humanoid, this then begs the question, are they native at all?

That may upset some people, indeed all the tribal people, but the question based on the evidence compiled, does engineer the questions to be asked.

Prophecy Rock

The end of Hopi (Chaldean) ceremonialism will occur when Blue Star appears and Red Kachina removes his mask during a dance in the Plaza before Uninitiated children.

Chaldean was a pointer because it came from Babylonia, linked with Abraham, the tribal capital Dur Yâkin was the original seat of Marduk-Baladan.

Chaldea came to be used in a wider sense, of Mesopotamia in general, following the ascendancy of the Chaldeans during 608–557 BCE.

Unlike the East Semitic Akkadian-speaking Akkadians, Assyrians and Babylonians, whose ancestors had been established in Mesopotamia since at least the 30th century BCE, the Chaldeans were not a native Mesopotamian people, they were a nomadic tribe, sound familiar?

This is especially the case in the Hebrew Bible, which was substantially composed during this period (roughly corresponding to the period of Babylonian captivity, which is a major pointer right there.

The Book of Habakkuk calls them that bitter and hasty nation.

Book of Isaiah states, behold the land of the Chaldeans, there was not such a people, the Assyrian founded it: they have led away the strong ones thereof into captivity, they have destroyed the houses thereof, they have brought it to ruin.

Jared Kushner was awarded the Aztec Order of the Eagle Warrior 2018.

Kushner is a Chabad Lubavitch ie Chaldean pawn in charge of the US-Mexico invasion of Aztlan, Aztlan like Aztec means to make white or pure and Deal of the Century, but it is not the white in relation to color of the skin.

With the plan to install the Antichrist on Satan's Seat next to the Abomination of Desolation on the Temple Mount in Jerusalem.

What a holy name that is? Not – the Abomination of desolation is a phrase from the Book of Daniel describing the pagan sacrifices with which the 2nd century BCE Greek king Antiochus IV replaced the twice-daily offering in the Jewish temple, or alternatively the altar on which such offerings were made.

Kushner means furrier, the fur Jacob used to obtain his father Isaac's blessing intended for Esau, who had previously sold his birthright to a Covenant with God, in exchange for a bowl of red lentils; I guess he was a hippy then, for this God renamed Esau, Edom meaning Red.

Hopi Shaman teach that, red men were granted permission to hold in trust all land for Great Spirit; well fancy that!

It is not Native American red they refer to; it is the tomato red skinned Pleiadean's.

In the scripture Genesis it says the same thing; Esau is prophesied to obtain dominion over the Earth.

British is B'Rith-ish which means a Birthright Covenant.

That being Cain, Ishmael and Esau, the brothers who abrogated the Covenant with God are called the Blue Bloods, the Elite and the Aryan Noble Caste, who indebted the world through Usury and War by being false Priests and Shaman.

In 1918 Spanish Flu broke out in German trenches from vaccinated US Soldiers, after Woodrow Wilson had promised would stay out of the War in Europe.

Prophecy Rock is called the Life Plan.

Earth shaking, disease and dying are prophesied at Prophecy Rock, located in Oraibi, Arizona near the 4 Corners, called the Land of the Hopi, represented by the Square, the heart of Turtle Island.

That prophecy or indeed the seat of Solomon or the Bennu bird located there, is no more.

So, they can all go on prophesize on that all they like.

Aztecs views the Cosmos as Turtle Island; the United Nations is the Crown Jewel of Turtle Bay, New Amsterdam, which is now New York.

Turtle Bay was originally called X City; X=Chi=Messiah; the Cross Saltire used by the Knights Templar, the International Usury Bankers and Knights of St John of Jerusalem Hospitallers.

Hospitaller back then meant crimes against the people, just like now.

Prophecy Rock sets the Aztec plan in sandstone, not anymore it doesn't.

The Swastika is the oldest post-Flood symbol called the Broken Sun Wheel; Saturn is the Black Sun or Primordial Sun meant here; Hindus call it the Good Luck Jain Cross.

Originally a Celtic Cross or Circled Cross, representing the 4 Quartered World now Broken and in need of repair by killing everyone in Covenant with God; Cain was not in Covenant with God! Nazi Knights of the Black Sun or SS used the Swastika; Rabbis call this Tikkun Olam repair the Earth to pre-Flood conditions when Cain and his offspring ruled the World.

It is was not exactly great pre-flood either, the problem is the entities who run the programs.

Cross Saltire:

At the end the line is the Black Cross Saltire (X) of the Knights of Malta known as the Sovereign Military order of Malta, Hospitallers or Knights of St John of Jerusalem.

A blood oath sworn servants of the Jesuits, Jesuits are the Militia of Zeus, son of Saturn and the Primeval Black Sun.

General Black Pope Adolfo Nicholas, SMOM Grand Commander Mathew Festing resigned amid a dispute with the Vatican and Pope Francis in 2017, and Nazi Emeritus Pope Benedict XVI are attended the 2018 World Economic Forum in Davos with Donald Trump.

If Trump was who he was made out to be, he would not have gone to the Davos clown forum.

Note: Pope John Paul II re-instated the Office of Inquisition under Cardinal Ratzinger who became Pope Benedict XVI, as well as openly carrying the Gnostic Twisted Crucifix, which is a symbol of God, rejected and crucified on the Sacred Tree Tau.

Hopi doorways symbolized the Tau which is the Yahweh Mark, Yahweh=YHWH=Saturn as the Egyptian Ankh of Isis-Osiris.

The origination of this Tau is Chaldean, a symbol of Resurrection in Saturnian religion.

The Knights of St John worship Oannes the Chaldean/Philistine Sea Beast, which is likely another name for the Leviathan.

They were and are Gnostics who worship Saturn and the Golden Age of Aquarius aka New Aeon of Horus.

Gnostics place importance on water baptism, Knight of Malta Donald Trump always uses this water symbol.

St John is an occult combination of John the Baptist and John the Evangelist called St John the Divine.

St. George aka Arab al Khidr is the Knights Templar Green Man, who slays the Dragon at the United Nations Plaza; St. George cuts Satan's head off in Cancer June 21-July 22 at the Peace Fountain (Shalim is the Canaanite god of Peace) in front of the St John Divine Cathedral in NYC.

777 United Nations Plaza is the United Nations Interfaith Church at Turtle Bay.

Liber 777: and other Qabbalistic writings of Aleister Crowley may ring a Baal, do what thou wilt shall be the sum of the law.

Which is exactly what these parasites have done, laws as we have all found out, do not apply to these special ones, and by special I mean special short bus variety.

The Great Spirit:

The White Brother Pahana; Hopi Shaman call this Maasaw the Great Spirit or Tawa, symbolized by the Tau or Sacred Tree; this is the Tree of Knowledge of Good and Evil worshipped by Gnostics; Kaballah is called the work upon the Sacred Tree.

The Mormon Christus Statue in the visitor's center is also White Brother who comes to Earth at the Day of Purification; the Mormon slogan white and delightful may ring a Baal.

Cathars were Gnostics called the pure ones, their Priests/Priestesses were known as perfecti.

America was founded by the Order of Perfectibillists; Cathars by another name is called Theraputae.

America is named after the Druid knowers of the Sacred Tree America; Cathars the Church of Amor (Love); Amurucu means Land of the Serpent; the Serpent in the Tree of Knowledge to be precise.

Hopi who are Aztecs by another name, refer to the Americas and the Earth as Turtle Island; Aztec like Aztlan means to make white or shine.

Which is nothing to do with skin color, as will be revealed.

Theraputae of Pergamon intend to install Satan's Seat in the 3rd Temple in Jerusalem; this is the real purpose of the United States, a Corporation beholden to Gnostic Bankers.

The Blue Star:

The White Brother arrives with the Blue Star; this being Sirius the Blazing Star of Freemasonry, aka Star of Isis Arabs and Muslims call Sirius al Qalb; Mormons call Sirius Kolob Qalb means heart, which is another name of Baal.

The origin of intentional activities and deeds; the source of true knowledge, immortal cognition and the rational Soul in essence, erm not quite.

Sufis (Mystic Islam) regard Sirius as the God Consciousness; wrong God folks!

Sirius, the Star of Isis means throne; the Throne of Zeus in Berlin is Satan's Seat standing next to the Quadriga of Apollo aka 4 Horsemen of Revelation 6; Saturn is the 6th Planet after all!

Zeus the throne of darkness and Apollo known as the God of light, is symbolic of the battle we all undertake of the balance between light and dark.

Kachina is called Saquasohuh, Zeus, Horus, Tammuz by another name who removes his mask in the Plaza before the un-initiated; the Plaza is at 777 United Nations Plaza at Turtle Bay.

Jesuits known as the Militia of Zeus is one example of masked 5th column traitors about to remove their masks, and unveiling the 5th Force Quintessence.

The White Brother is depicted as a man with a staff, a Priest-King or cohen separating the Elect, willing to ascend, from those who refuse.

The Cult of Saturn are called Melchizedeks; the White Brother will appear as a Melchizedek.

Jesus or Jeshuau was a Melchizedek; this Priest of the most high and King of Jerusalem is the Priest of Saturn, and the King of the Canaanite Shalem the god of dusk, and Sabian/Arab/Jebusite brother of Shahaar the god of dawn; the union of dusk and dawn is the Divine Union seen in the name of Lucifer.

Lucifer is the white brother the Hopi are awaiting his return.

Project Blue Beam will usher in the Antichrist the Blue Kachina using the Ionosphere, the real source of the + symbol; a giant TV Screen full of deception to include the Jesuit inspired Rapture.

That will not be happening either.

Hopi Shaman tell their deceived followers they will be the Elect, flown to planets for the Day of Purification in Earth in ships without wings.

Knight of Malta Nic Cage starred in the movie Knowing accurately predicting the Deep Water Horizon oil spill a year in advance; a disaster also seen in the short video I Pet Goat II as well as in Hopi Prophecy when the sea turns black and the fish are dying.

Like I have said many times, there are no prophecies only plans of the psychopaths, who see and plan those types of events as something to do for their own amusement.

In numerology 777 represents perfection on 3 planes: Physical, Astral and Spirit.

777 is the gematria of I am the resurrection; In the beginning God created the heavens and the earth; the Orthodox Messiah, The Orthodox are Oriental for example the Rising Sun which is Saturn or the Black Sun.

Filled with Light is the Hopi Day of Illumination, I expect they had a differing illumination recently.

The French word exorcist, France and the Merovingian Franks mean free of God; the Exorcized Spirit here is the Holy Ghost, followers of Jesus Christ, baptized by the Holy Ghost/Spirit.

The great question is, which Jesus are they following?

Hopi Great Purification Prophecy:

When the Blue Star Kachina makes its appearance in the heavens, the Fifth World will emerge on the Day of Purification.

We are in the days of purification unbeknown to them; it is called the higher frequencies and a better qualitative and quantitative state of energies and frequencies.

That we will see those of the Dark Forces vanish entirely.

The Aztec 5th Age, in Theosophy the 5th Root Race begins with the arrival of the Blue Star.

It is my understanding we have already had the 5th Age, we are going into or on the 6th Age of man.

The great pondering question is, are the Hopi in league with rogue off world entities trying to loop things back into the end of the 4th age, and replay the 5th again?

Well, they can try, it will fail.

Zeus, Jupiter, Marduk or Planet X, the son of Saturn is Blue Star; Tekhelet Blue is the Canaanite Blue color of the Priesthood in Israel symbolized by the Six Pointed Star of Saturn, which is also the Alpha Draconis battle flag.

Blue is the color of the World Health Organization and the United Nations, and is the color of the off world programs and technology.

Like Blue Beam, Blue book, Project Blue and the alt media mind meme of distraction, the Blue Avians.

The arrival of White Brother and Blue Star is accompanied by disease, great dying, earthquakes and the World rocking to and fro.

After Blue Star arrives, the White Brother dressed in Red Cloak and Cap, the Purifier will remove his mask in the plaza before the Uninitiated and the true White Brother Pahana will be revealed.

White Brother is Lucifer; the White bearded Jesus the Mormon Christus.

The Red Cloak is Esau who sold his soul and was renamed Edom meaning red; the mask is Edomites pretending to be Jews, as Jacob once pretended to be Esau in order to obtain his father's blessing.

What an interesting line that is, the masks and the fake Jews.

Perhaps we ought to consider are they playing out the Blue and Red Kachina now, because their Lucifer or any other fake god has not returned.

Disease and great dying is unfolding, earthquakes too courtesy of off world weaponry, and in real terms the world is rocking to and fro, as too few understand what is going on or what is playing out.

Is this time period their re-enactment of a fake prophecy going live, I suspect it is, why? Because they are desperate and they are losing badly.

They cannot stem the tide.

Corona means Crown; Corona virus is a patented man-made Bio-Weapon being released from Wuhan China, the same city the Mongols transported the Bubonic Plague from 666 years ago.

The descendants of Khan the Cohen, involved in the bubonic plague, maybe they had access to a gas or poison as well, as that would explain how they killed 1.75M Iranians in a single day.

The mention of the term uninitiated and how you will want to be uninitiated, is that a reference to the jabs?

Something to ponder on and prevent it doing any more damage.

ENDING PIECE:

Looking at the news these days as a massive confirmation of previous disclosures and revealing's within our own show.

In particular the predictions, those predicted on January 1st, all unfolded before Easter.

So, let's have a recap to end this show shall we.

First off I stated back in 2014 that CERN was inoperable for the real plan they built that machine.

MSM denied there was a problem, and yet this week they announce they are planning to fire it back up again, which confirmed it was down for 8 years.

Firing it back up again will still not bring them their end result, no matter how many words and fear porn they put out about it.

I notice many in the alt media are talking about it again, at which point do people stop buying their fear programs?

In 2015 I warned of a global virus they were planning, Zika is a strain of it, Zika was the full on zombie virus.

Zika failed but they came back with Covid in a time of the day, not the night of svarog.

All of which means more people will see it.

In February 2019 I warned of a food issue I suspected they were planning, having warned about Bill Gates previously.

The food shortage is now in all countries, particularly the Western world.

They blame delivery, Covid and supply issues, but it is all bs, it is and was a premeditated plan.

In 2018 and earlier I warned of water shortages in the US, particularly on the western side, that has and is unfolding and why we came up with a solution for it.

In June 2019 I warned of a coming bank decentralization, and how it would collapse.

Out would go all banks and replaced with a super central bank.

Out would go millionaires and low level billionaires in a power grab by the ultra-rich El-ites.

In would come crypto tokens, and all that is unfolding.

I warned of the spying of phones and how they were going to use them for banking and monitoring.

Now they have added Covid monitoring, the next is personal carbon allowance.

You will own nothing and not be happy, but be app-y.

Apps are the worst thing for everyone, filled with backdoors, monitoring and outright spying techniques, not to mention the datamining aspect.

In 1996 I warned of political correctness turning people against each other.

Word salad games that borders on, actual it doesn't border on it is kindergarten level word games.

Now we have had to create a coming together of the colors to counteract the MSM and thinktank clowns.

In 2015 I warned of the masks coming down, and how people had to correct their own masks of illusions, before most would see.

The masks came down and the medical and bot fraternity added a new one, that far too many to this day still wear.

In 2015 I warned of the split of the two worlds, a change in frequency that would leave many missing.

That is and has unfolded, the evidence now is all around you, if you observe.

In 2014 I warned of the coming caliphate initiated by the Is Ra El junta.

The wars since have confirmed that, and don't forget Trump handed them the Golan Heights in his Cyrus role.

In 2019 and sooner I warned of them replacing Governments, with a central one world government ran in Israel.

Look at the turmoil many governments are in, just recently there are major issues in America, Canada, UK, France and even Israel, plus others.

Just today Boris Johnson & Johnson resigned at the aptly timed 9.11 on 7/7/22.

THI members are ahead of the curve in so many ways, many of you in other groups have commented on the gulf in knowledge.

But, this is not the time for pats on the back and congratulations, we have much work to do, that I suspect many of you have yet to fully grasp the importance or the enormity of it.

The time to focus on charting our own path is now, they will carry on creating fear and division programs, distractions and false flags, because that is all they are capable of.

They are rendered mute to people who don't buy into their programs anymore, but clowns will always be clowns and continue to play their games and the fool.

Observe them, don't absorb them is the lesson, the truth and the answer.

If we do our part they will disappear just like the Georgia Guidestones did yesterday, oops.
