

THI-SHOW TRANSCRIPT 2022-12-22

NEWS: Shirley Eikhard, songwriter of Bonnie Raitt's 1991 hit "Something to Talk About," has died at 67, her publicist announced on Thursday (Dec. 15). Drew Griffin, CNN's Senior Investigative Correspondent, died Saturday. He was 60. Stephanie Bissonnette, a dance teacher and choreographer best known for her performance as Dawn Schweitzer in the Broadway musical Mean Girls, died Saturday following a long battle with brain cancer. She was 32. Terry Hall, the front man of socially conscious ska band The Specials, has died at the age of 63. The Director of Parliamentary Affairs at Health Canada, who oversaw the country's response to Covid-19 and the rollout of the vaccine, passed away unexpectedly at the age of 35. Adam Exton, a long-time Liberal Party organizer, died suddenly on Friday, December 9th, according to his family. Interestingly, there was no press coverage of his death and the cause of death was not disclosed. Tom Browning, a legendary Cincinnati Reds pitcher was found dead by police on Monday, aged just 62-year-old. Respiratory issues. The Primal Scream keyboardist Martin Duffy has died aged 55. Soap opera star Sonya Eddy, best known for playing Epiphany Johnson on General Hospital, has died at 55. It is increasing.

Fox News and Fox Business correspondent Hillary Vaughn promoted the latest Twitter Files dump at a White House briefing, claiming it showed the FBI was involved in suppressing the Hunter Biden story. Altogether now – well I never!

Drones used by Ukraine to attack targets in Russia were produced by an American company based near Phoenix, Arizona, investigators have reportedly found, claiming that Poland was also involved in their deployment. The findings are contained in a document and said the unmanned aerial vehicles had been identified by their electronic components and other parts. The original maker of the drones was identified as Spektreworks, a company based in Scottsdale, Arizona. The final assembly and in-flight testing of the UAVs took place at the Rzeszow Airport in southeastern Poland, which the US and its allies use as a hub for supplying weapons to Ukraine, the investigators claimed. According to the report, the data confirms that the US and Poland are directly involved in organizing terrorist acts on the territory of the Russian Federation and are de facto parties to the armed conflict between Ukraine and Russia. All of which makes a mockery of the report last week when US national security council spokesman John Kirby, was proclaiming Russia is being supplied by Iran and how dangerous it is. Well, Ukraine is being supplied by American taxpayers money again, but apparently the deaf, blind and frankly stupid at the national security council can't see that, that is just as dangerous it seems.

Personally in some ways this is hilarious, in other ways bizarre and a PR stunt and finally an admittance by the clowns this didn't work out like they wished. Urgently negotiating an end to hostilities in Ukraine would prevent another world war, former US secretary of state Henry Kissinger argued in an essay published on Friday. Kissinger trying to end war, when him and his ilk started it? I guess the shekels are not coming their way in the right numbers. Kissinger noted

that, in 1916, the US government had the chance to end the First World War through diplomacy, but missed it for reasons of domestic politics. Kissinger laid out his reasoning in the December 17 issue of *The Spectator*, describing the current conflict as a war in which two nuclear powers contest a conventionally armed country, a clear reference to Ukraine being a proxy war between the US and Russia. It only became a proxy war because the US thinks it can goosestep over every other country, supported by the 5 eyes alliance, NATO, Mossad and Israel. The peace process Kissinger proposes would link Ukraine to NATO, however expressed, as he believes neutrality for Kiev is no longer an option. He also wants Russia to withdraw to the lines before February 24, while the other territories Ukraine claims Donetsk, Lugansk and Crimea, could be the subject of a negotiation after a ceasefire. That is not a peace process, A: Ukraine in NATO was part of the original problem and B: those three regions have been democratically voted to be under Russian governance. In addition to confirming the freedom of Ukraine, the arrangement would strive to define a new international structure, especially for Central and Eastern Europe, in which Russia should eventually find a place, he explained. That is a complete non-starter either, remember Stalin and Roosevelt trying to divide up the whole of Europe between them? This is the same proposal, and some-how they will fit Russia in eventually? Do they really think Russia are as stupid as American Generals? It is their country let's not forget, as is all the istan and Baltic states as well. This is the same proposal Kissinger had first floated in May, for which he was labeled an enemy of Ukraine and added to the notorious Peacemaker kill list. In an interview earlier this month, Ukrainian President Vladimir Zelensky categorically rejected any sort of ceasefire that did not take Kiev's claimed 1991 borders as the starting point. It was also unclear whether Moscow would accept any Western-mediated ceasefire at all, after former German Chancellor Angela Merkel's admission that the 2014 Minsk armistice was intended to give Ukraine time to prepare for war. Russia sent troops into Ukraine on February 24, citing Kiev's failure to implement the Minsk agreements, designed to give the regions of Donetsk and Lugansk special status within the Ukrainian state. The Kremlin demanded that Ukraine officially declare itself a neutral country that would never join any Western military bloc. Kiev insists the Russian offensive was completely unprovoked. Ukraine and their Jewish backers plus NATO caused the war with their totalitarian creep tactics, let us not forget that. That has cost the US taxpayers over \$100B to date, which could have been spent on improving American people's lives.

This piece was sent to me last week and couldn't fit it into the show. About some clown based webpage, that is right out of a Zionist Fascist manual and their WEF clown and climate programmers. It is called c40.org

The C40 is a public-private partnership between the 40 largest cities in the world in cooperation with: The World Economic Forum, the World Bank who we referenced last week in the Hudes piece. Bloomberg and Rockefeller etc. in a commitment to reduce the carbon footprint of cities. Remember to these clowns, we are the carbon.

Without your consent, or even your knowledge, the City of Phoenix plans to implement policy that will attempt by 2030 to:

Eliminate meat from your diet, limit the amount of food you eat, the first two were previously mentioned by Be-ill Gates, eliminate private ownership of a vehicle mentioned by Schwab with; you will own nothing and be happy. Eliminate your ability to travel by air and eliminate your ability to buy new clothes and your allowances restricted to 3 pieces per year. What a load of jackasses and jackassery that is. To think that a group of people, I use that term loosely would sit down and come up with a manifesto like that, is beyond senile. Is that all the experts have to offer? More Zionist based Fascism? Is that the sum total of their plan? But this also reveals the lack of money supply that this system is built upon. Because these people are generally all about making us spend our money at their establishments, what will happen to the shekel people? Remember in Clowns in Panic I warned they would harvest their own? The lower end greed-based peoples, the high millionaires and low billionaires would be taken out. Given most of the world's cars are owned in the Western world, what will that do to their economies? Just like the Soros Foundation and his ilk have planned all along, the destruction of the Western world and the white race people would be affected the most. All of which is bubbling up nicely I feel for the Blueprint.

Donald Trump has been mocked for vowing to make a major announcement while comparing himself to a superhero. In typically boisterous fashion, the former president said he will be making an announcement on Thursday, December 16, without giving any further hints as to what it could be. In a post on Truth Social, he declared in a video: America needs a superhero while sharing footage in which he makes the same remark as he builds up the announcement. The clip ends with a mock-up image of Trump pulling open his shirt and jacket to display a red costume and a "T" logo underneath, similar to Superman's famous pose, while standing in front of Trump Tower with lasers shooting out of his eyes. Very embarrassing that, it would help if the man was self-reflective, he is not. Thinks the world should rally around Donald Trump, it doesn't. I find it all very sad the lengths people will go to get recognition. Like his former sidekick, they don't know when to speak or not, what to say in the right manner and timing, and up end up delivering speeches and words to what they think elevates them, it doesn't and it won't. Those times have passed, but some will not let go of the fame. The fame became the flame, and like smart burns or stings you.

A CNN investigation reveals the Iranian government is accessing the social media accounts of activists to use as evidence against them. The obsession with Iran and finger pointing away is beyond pathetic at this point. How about CNN do the American Government, along with Google, Yahoo, Facebook, Twitter, CIA, NSA, DHS and FBI are all using social media accounts on Americans to target or ban them? You wish to know how and why CNN know this story? Because most of the activists in Iran are employed by those I have just mentioned. Which is why Iran is investigating it and them.

Clearly they are struggling in the MSM to provide news to fulfill their 24/7 propaganda, and so they go about generating their own news pieces, as this piece will attest. A lot of people on social media, including the son of former President Donald Trump, are raising their eyebrows at the New York Times after the paper published a crossword puzzle that included a pattern of black squares that form a fairly clear shape of a swastika. Disgusting! Only the New York Times would get Chanukah going with this is the crossword puzzle, Donald Trump Jr. wrote on Twitter. Imagine what they would do to someone who did this and was not ideologically aligned with them? I'll give them the same benefit of the doubt they would give those people, exactly zero. Interesting piece of a none interesting story, Trump Jnr was right though, they would have pilloried anyone else, in fact do so often in other falsely created narratives surrounding the Jewish narrative. How do we know it was falsely created? Because at the bottom of the piece there was a survey. How likely, if at all, are you to discuss this news report with family, friends, or colleagues? Clear evidence of data mining and to see how far they can push fake news. What this piece revealed was, that will be lost on most people is, the swastika symbolizing German Nazis, was actually National Zionists corrupting the natural clockwise ancient symbol of the sun. The anti-clockwise they used, not only gives them away, but is the Black Sun elements who ran the SS. Thanks to the New York Times for revealing the truth, albeit in cryptic fashion.

MEDICAL: The Zionist Fascist of New Zealand or is it New Zionland, are at it again. New Zealand will phase in a near-total tobacco ban from next year. Legislation passed by parliament on Tuesday means that anyone born after 2008 will never be able to buy cigarettes or tobacco products. It will mean the number of people able to buy tobacco will shrink each year. By 2050, for example, 40-year-olds will be too young to buy cigarettes. Health Minister Ayesha Verrall, who introduced the bill, said it was a step towards a smoke-free future. Thousands of people will live longer, healthier lives and the health system will be NZ\$5 billion (US\$3.2 billion) better off from not needing to treat the illnesses caused by smoking, Dr Verrall said. New Zealand's smoking rate is already at historic lows, with just 8% of adults smoking daily according to government statistic released in November - down from 9.4% last year. It is hoped that the Smokefree Environments Bill will reduce that number to less than 5% by 2025, with the eventual aim of eliminating the practice altogether. The bill is also designed to limit the number of retailers able to sell smoked tobacco products to 600 nationwide, down from 6,000 currently and reduce nicotine levels in products to make them less addictive. What happens when the deaths increases, what will they blame it on then? And will they realize they were wrong? As the US is legalizing drugs, NZ is banning cigarettes, ponder on that level of madness. Perhaps Ms. Verrall needs to read a bit, instead of promoting wrong assumptions?

Of the 100 studies from around the world, 87 of them show a statistically significant reduction in SARS-CoV-2 infection risk among current smokers as compared to non-smokers. Seven of them found no statistically significant association either way and two of them found mixed results. Four of them found a positive association between smoking and infection, although three of these looked at people with a genetic propensity to smoke rather than at smokers themselves. The studies used

a range of methodologies. Very few of them set out to look at the effect of smoking specifically, but epidemiologists tend to ask people if they smoke as a matter of course and so the association kept popping up. Some of the studies looked at specific outbreaks of Covid-19, such as on a French aircraft carrier. Several of them looked at healthcare workers, one from Germany and one from Chile. Others looked at groups of hospital patients, such as psychiatric patients in New York or HIV patients in South Africa. A large number of them used seroprevalence surveys to see who had antibodies and, therefore, who had been infected in the past prior to the vaccines. The findings are remarkably consistent, with smokers typically being 50 per cent less likely to catch the virus. Some of the researchers express surprise about this in the text of their study, others acknowledge that many other studies have found the same thing. Some of them discuss the possible biological mechanisms behind it, others do not mention the association at all. Some of them are clearly mortified to have reached a pro-smoking conclusion. Smoking cigarettes to ward off a respiratory disease does seem counterintuitive, I will grant you, and alternative explanations have been put forward. Some people have suggested that smokers spend more time outdoors, but this hardly seems likely to explain an effect of this magnitude. Besides, this study adjusted for time spent outside and still found that smokers were 68 per cent less likely to get Covid-19. Some have wondered whether smoking might be under-reported by embarrassed smokers, but this wouldn't explain it either, as several studies, verified smoking status with blood tests. Others have argued, slightly desperately, that smokers are more likely to get tested because they cough more, but this wouldn't explain the seroprevalence studies, nor the studies in which whole populations are tested at the same time. Biological mechanisms exist to explain why smoking could protect from SARS-CoV-2 infection. I don't pretend to be qualified to assess them, but the basic idea is that nicotine competes with the virus for the ACE2 receptor. The few studies looking at vaping have produced mixed results, but an intriguing study from the US found that Covid-19 patients who are smokers had better outcomes in hospital when given nicotine patches. One hundred studies, of which 87 per cent confirm the hypothesis, is a lot in epidemiology. If a similar body of evidence showed that smoking increased the risk of Covid-19 or any other disease, it would have been considered settled science long ago. Instead, the evidence of a protective effect has been ignored, downplayed and denied. The reason being is, smoking clears the back of your throat of bacteria's, which if built up can lead to disease. The smoking removes most of them, but science or medical people won't tell you that, as they have a readymade meme and thinking process provided to them by the establishment, and dare I say it, some of the off world creatures who don't like it. And no, I am not suggesting for people to smoke, that is your own free will choice. If you do, go natural tobacco, perhaps learn to grow your own? People go to great lengths to grow pot, I am sure it is cheaper to grow tobacco.

Well, I guess I am about to ruin something else, someone has to do it. The New Age cult, all about nature, love and light and organic items brought about a marketing opportunity for the shekel vultures. Whilst this may have started off with the right intentions, currently it doesn't. We can lie to ourselves that it is, carrying on taking their poisons and god knows what else they are putting into us these days, or address it and boycott their products. Major shifts are, and have been,

occurring in the supplement industry. Here's how they could affect your access. Over the last few decades, mega-corporations have been increasingly investing in the supplement sector, especially during the last few years, which has seen a boom in mergers and acquisitions. Since 2017, over \$20 billion has been invested in supplement companies by the likes of Bayer, Nestle, Unilever, Procter & Gamble and Clorox. Mergers and acquisitions in the supplement sector have surged: in 2018, there were 83 transactions; in 2021, there were 137. It's no secret why large corporations are moving in; the supplement market grew from \$28 billion in 2010 to almost \$60 billion in 2021. The bottom line is that many supplement brands you see on store shelves are owned by large corporations that traditionally do not deal in supplements. The question is, what does this mean for our access to quality products that support our health? First, what is a quality supplement? The quality of ingredients is the first marker of a good supplement. Poor quality supplements do not provide the right forms of bioavailable vitamins. They provide vitamin A as beta carotene instead of broad-spectrum carotenoids; vitamin E as synthetic dl-alpha tocopherol acetate instead of mixed tocopherols and tocotrienols; folic acid instead of folate; magnesium oxide rather than magnesium glycinate, taurate, malate, or chloride; ubiquinol instead of CoQ10. They can contain other ingredients like additives and fillers that some consumers will want to avoid. Not only are the ingredients of lower quality, they are less potent. Pfizer's Centrum Silver multivitamin, for example, provides only 60 mg of vitamin C, 3 mg of vitamin B6, 50 mg of magnesium and 19 mcg of selenium. Higher quality supplement brands sell products with higher nutrient levels. Instead of 60 mg of vitamin C, some brands have 500 mg and over 30 mg of vitamin B6 instead of just 3 mg. Companies investing in the supplement space are almost universally known for their products in other industries. Bayer is a pharmaceutical and biotech company, you may remember that they acquired Monsanto, the maker of glyphosate. Bayer is Rothschild's. Unilever is known for beauty and personal care products like Dove and Axe body spray. Nestle is a food company known for chocolate and sweets, and also for their CEO saying; water is not a human right. Procter & Gamble owns brands like Tide, Downy, Charmin, Head & Shoulders, Crest, and many, many more. And also sending family members to talk shite on the internet, whilst scamming money off of people. Nestle Health Science, a division of Nestle, bought Pure Encapsulations and Douglas Foods, along with a host of other supplement companies, including Garden of Life, Vital Proteins, Nuun, Wobenzym, Persona Nutrition, Genestra, Orthica, Minami, AOV, Klean Athlete and Bountiful. Bountiful itself owns Solgar, Osteo Bi-Flex, Puritan's Pride, Ester-C and Sundown, which are now all under Nestle's control. Otsuka, a pharmaceutical company, owns MegaFood and Innate Therapeutics; Schwabe, another pharmaceutical company, owns Integrative Therapeutics, Nature's Way and Enzymatic Therapy. Unilever owns Onnit, OLLY, Equilibra and Liquid I.V., and SmartyPants Vitamins. Wall Street is also getting in on the action, with private equity groups purchasing brands like Nutraceutical and Metagenics. A number of these brands are not the high-quality supplements sought after by savvy natural health consumers. OLLY, bought by Uniliver, produces gummies that contain added sugar and additional added ingredients like natural flavors. Nuun, a vitamin and hydration company, uses inferior forms of vitamins (folic acid and magnesium oxide) in their products. SmartyPants Vitamins is another company specializing in gummies that includes 7 grams of added sugar per serving. We also know that Nestle is developing

its own line of enteral nutrition products. They have bought medications for the treatment of Exocrine Pancreatic Insufficiency due to cystic fibrosis, chronic pancreatitis and other conditions. Several of these brands are higher quality supplement companies, such as Pure Encapsulations, Douglas Laboratories, MegaFood and Metagenics. What will happen to them now that they are owned by mega-corporations that have not historically had core natural health principles as the foundation of their businesses? We've spoken to several of the largest and highest quality brands that have not been purchased; they have confirmed that larger companies have made several unsuccessful attempts to purchase them. The pure greed of the EL-ites never ceases to amaze me, nothing is sacred with them and their concern for our health is zero. In my opinion these supplements were a racket from the off, and has helped too few people in reality. Just because they are organic, some other derivative or not part of the medical conspiracy, does not mean they work. If you trust yourself and body, the body tells you what you need, without supplements. The supplement industry is another placebo and the illusion of you are looking after your body, a feel good factor, but it is not supported by the facts is it? Because if all these supplements work, why are so many people sick? Why are hospitals overflowing? Does that make any sense? No, it doesn't, and so it is a program. The supplements is another of the external items, that masks the effects of the alleged shortfall, but it doesn't address the cause does it? The cause is their meddling again and stripping the foods with the processing, of vitamins and nutrients. Target the cause and rectify it, and you won't need to spend excessive amounts on supplements. Another thing to ponder on with these supplement manufacturers is, their scientists developed these, after the last 2 years, should we really be trusting medical related scientists?

The World Health Organization has published a video claiming that people opposed to the COVID jabs are anti-science and a major killing force. A classic agency based retort, accuse others of doing what they have done. Let's recap shall we, because the WHO and the media told us all, that they had jabbed most of the people, so how can a tiny minority in their words be accused of that? How is it that 90% of hospitalizations are the jabbed? How is it that most people who smoke are immune to Covid? The WHO has made this wholesale condemnation of anti-vaccine activists despite the fact that many people have been seriously injured or even died after receiving the experimental Covid jabs. It's a killing force, Hotez proclaimed. Anti-science now kills more people than things like gun violence, global terrorism, nuclear proliferation, or cyber-attacks. The scientist did not provide evidence for this dramatic claim. Like the media, let's just make bland statements and never support it with facts. Which is contrary to the anti-vaccine people, who provide a plethora of facts to support their case. I will accept we are anti-science, because most of their theories have been proven wrong, on so many levels. Over time the anti-vaccine activists will be seen as the world's saviors, that protected many people's lives. This is the same Hotez who attended Yale and was born to Jewish parents, says it all really.

SOCIETY NEWS: A record number of young adults in the US are currently living at home, and all that saved rent is sparking a luxury boom. Recent data from the US Census Bureau shows that nearly half of young Americans between ages 18 and 29 are living with their parents today. That's

a historical high not seen since the Great Depression era, the analysts stated. The analysts estimated that around 48% of young adults are living with parents in 2022, similar to levels seen in the 1940s. The levels of young adults living at home peaked at 49.5% around 2020, coinciding with the outbreak of the Covid-19 pandemic. The data came from a Pew Research Center analysis, USA Today, the University of Minnesota and Morgan Stanley research. Factors like high rental costs, enrollment in higher-education programs, and delayed marriage are also keeping young adults at home, the analysts wrote. When asked about the incentives to move in with parents, 51% of the young adults said that it was to save money and 39% of them said that it was because they could not afford rent, according to a December 5 survey from PropertyManagement.com. Similar themes are emerging across the pond in the United Kingdom, where about 42% of young adults lived with their parents in 2021. That's the highest level on record based on data compiled from 1996 onward by the Office for National Statistics and Morgan Stanley research. What are they doing with the extra money? Buying luxury items instead of investing in their future, all of which is the designed purpose of this program. Get them into a position where the system wants them, then introduce the sustainability models, which actually means you will own nothing and be happy, plus 100% total surveillance and control over your lives.

The divisive agenda people are back again, with the most ridiculous claims ever, but you see these people are only about making statements and accusations, and are rarely challenged to back up their claims. But this time they have, and again is proving people are not tolerating this rhetoric anywhere near what they used to. Now that Western virtue-signalers have successfully hoisted the LGBTQ flag over the World Cup, they have decided to turn their critical gaze to race. While the people of Argentina celebrate the success of their national team in Qatar, a writer for the Washington Post chilled the festive atmosphere by dropping a race bomb: Why doesn't Argentina have more Black players in the World Cup? What a ridiculous statement that is, if they are going to ask that level of questioning, why not ask why Israel has no black players, why not ask why Japan, Morocco, Saudi Arabia, Qatar and several others who took part in the World cup has no white players? Why not ask them questions? Because it doesn't fit the agenda is why. The response over Twitter from the South American nation was every bit as swift as it was devastating: Because we are a country, not a Disney movie, then stating, we are not going to allow any ignoramus to accuse our beautiful country of being racist. Cheap progressivism has no place in Argentina. That pretty much sums up the general attitude to the woke warriors who won't be happy until their divisive message reaches the four corners of the planet. The piece, authored by Erika Edwards, an associate professor at the University of Texas at El Paso, wasn't helped by the initial incorrect statement that roughly one percent of Argentina's population of 46 million is black. The Washington Post later issued a correction, saying it was an editing error and noting that while the number of black people cited was accurate, the percentage was actually far less than one percent and the piece has been amended to state that. In other words, there were just 149,493 Black people living in Argentina as of the 2010 census, and that figure alone should make it more understandable why the 26-member national squad is made up entirely of 'white' players. Who, incidentally, the Post writer goes to great pains to argue are not really white after all. But even if Argentina were a

country made up of 90% black people, why would it automatically be assumed as racist if no blacks were on the team? As in any profession, athletes should be chosen based on their individual merit and qualifications, not because they fill an equity quota. Finally, if the racial makeup of Argentina's national team has not provoked any questions from the people of Argentina, why must a professor from a woke university department in the US make it her business? Perhaps the most galling thing about social justice warriors is that they automatically assume that, what appears to be a problem for them, must also be a problem for the people they are examining from the safety and isolation of their ivory towers. All this does in the end is sow divisions between people where there are none. Nice to see them fighting back with facts, all of which they have no response to, because the true facts we published in FHSTOS Part 9 reveals it in stark clarity.

The House Judiciary Subcommittee on Crime, Terrorism and Homeland Security held a hearing Thursday on finding a solution to gun violence, and the difference of opinion between Democrats and Republicans was put on full display. Divide and conquer programs run on every level it seems, yet the public seem oblivious to it being ran on them. Republicans pro-guns and Democrats anti-guns, does that make any sense? Passions ran high given the sensitivity of the issues involved, as liberal lawmakers focused on weapons and conservatives on the people who use them. Rep. Louie Gohmert, R-Texas, a former judge who handled felony cases, was in the latter group and focused on the need to instill morality in people, citing Judeo-Christian principles. Oh dear, it is because of religion most people have used weapons. He went so far as to say it is the bedrock of the nation's founding principles, and that the effectiveness of the Constitution depends on it. We gotta get back to teaching there is a right or wrong or, I agree with everybody here, we're going to have to get rid of the Second Amendment, we're going to have to get rid of Freedom of Speech, we're going to have to get rid of freedom of assembly, Gohmert said. This Constitution won't work the way we are teaching children. Is that a Fascist manifesto or is it stating what we did in the Blueprint, the 4 Constitutions have to go and write an adult based new one, whilst teaching children new values and expanding their understanding of things and their intelligence levels? Gohmert then gave the floor to one of the hearing's witnesses, Jack Brewer. Brewer, a minister and the chair of the America First Policy Institute's Center for Opportunity Now, claimed in his opening remarks, that a significant factor in mass shootings is the home environment of the shooters. He cited a 2016 study that showed that out of 56 shooters, 18% grew up in homes with both parents. On the left side of the aisle, Rep. Madeleine Dean, D-Pa., scoffed at the ideas that mass shootings are caused by evil, children raised by single parents, mental illness or a lack of prayer. Really? she questioned. Where have we lost our humanity? Well said, you teach children division, you end up with divisive adults, which can lead some to violence. We lost our humanity due to becoming like them, we will make man in our image. Dean focused on the guns, saying it is a man-made problem that can be man solved. Interesting last line said there that nobody takes offense at, but imagine the woke and media if she had said; it is a women made problem and can be woman solved? All very selective of what they take offense at, is the point I am making. When Gohmert gave Brewer the opportunity to speak, he pushed back at Democrats' dismissal of his belief that family and morality have an impact. He reiterated the point that 82% of shooters cited in the study had no father at home. To

not look at that as a root cause to me is idiocy, he said. Brewer stated that many public school children are reading at levels that are several grades below what they should be, and blamed this on the students not having dads at home to hold them accountable. He said it makes no sense to ignore this. Again proving what we stated in the Blueprint. Go into the prisons and talk to the people who are pulling the trigger! Brewer dared. The minister then echoed Gohmert's claim that morality is part of the equation, and lamented that the Ten Commandments are not taught in schools and people do not have a fear of God. Why should anyone be put in fear of God? They have done that for centuries, it didn't stop the killing or violence, did it? The most recent story on a mass plot of violence, involved a Mormon churchgoer going to kill people in a synagogue. We are morally weak as a nation right now, he said. I agree, blame all the establishments for that, the Jewish led education program, the Jewish led governance, media, porn, foreign policy, medical and social media for all of that. Yet again they focus on the effect, the cause is religion. It is highly ironic, amusing and annoying in equal measure, of how they discuss solutions for these issues, yet arrive at the solution of what is a massive part of the problem itself. These people are asking us to accept the religion as the savior program, when actually it is a destructive program for the people, and it creates untold levels of violence and death. It shows that, these people we rely on to make decisions for us, really do not have a clue what they are saying or doing. Hamster wheel level discussions that go round and round, and no progressive or new ideas, all to keep us and them on the closed hamster wheel of life.

Here is a positive story and, in some ways, backs up our Blueprint on the future of teaching in classrooms. It's called College-Ready and Life-Ready.

It's not uncommon to end up in your mid-20s and wonder why you're missing everyday skills and how you got there. As helpful as Google and YouTube are, it would be nice to enter adulthood knowing how to set a budget, wash your delicates, and boil an egg without having to look it up. One high school is remedying this for their students with an Adulthood Day.

Lumpkin County High School in Georgia wants to teach its students life skills before they actually need them. Principal Billy Kirk believes that it's important to teach both academics and practical skills to prepare students for graduation. We're trying to teach kids real-life examples, so when they graduate, not only are they college-ready, but they're life-ready, Adulthood Day at High School:

Students were appreciative of the opportunity to learn these skills. Senior Grace Wikle is an accomplished student who is arguably college-ready.

But when it comes to a skill like changing a tire, Wikle said that she wouldn't have known what to do before her school's Adulthood Day. If she had gotten a flat tire on the way to school, she would have had to call somebody else, call my parents, whoever is on the side of the road. I was not prepared before today.

Part of Principal Kirk's motivation for hosting Adulting Day is that his own kids also needed to learn the skills to be independent adults. I have two boys who go to this school, I'm embarrassed to say if my kids got stuck in the rain today with a flat tire, they probably wouldn't know how to fix it.

On Adulting Day, Kirk invited professionals to teach the students a variety of skills, from performing CPR to cooking chicken. The professionals included cooks, plumbers, electricians, and mechanics.

Students acknowledged that they have resources like YouTube where they can look up how to perform these tasks. But they believed that it was more effective for them to learn the skills hands-on from a professional during Adulting Day. Who Should Teach Adulting Skills?

It might seem extreme for the school to take an entire day to teach basic skills to its students, and it raises the question of who is responsible for teaching kids how to change a tire and iron a shirt. No what is the extreme is, we have to create Adult days learning as something new, when this should have been implemented from the beginning.

Some might say that parents should be the ones showing their children how to do these things, and it might be ideal for students to learn adulting skills from their parents. But not all families have the time and space to teach them, yes because society has been created in a way were both parents are working, when 40 years ago it only required one parent to work to sustain most families. No matter who you think should be stepping up to the plate, it seems that Lumpkin County High School's Adulting Day was a success. Its students will graduate prepared to take on the world, and if there's something they don't know how to do, they can always consult YouTube. Or not, that is the whole point of this, children need to learn life skills, not pro pagan da and fake government politics. That school should be applauded for what they are doing, not making snide remarks the publisher made. Children not getting into adulthood and not being able to do much is the effect, the cause is a massively failing education system, that should be ripped up and started again.

EXPOSE: In 1799 the explorer Humboldt is paddling down the wild waters of the upper Orinoco, and sees, etched in the rock high above, an array of strange messages. Humboldt asks the natives what it means, their reply is so startling, he almost tips out of his canoe. 130 years later, Halil Edhem, Director of the National Museums of Turkey, is cleaning out debris in the Topkapi Palace in Istanbul. He comes upon the dusty fragments of an old map that was compiled by an Admiral Piri Reis in 1513, from portions of much older maps. Not until 1956, however, is the map subjected to a serious analysis. The Hydrographic Office of the U.S. Navy issues a statement and what it revealed was almost unbelievable. Just twelve years later, Richard Nixon arrives in China. A cultural exchange is initiated with America and interest is awakened in an ancient Chinese document, the Shan Hai King. Something which this old manuscript reveals is enough to rock you off your seat. All these seemingly unrelated events would come together with compelling force on

October 17, 1984. On that day, a meeting with the Jigsaw Team, five men and one woman were converging with results of separate investigations into some very strange recent discoveries. Phillip Corderoy was a cartographer; Denise Tagg a linguist; Paul Heron a mathematician; Jacob Wajsmann a keen student of prehistory; and Charlie Perch a Scotland Yard-trained detective who had turned to genealogy more from passion than from ambitions. Four days was spent, advancing the pieces each of us held of the jigsaw puzzle, then slowly keying them together until a clear picture developed, a picture which would prove more startling than any of us ever expected. Corderoy opened his briefcase, withdrew a sheaf of papers and produced maps, fourteen of them, all from the Medieval and Renaissance period. This one is the Zeno map, drawn in 1380. It showed accurately the outlines the coasts of Norway, Sweden, Denmark, Germany, Scotland, as well as the exact latitude and longitude of a certain number of islands. Yet the chronometer, necessary to determine longitude was not invented until 1765, which is why the readings of Columbus were all inaccurate. Nevertheless, the Zeno map is most accurate, insisted Corderoy. On the maps they notice, the topography of Greenland is shown free of glaciers as it was prior to the Ice Age. Unknown rivers and mountains shown on this Zeno map have since been located in probes of the French Polar Expedition of 1947-1949. A photograph was produced it showed a Chinese map on stone from 1137, formed on a spherical grid. And this is the Camerio map of 1502, which uses the same spherical grid. At this point one of the team said, in the Middle Ages they thought the earth was flat, are you certain these are not modern fakes? No chance of a mistake, was the reply and produced another map. He passed around another sheet, here's the Zauche map of 1737. It shows Antarctica free of ice in 1737, impossible was the reply as Antarctica's existence was not verified until 1819! Yet, this map not only shows Antarctica, but completely free of ice. It also shows not as one continent but two islands separated by a strait from the Ross to the Weddell Seas, a fact which was not established until 1968. Also shown are islands of the Mid-Atlantic Ridge, now known to lie on the bottom of the ocean. Next was show a map drawn in 1531 by Orontius Fineus, in which the dimensions of the Antarctic land mass correspond very closely to those on the best modern maps. The map indicates that the center of Antarctica was beginning to fill with ice when its source maps were drawn. It shows rivers and fjords in Antarctica, where today mile-thick glaciers flow. The next map was the Mercator chart of 1569; it depicts only the Antarctic coast left uncovered by glaciers. Questions were then asked saying; the events you're describing are Ice Age, cave man era and all that. Yet you admitted these are Renaissance maps, that's right. But I think you'll agree these particular maps are infinitely superior to the regular maps made at that time. It was then revealed that, many of the Medieval and Renaissance mapmakers admitted they were copying from sources whose origins were unknown. These maps are a scientific achievement far surpassing the abilities of the navigators and mapmakers of the Renaissance, Middle Ages, the Arab world or any ancient geographers. They are the product of an unknown people antedating recognized history. The next map, copied in 1559, The Hadji Ahmed map shows Antarctica and the Pacific coast of the United States of America with extreme accuracy. It also depicts the land bridge that once existed between Siberia and Alaska. The land bridge between Russia and Alaska in 1559, all of which proves our book FHSTOS, that the Indians in America are the Indians from Dravidia, now known as India. They are the Kali Ma disciples who came here and decimated the

Native tribes here, then mated with them to produce their own kind. A case of another genetic takeover of the Natives, just like the Hebrews with the whites. Andrea Benincasa map in 1508 was next, indicates that Northern Europe was being covered by the Ice Age glaciation's furthest advance. The Iehudi Ibn ben Zara map of 1487 showed remnants of glaciers in Britain, and the detailed profiles of islands in the Mediterranean and Aegean Seas, those islands are still there and yet now are under water. The Hamy King chart in 1502, indicates northern Siberian rivers emptying into the Arctic Ocean, but which are now all under ice. Which shows rivers flow North as well as South, because we view a map or globe in 2D, not 3D, we think rivers have to flow South, they don't, they flow with gravity and the path of least resistance. It also shows glacial actions in the Baltic countries. What are today huge islands in Southeast Asia are shown on this map joined to land, which they once were. That is the Indonesian region islands, a product of the closing of the Milk Ocean and the advent of the Himalayas. The map even shows an ancient Suez Canal. Ptolemy's map of the North depicts a glacial sheet advancing across south-central Greenland; and at the same time it shows glaciers retreating from northern Germany and southern Sweden. This all could only have come from the findings of surveying parties that tracked the areas before, during and after the Ice Age. During the Ice Age, according to the evolutionary theory, humans were grunting savages. You see how they have distorted our story, and produced his story only, none of which makes any sense, like the all out of Africa theory, yeah right, turn it in, the genetics are all different. All of which means that is not evolutionarily possible. The Gloreanus map in 1510, shows not only the exact line of the Atlantic coast of America from Canada to Tierra del Fuego, but also the whole length of the Pacific coast. The King Jaime World Chart in 1502, shows the Sahara Desert as a fertile land with large lakes, rivers and cities, which, at a remote period, it was. The off world built metropolis of enormous proportions lies under the sand there, once it is finally "discovered" there will be no illusion of, our we alone. This is a deliberate plan of the controllers, of ooh look what we found, when they know what was there before the fake discovery. A bit like Joseph Smith and his Mormon trekkers. Next was the Dulcert map of 1339, tracing from Ireland to the Don River of Eastern Europe; I tell you; this map shows precision beyond understanding. But Corderoy had the piece de resistance map and placed it on the table. This is the Piri Reis chart of 1513, he began, after its discovery Captain Arlington H. Mallery, an American authority on cartography, asked the U.S. Hydrographic Office to examine it. The U.S. Navy, through Commander Larsen, subsequently issued this statement. Corderoy took his notes and read to us, the Hydrographic Office of the Navy has verified an ancient chart, it's called the Piri Reis map, that goes back more than 5,000 years. A map that goes back 5K years? Oh my, that tips his story upside down again doesn't it? The map is so accurate, only one thing could explain it, a worldwide survey. The Hydrographic Office couldn't believe it, either, at first. But they not only proved the map genuine, it's been used to correct errors in some present-day maps, oops. Corderoy said; If ever there were a treasure map, this is it, it's crammed with priceless gems. It tells the story of ancient coast lines, as well as the surprising exploits of our ancestors five thousand years ago. Piri Reis stated that his copy was a composite from twenty ancient maps. This map showed the following features: 1. South America and Africa in correct relative longitude and latitude. Not only were the Caribbean, Spanish, African and South American coasts in correct

positions relative to each other, but even isolated land areas, like Cape Verde Island, the Azores, the Canary Islands, as well as topographies of the interiors, mountain ranges, peaks, rivers, plateaus. All were accurately positioned by longitude and latitude. 2. The coastline of Queen Maud Land in Antarctica. The islands and bays of the depicted coastline are the same as they appear below the Antarctic ice sheet, as recently revealed by seismic echo soundings. Pictured in great detail are regions scarcely explored today, including a mountain range that remained undiscovered until 1952. Interestingly, the map shows two bays where the modern seismic map showed lands. However, when the experts were asked to check their measurements, they found that the ancient map was correct, after all. One thing was crystal clear. Either somebody had mapped Antarctica before the ice cap covered the continent, or else the ice-covered continent was mapped with very sophisticated instruments. 3. The Isle of Pines, Andros Island, San Salvador, Jamaica, the mouth of the Amazon and the island of Morajo are all correctly shaped and perfectly located in latitude and longitude. 4. A major error appeared to be Greenland, shown as three islands. But during the International Geophysical Year it was proved that this correctly represented the state of affairs about 3000 B.C. 5. Every mountain range in northern Canada and Alaska was recorded on this ancient map, including some ranges which the U.S. Army Map Services did not have on their maps. But the U.S. Army has since found them. 6. The ancient source-maps were drawn using a circular grid based on spherical trigonometry, with the focal point situated in Egypt. The copied Piri Reis unfamiliar with circular projection shifted and spliced the original grid to compensate for the curvature. Any modern spheroid projection on a flat surface would cause the same distortion. Corderoy pressed the point, was this not compelling proof of the map's validity? Clearly it came from an advanced ancient technology and its grid system is similar to air navigation maps. Even so, we cannot know how many times it was imperfectly copied. The Piri Reis map projection was based on an overestimate of $4\frac{1}{2}$ degrees in the circumference of the earth. Only one geographer in the ancient world had made that overestimation: the Greek Eratosthenes. When the Piri Reis map is redrawn to correct the Eratosthenes error, all existing longitude errors on the map are thereby reduced to almost zero. This can mean only one thing, the Greeks who mapped according to Eratosthenes' circumference, had before them source maps which had been drawn without that error. Thus, the geographical knowledge on which the Piri Reis map is based, ultimately originated not with the Greeks but with an earlier people who possessed a more advanced science of mapmaking than even the Greeks. What this means is that while Greece and Rome were developing new civilizations, the vestiges of an older one, seemingly worldwide in scope, was vanishing. It left these maps, which were partly incomprehensible, so later cartographers altered them. There's just one more thing said Corderoy, the evidence indicates that, what we have here is only part of an original world map. So here is evidence of science in an early epoch, which is considered to have had none. Here were physical fragments of the amazing knowledge of a super culture long vanished. They spread out six pieces of the jigsaw, facts which were now apparent concerning those early explorers: 1. They possessed a knowledge of cartography comparable to our own. 2. They knew the correct shape and size of the earth. 3. They used spherical trigonometry in their mathematical measurements. 4. They utilized ultramodern methods of projection (exact coordinates). 5. They must have had at their disposal advanced

geodetic instruments, and trained specialists to use them, to measure longitude and latitude, which was not developed in the modern world until the end of the eighteenth century. 6. They must have been organized and directed on a global scale. The picture falling into place was this. Almost 5,000 years ago somebody undertook a survey of the whole planet. The technology at their disposal was very sophisticated. Another of the team revealed; Did you know that thousands of years ago people in India knew faraway England as the Island of the White Cliffs. Their Vishnu Purana reveals a close acquaintance with Europe. They may call it the Vishnu Purana, but it is A: nothing to do with Vishnu and B: India either. The geographical contours of the Americas and the North Polar zone are also described in detail. Denise Tagg said; my family was Irish, so I've had a penchant for the most ancient Irish legends. They say that Ireland was visited by men from India, the Dravidians, who came not as invaders but as surveyors. Wajsmann agreed and added, the Maya of Guatemala divided a spherical earth into five major continents: Africa, Europe-Asia, North and South America and Australia. And in second-century Greece, Flavius Philostratus wrote, if the land be considered in relation to the entire mass of water, we can show that the earth is the lesser of the two. The questions pondered here is; how could the ancients have known all of this, if they had not traversed and measured the earth's surface? Of course, the earliest Egyptians were knowledgeable about land measurements, too; and they practiced sophisticated surveying techniques. In fact, they understood enough to influence many other nations, in locating important cities and temples on meridians, all based on simple fractions of the earth's dimensions. Independent testimonies from different races does back this all up, of the evidence and proof of the maps. Jacob spoke of an ancient Chinese book, the Fourth Book of Shan Hai King entitled; The Classic of Eastern Mountains from 2250 BC. In it there are four sections describing mountains located beyond the Eastern Sea, on the other side of the Pacific Ocean. Each section begins by describing the geographical features of a particular mountain: its height, shape, mineral deposits, surrounding rivers and types of flora. Then it points the direction and distance to the next mountain, and so on. It's like a road map. By following the clues, we've found that these sections describe in detail the topography of western and central North America. All of which reveals the mineral diggers knew exactly where to dig, which now makes more sense than what they have described it as. In the book each mountain can be identified and each river. This document is a geographical survey, but that's not all, it even gives the experiences of the surveyors, from picking up black opals and gold nuggets in Nevada, to watching seals frolic on the rocks in San Francisco Bay. They recorded their fascination at a strange animal that avoided danger by pretending to be dead, which is suspected to be the native opossum. You can read about their wonder at the Grand Canyon, a stream flowing in a bottomless ravine and a sunrise there. They are in the ninth and fourteenth books. By the third century B.C., when many Chinese records were reevaluated and condensed, it was found that the geographical learning it contained did not correspond to any lands known at that time. So, it was reclassified as a myth. What this reveals, is there was a detailed Chinese survey of North America 4,500 years ago, all part of the global survey. One of the team did some detective work along many of the routes which those surveyors of North America took. Would you believe, some rock drawings still survive? Among these pictures on stone you can recognize carvings of the Chinese dragon. The Stone-writers left their traces on

every continent and a single system of signs was used. They used 241 special sequences of particular geometric signs and symbols. The stone-writers were not barbaric hunters or nomads. They were intelligent people who were systematic in what they did. In the ir-repetition and locations, the symbols had meaning and purpose. The stone-writers left these guide signs to mark the way for others who would follow them. These surveyors left their traces in the form of maps, symbols and place names. Of course, symbols left on rocks and tablets presuppose communication by language. The biblical assertion that the whole earth was of one language, and of one speech. Until the Lord, Anu came down and changed it all, and then scattered the people's to the four corners of the Earth it is said. One could argue his peoples scattered to the 4 corners of America. The evidence seemed now to support it. The next piece of the jigsaw was a report by the explorer Humboldt. In 1799, while wandering in Guiana and the upper Orinoco, Humboldt came across rock pictures and hieroglyphic signs high up on the mountains. The natives told him that their ancestors, in the time of the great waters, came to the tops of these mountains in canoes, and that the rocks were still so soft that a man could trace marks on them with his bare fingers. It tallies precisely with conditions that prevailed after the global Deluge. Great inland seas remained on all continents, often trapped at high levels, and not draining back into the ocean for centuries. The Deluge, as it reshaped continents, thrust sedimentary rubble mountain-high. This would have remained soft and impressionable for a considerable time. Which is like the picture writings elsewhere, in the highlands of Colombia to the gorge of the Xingu, on the eastern side of Brazil's Matto Grosso, they all have one feature in common: they are carved on high rocks, in gloomy canyons, impossible to climb, some are up to seventy feet tall. It's the same in the Mexican mountain ranges; in Siberia too, the signs are found on impossible cliffs. So, within centuries of the Flood, the new population undertook a resources survey of the whole earth, and they mapped every continent. The team thought they could identify some of the men involved in this, and used some biblical chronology throws some light on it. They always have to refer to that book, don't they? It is like a pre-fixed meme, because if the history is a lie, then so are most of the books written about it, but people will not let go of that book. The problem is, the book whilst containing some truths, in fact many so called truths are bent and twisted to fit in with it, but it is told not from our perspective, but theirs. Something archeologist, philosopher's and theologians should seriously consider, base evidence on the facts and what you see, not whether it fits in with the bible. They came up with three names. During the period 2800 to 2500 B.C. First there was a guy called Peleg The Book of Genesis states that; in his day was the earth divided, as in allotment or marking off an area. That could describe the 5 regions divided up by the Anunnaki. Then there was Mizraim, according to the chronology a grandson of Noah, who is credited with founding Egypt. About as likely as Columbus founding America. His name means to delineate, to draw up a plan, to make a representation, especially in association with measuring distances. And sure enough, at least two old maps linked with the ancient past, the Piri Reis and Reinal were based on a circular projection with the focal point in Egypt. Perhaps it is no accident that the Great Pyramid records in its dimensions the measurement of the earth on the scale of 1:43,200. Both the earth's circumference including the equatorial bulge and polar radius with the flattening at the poles, were known with an accuracy comparable to that recorded by satellite surveys from space. There was

also Almodad the measurer, the inventor of geometry, who measured the earth to its extremities. According to chronology, Almodadis the progenitor of the Southern Arabians, and many of these maps reveal peculiarities of geography that were first noticed by the Arabs. When did Almodad died about 2350 B.C., the Chinese Shan Hai King book was written only a century later. Those isolated pieces, the maps, the traditional reports, the building survey methods, the rock sign sand the chronology, all so different were no longer a puzzle. They all dovetailed. Now that is some dot connecting, but a summary of it without biblical interference or reference reveals this. Sophisticated, technological, astronomical, mathematical, geographers existed at least 5K years ago. They had done things way beyond our current capabilities until at least the last century. They had instruments, the ability to fly over areas, travel vast distances, record everything in detail as they traveled, quite an enormous task, or, they had satellites in orbit back then to reveal everything below. Just like the object called the Dark Knight discovered in the last century, in a reverse orbiting of the Earth at 22k feet. These people clearly traveled far, reaching Britain, Americas, India, the Middle East and Asia, plus it reference the islands and Australia. But the story left out one significant place on the map details and travels, Russia. I believe that was left out deliberately, it is no cohen-cidence that the Smithsonian has the original copy of the Shan Hai King book. I believe in overview, particularly with the mention of the purana, those ancient mappers and surveyors were the URS from the sky and the Rus from the ground. The Garden of Eden in India dates from around 7K years ago, the maps go back to 5K years ago. The ones from the last 1000 years were said to be copies of 5K years ago. Which begs two questions; 1. Where those 5k year old maps copies or 2. Did actually the maps go back to 7K years back? The fact people in several regions were taught how to do this, is suggestive of teachers going around the world revealing the knowledge. To my mind and knowledge, this reveals who it was, the URS and the Rus.

OTHER PIECES: Another interesting story this time on Newsweek, citing a reddit piece about the Great Ziggurat in Iraq containing a stargate. It stated that this was the real reason behind the attack on Iraq in 2003, and went onto mentioning Sumeria and the Anunnaki. Slowly but surely the narrative is being introduced, that allows more people to look at it and entertain the idea. Whether the masses will ever accept it without a global address on the mind control box is another matter. Yes, that region had spaceports, and yes that region had one of the main stargates as we revealed in Cosmic Genetics show earlier this year. The article typically went on to discrediting the Stargate theory, despite the US Military having an outpost around the Ziggurat and banning Iraqis from entering it for at least 7 years. The site is a holy site for Iraqis.

Here is another scientific proof put forward by scientists, despite their ilk and the media previously discrediting it. As researchers from the California Institute of Technology (Caltech) shocked the scientific world earlier in December when they announced that they had simulated two baby wormholes in a computer. Not only were the physicists from Caltech able to create two wormholes, but they also claimed to have sent a message between the two, proving that traveling through a space-time tunnel was possible. Another example of the look what we found, on the journey of discovery disclosure program they are running.

I played the song last week of you spin me right round baby right round. Yes it is more evidence of getting us to spin out of control and not spiral in and under our control. The second part of that title is like a record baby. But record is how they ask you to pronounce it, I guess another song said: and you know sometimes words have two meaning, or it is three? A record is a music disc, or is recording, recording all one word, recording us in terms of data, or is it re-cord which is two words, as in re-cording us to a spinning system? All in the words you see. But I was pondering something else in terms of the spinning and what I mentioned last week in terms of the geocentric and helical models. The question pondered is; is the geocentric model indicative or the creation of the flat Earth theory? As those who attended the last common sense zoom presentation will attest, the sun's shadow movement across the planet makes no sense in geocentric orbit. Which may have left some pondering upon the flat earth theory. The sun's movement discounts that when in the helical spiral motion and would actually show the proof via the shine on the Earth being in a wave motion. But the spiraling of the planet brings up something else that made me ponder. What if the spiral motion is the cause of scientists to speculate that the Earth is off of its axis? Because the spiral shape or forward motion right and left is almost identical to the 23.5 degrees tilt. The internet models of the planet wobbling on its axis, may well just be showing the spiral motion of the planet in a helical pattern.

An interesting pattern has been observed on many of the world's statues. Most are depicting the left foot forward and the right hand upwards. This applies to Ba'al, Baphomet, Satan, Nimrod all depicted the same way. But other more notable and more recent ones are depicted just the same, George Washington, Columbia the movies woman and also the statue of liberty. But several of the pyramids also have the same shape, including Giza, Xian, Mayan and the World Trade center all have the same pattern. Two separate patterns, one common denominator, the constellation of Orion. The statues depict the shape of Orion in the night sky, odd how they call it the night sky, as Orion is there day or night. The pyramids are the 3 belt stars all in alignment. Even NASA is in on the act with its latest public version spacecraft called conveniently, Orion. During a recent presentation on the Earth poles, I have since been led in strange circumstances to a video. Interestingly the google earth when plotting Orion, does not show it going above and below the equatorial plane, but it rather stays fixed to the equatorial plane, particularly the three belt stars. The sun goes above and below the equatorial plane, Mintaka the middle belt star stays fixed on the equator and Polaris is fixed to the North Pole. All of which means the planet is not wobbling, the sun is traveling and we are in its wake. Other interesting news that came in this week, and some of us observed the bright twinkling of it last Thursday. But as of December 16th Betelgeuse is now increasing its death throes as it is now going supanova. This has been forecast for a while, this will likely make that star the brightest in the sky for quite a while.

I am looking for some help for us in making progress in what we are doing. We are looking for someone proficient in website design for exciting new ventures next year. Please contact Roger Isaacs on mewe or our email if you wish to be involved in taking us onto the next level, which

next year will deliver. A year ago this week we did the long awaited completion show for the what was then called From Russia with Love. A year ago, where did the time go you may all ask, over to their world is my reply. Originally that show was going to be done and presented by both Kim and I, until she went off on her new path of not only trashing me, but all of her own members as well. Talking crap is one thing, putting people in danger is another. Her latest is that she is removing everyone's chakras and replacing them with one, (M) all a bit kundalini that, exactly like the narrative of some of our first women's group that disbanded this year, which is further evidence of the digital twin game being ran currently. She is removing grey matter from our brains and working with the Zetas, we did a full expose of them in Cosmic Genetics. Tricksters of the highest degree, but it all provides interesting non-confirming information for those that seek saviors. The point is, at this point she can't even save herself. From working with a Black Sun Generals puppet (Tank) to crypto people like Rice and Dan Lutz, to child sex procurers like Charlie Ward, to failed alt media clowns like Pattie Brassard, so desperate for the limelight she went on a show with Shane Rothschild Bales even though she can't stand him and now is working with a channeler. A channeler I might add who works with Ra, all very Law of One that. Let's re-phrase that, it is the law of the one, with Ra the snakehead being the one, except he is not. Working with or for Ra? Desperate, desperate stuff and not befitting of the titles she claims to wear. It is one of the saddest declines in people I have ever witnessed, but the final hook is hidden for a reason. Will she quit it next year? Time will tell. But she has to do something for her own well-being, pride before the fall they say, no pride is the fall is my reply. Many thought myself and THI was finished after May 2020, reviews since and the two to follow soon will dispel that notion to dust. The final normal Thursday show of the year, as next week I will do Part 1 of the end of year review as a replacement of the normal show. Yes, I had to do it in two parts as so much was accomplished this year. Part 1 next Thursday will be all about the shows and in particular the fairly epic Must Listen to shows done this past year. A fairly comprehensive review of much that has been revealed this year, which then sets us up for the first show of 2023 and Part 2 of the end of year review. In that show we will reveal all the progress we have made. I said this year would be more about what we do, rather than what they do, and that has been borne out. A review of all THI and TPC's progress in Part 2, which will be very revealing. A summary of the predictions for 2022, and also a dip into what to expect for 2023. Politics will get real ugly within the next 2 years. Crypto and the dollar on the line to be replaced, politicians and some even in Alt Media now willing to discuss the Jewish problem, people getting testy, demonstrations breaking out all of which sets up nicely for the Blueprint. More on the Blueprint is coming up soon. I am going to wish you all a very happy Christmas, before tonight's ending piece, hope you all have a lovely time, I am considering going away for a few days, as I don't need to write the next show, that is all prepared. But special this year is only valid if it is followed up by an even more special next year.

We have done many epic pieces this year for greater understanding, let's see where this piece fits in. The final piece of the year, am I likely to blow your minds with this piece? Maybe. But, Thomas you may cry, you are always blowing our minds? Why? Because it is necessary for us all to move forward, not on a linear conveyor belt, but an upwards trajectory of and in no time. Minds have to

be blown, to operate in a spacetime of the heart. Remember vertical can be up or down, it is not one way, down is still vertical. The ability to see and what you don't see is not down to your own abilities, but what you have accepted as your viewing purview. Pur-view, funny word that and means the scope of the influence or concerns of something. The scope of whose influence or influences one may ask? Given before view comes the pur, is that the view of the cat? Is the cat the influencer? What a little Bastet that is lol. Purveu, in law; the body of a statute, the substance of an act, pourvu; provided, past participle of porveoir to provide, from Latin providere look ahead, prepare, supply, act with foresight, from pro ahead + videre to see. From PIE root *weid- to see. Weid is the hypothetical source of/evidence for its existence is provided by: Sanskrit veda I know. But do you know or do you "see"? do you know what you see? Or are you mind memed your whole life? Life is all about perspective it is not? The meme is the single point of the mind, the heart brings in the overview and the 7 angles of perspective, sight and subsequently insight. That type of sight is your real sight, you do realize that? Insight? Your sight within that means, not external sighting. What you see with the eyes is a pre-positioned mind meme provided to you since you were a child. Remember the picture cards when you were young? Produce the picture, memorizing the word and say the word of the object. You do realize they were mind memes? Representations of the world and their images, for us to memorize and supplant as memory or is it meme-ory? A repeat back in a closed loop. Why is it a closed loop? Because the object is dictated by their memes, not your own thinking and understanding. Take for example the apple, is it an apple? Or is it a heart or is it a planet? Remember the apple has a core and a center seed, so is it an apple or a planet? Or can it be both depending upon your view point, perspective and understanding? People will look at the picture as a single point, an object, an image and a shape, just like looking at the sun. In 2D you look at the sun, in higher dimensions you look not at, but through the sun. Because after all it is a portal. But we have been mind-trained to look at things in the sky in 2D only, where is the depth? Because when you apply the depth or 3D to it, then you can really see. You are then seeing what you actually see, not a meme-ory mind view point provided to you by the system of control. I asked in a show some time back, does Australia exist? And most 2d thinkers will say of course it does, it has been in pictures, it is on the telly, been in movies and books, and it is a valid response. But if that was the directive for coming to the truth, please explain the belief in god? Please explain all the mythological creatures? Please explain the mirage above a hot road? Please explain why the railway lines all come to a point? Please explain why the moon appears to be closer to us? Do they exist? Or is that what they have told you exists? But what other people have told you is, their truth or opinion, but it is not yours is it? Like the maps piece earlier, clearly they have overlaid us with their Go -ogle map, well, you can ogle at it all you like, but that is not your version is it? What that means is, your view, understanding and perception of the world and everything, is formed by something or someone else. All created by 2d images, I-mages, mirror magic and supposition. A book, picture or movie are all 2D images that we have accepted as our reality in a supposed 3D world. Assumption like logic, is not fact, it is the pre-disposed positions of other people. Predispose means putting someone in a frame of mind to be willing to do or accept something. Pre means before, then dispose, so before they dispose of you, they get you in a frame of mind, to then be willing or accept your fate. You do

realize that, but will you use your real eyes and come to the same conclusion, is that they have been imposing upon us a 2D world and reality. The ultimate in mind memes, the perfect form of subtle devolution, all done by accepting their views and opinions of your world. In essence they have manufactured and overlaid the world how they wish you to see it, what is worse is, we went along with it. If a picture paints a thousand words, who is the painter? I said sometime back this planet is all about shrinking everything into smaller and smaller units. Smaller people, animals, trees, fruits, eyesight, brains, frequencies, heart, feelings, emotions and all to make people believe and stay in the mind. The great question is; who was minding your mind? The planet of devolution not evolution is what has unfolded, let's make man in our image? Plus, is it the case of let's make man believe in our image that we present to them? The 2D world mind meme is another of their overlay worlds, and a devolution program. Now can you see? What do you see? What did you not see? The latter is the main thing. You can't see the forest for the trees, except in the Petrified Forest, there is no trees, so no forest. But everyone who visits there believes it is a forest, but that is their 2D mind meme overlay world perspective, because in 3D and your world, there is no forest. They are creating a movie for you, almost like the Westworld series, an image of the fake reality they wish for you to not only see, but believe in it as well. But it is not real is it? Everything is backwards, everything is upside down applies here, everything stated or produced as external when it is internal, like the blame game it is all pointing away from us. But that is not correcting the issues is it? The solution then can only be, to go within. Nature, nurture, the planet, portals, stargates, a healing machine, treasure, Source the creator, the Universe, a god, the sun, the savior, infinite consciousness, the Universal library, a spaceship, music and love, you do realize all those things are contained within you. The question then becomes: why do you deny yourselves those gifts? Your reality then becomes playing the role of victim/victimizer and the Egyptian river, no not the Styx, but de-nial. Who needs the cabal or controllers when we operate in denial and victimhood? Perhaps a new year's resolution is required? To stop playing the victim and denying ourselves our own power, time then to embrace and become that power, and use it in an all-encompassing way. Those who follow the small part of themselves become small people and devolution, and those who follow the great part of themselves become great people, and ultimately evolution.
