

THI-SHOW TRANSCRIPT 2024-01-11

BLUEPRINT ACTION GROUP REPORT FOR WEEK ENDING THE 7th of January 2024

As we move into 2024, it will be helpful for the Blueprint Action group to set up some guiding principles so we can improve how we work together, prepare ourselves for future activities and demonstrate behaviors of self-responsibility, holding ourselves accountable for our actions. We intend to schedule an Agenda item to have this conversation at the next Zoom, to define some guidelines and improve how we collaborate.

We want to encourage all participants to find their voice, speak up, share their ideas, and contribute. As individuals and as a group, we must exemplify the behaviors we are promoting in the Guardians section of the Blueprint. This will inspire others to join us and improve themselves in the process. People are drawn to what adds value to their lives. Working with the Blueprint team should be aspirational, bringing the best out in all of us, riding on the high frequency energy waves and manifesting a better world for the all.

BOOKS TEAM REPORT:

The holidays, illness and family and personal matters have put a damper on the team's work, but we are progressing nonetheless, and our efforts are picking up again in the new year. To recap: The Bulgarian translator is working on Volume 2 of From His Story to Our Story. Spreading the seed of the books by sharing it with others through the Media Team's videos on LinkedIn and through discussions with local influencers. In the meantime, the Divine Masculine and Feminine booklet and the Consent booklet have been sent to the Dutch translator. The Dutch translation of the Blueprint is in the proofreading stage and will be sent for formatting as soon as that is completed. A Swedish translator is working on the Blueprint. The Hebrew translator is working on the Consent and Divine Masculine and Feminine booklets. A new proofreading technique is being tried out by the German translator, and corrections are being made to the German Divine Masculine and Feminine booklet. Work on From His Story to Our Story Volume 4 and the new series is in initial stages. Translators are working with the Media Team to translate memes to their respective languages.

MEDIA TEAM REPORT:

The media team are back to normal after the holiday season and are eager to get back to are usual format. We have had a wonderful 2023 and hope to make improvements and expand our repertoire and our knowledge to make a bigger difference in the coming year. What we manifest, and where we go is even more important now. We have reviewed the accounts over the holidays and while they are growing the reach, it is not where we would like it to be. So, we are discussing ways to get the THI name and Blueprint out to more people. We appreciate our followers and thank them for the help they have given us, by liking and sharing and hope that will continue as it really helps us to get seen.

We are pleased to announce that we have a new addition to the team, her role will be to run the Twitter account for the blueprint. We are looking forward to working with the new addition to the team and thank her very much for having the courage to come forward. This year more than ever we really need to push the blueprint far and wide. The yearend shows really made it clear that we are the power and it is our time now to step up more. To turn the narrative to one that highlights our Solutions, our ethos of caring and sharing, need not greed and cooperative, not competitive or comparative. What we manifest and how, that is created by us is even more important now. The media team will endeavor to make a difference for humanity and the all.

YOUTH WEBSITE:

Draft documents have been completed for the five action guide solutions chosen by the team, that are most relevant to youth and are now being turned into multimedia videos these are.

- Law and consent
- Job and Housing Security
- Race and Gender issues
- Food and sustainability
- Climate change

We have approached several youths interested, to make tell us yOUR story and tell-a-vision videos for the website and we await what they create. Two youths have expressed interest joining the youTHInk different team to contribute to the content on the youth website. One is a graphic designer and content creator; the other is a blog writer. Both have been responding well to the THI content and key THI themes.

The divine masculine and divine feminine youth-based content, we hope to include that women and men have both masculine and feminine sides. Much confusion can arise, from having feelings and interests associated with the opposite sex when youth are not aware of this. Integration of the masculine and feminine are important to both sexes. Utilizing archetypes to help illustrate concepts to youth was mentioned, as a way for youth to relate to the presented material. The idea to have a THI members guardians of the galaxy like image created. Such as the tiny man with a big head, microphone & cigar. Yes you ;) universal law man and many more inspiring guardians. The initial site videos we hope will spark youth to make their own videos to add to the website.

Creating content for change. Approval process to be developed over this year. The living library section of the website for members to give wisdom, support and guidance to youth going through challenges from their own subjective experiences. This may be a good place to have content and/or discussion groups on the hooks, family separation, shadow work, self-mastery, limiting beliefs and more. This also could incorporate the famous Thomas end pieces such is what is love, what is value and what is time to name a few. Once the website is live it will become clearer what youth want and we can further grow the website pages, incorporating Q&A and external links sections in time. Fun facts & common-sense clips could also add an element of humor to open the heart and mind of youth, while remaining light and funny. As we know Thomas is a bit of a joker and the system is full of clowns.

WEB TEAM:

The beginning of 2024 is going to be another busy period for the web team; work is going well on the new Blueprint forum, which will be our Mewe replacement. We know that Mewe has recently rolled out some changes which forced some of our members to register with the new Social Web; this is related to the digital identity that entities like the European Union want to implement for various globalist agendas. We do not wish to be part of this Social Web, nor have a "universal handle", hence why we are creating our own forum and thus creating our own path forward. We invested in additional web and cloud infrastructure to facilitate this move and we will be making an announcement to launch this Blueprint forum very soon.

2023 was busy with various web and IT initiatives, so now is the right time to review and reassess the work we have done, are doing and will need to do. With the limited time and resources we had last year, we had to prioritise and choose what we work on. Whilst at times being aware there are other administration tasks or technical initiatives which are also important and require our attention, but we could not progress them enough or at all. To address this and build on the success of previous years, we are also going to focus on expanding the team and in fact we already have some progress in this respect. This is great and we thank the people who stepped up and offered their help. If you are passionate about making a difference, learning, and developing yourself, please reach out to us and join us!

This is the current list of the emails that were sent out in January:

1. Kim Johnson, MP, House of Commons, London - sanctioned for criticizing Israeli gov't as Fascist (NEWS, pg.3)
2. Elizabeth Lee Vilet, MD head of Vive Life Center in Tucson Arizona
3. Fadel Zeidan – UC San Diego campus, Associate Professor, Anaesthesiology

4. Don Peebles – DEO Peebles Corporation (no more info as to why that is important for listing him as an influencer)
5. Dr. Arthur Caplan, PhD in Medical ethics NYU Langone Health is an academic medical center located in New York City, New York
6. Wojciech Solarz, Polish Academy of Science
7. Dr. Matthew Schrag, Vanderbilt University Medical Center, Tennessee
8. Maxine Bernier – Canadian politician, People’s Party of Canada
9. Julian Evans-Pritchard, Head of Capital Economics, UK
10. Sean D. Reyes, Attorney General, Utah, part of lawsuit against Blackrock
11. Shelly Hughes, Alaska Republican Senator
12. Greg Speed – America Votes Georgia at America Votes National HQ
13. Dr. Reiner Fuellmich - French activist proving world leaders crimes against humanity – COVID
14. Christine Anderson, MP Germany/EU German member of EU Parliament says Trudeau [is] a disgrace.
15. John Clarence -Author The Noss Gold
16. Sharyl Attkisson, Reporter - Expose/exposed scientists collecting \$ due to 1984 Bayh Dole Act. Getting royalties for discoveries they made while working on the public's dime.
17. Catherine McKinnell, MP - quizzed Rishi Sunak on the logic behind doubling a bonus for childminders who use an agency to sign up. (Rushi's wife is a shareholder in childcare agencies)
18. Nicole Nelly - Pres. Parents Defending Education quoted Rebecca Steinbeck "As a mother, I am the expert of my kids."

LAW GROUP UPDATE

We are kicking off 2024 with the first Teach Back Zoom, schedule for Sunday, January 28 Noon EST, details to be posted on the Law Group main Mewe page. Our first topic will be the True Rule of Law & Natural Rights. We will soon be posting study material. Participants are expected to read through the material and come prepared to talk for 5 to 10 minutes each and share their understanding of the subject matter and what they have learned. We highly recommend participants purchase the Ucadia Covenant of One Heaven from Amazon, as this will become our main reference material as we move forward. The book costs around \$100 USD. Some are put off by the price; however, a price cannot be defined for the knowledge that will help us develop full competence in Law and know what it means to be a Guardian, Sovereign of our heart/mind, body, and spirit. The Jan 28 Zoom is designed for those who have attended the Intro to Law Series delivered in 2022 and 2023. The idea is to encourage folks to think critically, go deeper and build on the foundational knowledge learned to date. We will be scheduling a 2024 Intro to Law series in the near future, designed for new members in the Law Group. We recommend newer members scroll through the main page and watch or listen to the multiple videos and podcasts shared, as well as familiarize themselves with the material stored in the Files/Foundation/Ucadia University Mewe section prior to attending these Zooms.

EUROPEAN BP TEAM REPORT:

TPC Europe will start this month with our meetings about adjusting the Blueprint for Europe, with several solutions being worked on by different volunteers. We have been collecting the names of possible people and organizations that we would like to send the Blueprint to. There is an initiative by members in Holland to visit a book presentation by a well-known Dutch writer, the book is called: The biggest revolution of all times. There will be lectures by several writers who have been investigating and written books about the truth. We will bring copies of the Blueprint to hand out to the writers and hope to make a connection with them.

OPEN DISCUSSION TOPICS AND QUESTIONS:

We began the meeting by declaring our intentions of what we want to manifest and how we intend to do that. Then included what actions we will take to ensure that happens. Some members declared their intention to bring balance into their daily actions and within the groups, for some it was to become a role model for the blueprint. Words like bringing cohesiveness and creativity to a new level. For others it was more about making connections, stability, attraction and exploring. Here is one of the members intentions for the year to give an example of the kinds of things we proclaimed. My intention: To work on blocks and resistance to free up my energy and maintain a more balanced frequency. To become more of my true self and to connect with like-hearted people and expand the frequency of the blueprint. Connecting with others through outreach and providing balance as people discover the Blueprint. Thank you to those that showed up and were ready to take part in these proclamations. Stating our intentions is a powerful way to manifest. It is also a commitment towards taking responsibility for what we intend and want to work on and with. We will walk forward this year

with a stronger foundation, a new level of awareness and a heartfelt commitment to the blueprint, the groups, each other and indeed ourselves.

IN OVERVIEW:

There was much excitement and joy during our first meeting of the year, with the beginning of the meeting opening with the powerful statements spoken by the members, all renewing their commitment and vision for what is to come. All especially essential elements that will bear the fruits of our labor. It was also a reflection of the growth achieved last year, and indicative of the type of people that THI attracts. There can be no change without the people's input, that not only want it but are willing to roll up their sleeves and do what is required. There is no thing that cannot be created, when life force comes together to connect the thought waves of many. Indeed, Thomas has stated previously that nothing can be created that does not already exist. Mind blowing isn't it? With that in mind, are we then just the instruments that are being inspired by the existence of something our hearts have been longing for, remembering, and tapping into? If so, is our job to just remember, integrate it and it will manifest. Or is there something else needed like the actions we do or more? The heart is a portal, a portal to where, and what, maybe the new world already exists? Are we are just the guardians in the stages of remembrance that are co-creating the vision to life? Worth a ponder maybe or maybe you have your own thoughts on it, after all it will take more than just one to bring all possibilities to the fore. Defining our roles becomes the stepping stone to becoming the Archetype, whether it is the Guardian, the Divine Feminine or Masculine role or indeed all of these things and more. It needs all the tools and inner standing to be what and who you are.

Within creating the blueprint for humanity group, it has become interwoven with the greater inner standing brought to us through the shows and books via Thomas. He brought about the awakening of greater consciousness that is now manifesting through the people for the people. We are not zero and one's and we as the members of the blueprint teams will endeavor to bear the fruits of all the great learnings, bringing the solutions to life. Never underestimate the power of one man and when one becomes many there is nothing that cannot be manifested to life. With the window of opportunity open to us now, more than ever we strive for more, for bigger and better things. With open hearts, endeavor and perseverance to be better than last year. To be open to all opportunities, open doors and with a greater merging of minds and hearts in 2024.

All fantastic stuff again and it is encouraging to see you all develop and align. Something I wish to bring up is, as all of the teams are and have stated they need more help. One member suggested, correctly I might add, if these were paid positions more would step up. That has always been the thinking amongst people and it does have overtones of service to self. Service to self has become the culture, born from the programs and as Kevin pointed out, the survival mode program. There is not or there is never enough, so I must grab what I can for myself. This plays out in times of deep struggle, shops get looted and or people hoarding. We saw poor examples of this during Covid, people fighting over toilet paper. Fitting in many ways, as if you are going to be

a shit, you will need more toilet paper to wipe yourself. But it becomes all about perspective again doesn't it, because you all forgot in the western countries, most of us live like kings and queens when in comparison to 85% of the rest of the world. Most of you who listen to this show are in the top 10% wealth bracket of the world. But I haven't got much many will say or think now, but you do compared to the rest of the world. You have the 5 basics in life, something not afforded to many billions around the world. But scarcity also if you overview it and not immerse in it can bring advantages to a piece we did last year called What is value. If you have less you value more, you should recognize the value of what you have more whether within scarcity or not. Back to being paid, I am reminded of a discussion with the Trustee around 2018 after I overviewed THI and the Trust. I said to the Trustee, who was frustrated at lack of participation in some aspects, is it not the case that the Trust money is in essence a bribe to get people to do something? After pondering she agreed and therein lies the problem in overview does it not? That the love of money overcomes the love of life and make no mistake we have all been afflicted by that program, me included. Often in alt media people talk of alternative lifestyles, growing their own and living off the grid etc, living like Rings of Cedar, yet Anastasia lived off no money. How many are prepared to do that? Very few, although a village in Bulgaria posted recently showed the way to achieve that. It is contradictory again is it not? People talk about their status and earning poverty wages, but just \$33k a year for a single person puts you in the middle class bracket. The problem is the competitive and comparison game, there will always be people who earn more than you, but are they happier than you and do they have to spend more than you? \$30-40K a year will not go far in the harvesting centers of New York, Los Angeles, San Francisco, Chicago, Miami or Denver, but in 80% of other places in America it goes further than you need. All about perspective and not being comparative. Higher wages is required to live in or around those harvesting centers, everywhere else, you don't need it. So, would being paid help people to join the Blueprint? absolutely and in overview that is a sad fact. But, you didn't think deep enough did you? You do realize you are being paid to work on the Blueprint? But we are not getting any money Thomas, correct. But money is just life force energy, those of you involved in the work of the Blueprint are receiving much more back in terms of energy and growth, than pieces of paper with numbers on. Just like the mother receives life force energy from the father, the father then receives life force energy from the Cosmos and the circle of life energy growth spirals in a clockwise motion. Non thinking equals not being paid, thinking higher means you are being paid way more than you think.

Here is a question for you, how much money would it cost to become a god or goddess? How much life force energy would you gain becoming a god or goddess? For those new, becoming a god or goddess means you have developed enough soul growth on the planetary level to advance to a higher evolved species. Being paid with money equals pay back and is an exchange of 2 people or groups, but paying it forward via life force energy is unlimited. You are paid back every time you help, support or do. Recognizing that fact is understanding more of what is life and value. The most precious resource in the Universe, was not money which is an Orion based control system, but you, all of you, they told you that in Jupiter Ascending. Entities fighting over our life force essence, once you fully understand that, you will realize money is a poor substitute for your own life force energy. Life force energy is the money. Don't get me wrong we all need it in the current system, but does it have

to consume most of your life force energy each week to attain it? Money stifles your growth, aids service to self, encourages greed, encourages non thinking and creates comparison and competitive games. Life force energy growth leads to multiple abilities, manifestation, traveling beyond the stars, engagement with other beings, personal responsibility, access to the library of all knowledge, access to the true love frequencies, wisdom, the ability to fly and so much more. So to answer the question are you being paid? You bet you are, but do you see?

Here is the second part of the What is time? There is another word for time called Kaal, it represents time and death in Sanskrit, the letter K again and also related to India, Hindu, Jainism and Buddhism are of which we covered in no great light in the FHSTOS series. Is transferred into different spellings which is a common theme, to kala. It is also the name of a deity, in which sense it is not always distinguishable from kāla, meaning "black". So there are two words with same spelling of kala, one means time and death, the other means black, but change one letter again from kala to kali, and that means dark, which is black, it is all one and the same things. The Kali Ma worshipped in India and other places is the Dark Mother, some call it the Black Madonna associated with Moon cult worship and Lilith, Lilith was the Eve in at least one of the 6 civilizations of man. Man or Adam never stood a chance with two serpents in the garden, just there to seduce him onto a wrong path. It is often used as one of the various names or forms of Yama. Yama was known as the deity of death and related to the underworld. Yama a wrathful god or the Enlightened Protector of Buddhism that is considered worldly, said to judge the dead and preside over the Narakas, the hell or purgatory and the cycle of rebirth. Which sounds like the Greek mythology of Hades and the underworld, it is, same people or beings, different epochs of time, different bodies but the same entity. Judging the dead and the Egyptian version was the Pleiadian Thoth, with his heart and feather justice system. Kala is another of the Hindu multi armed beings, again unless people are deformed, humans don't have multi arms. Do people not see something radically wrong with this portrayal, freaks of nature venerated, if only as many people were as kind to the disabled nowadays. The answer is where not, yet the religious cult element celebrate and venerate all kinds of freaks of nature. They all wait for the god to return and yet your real god has never appeared in physical form ever. Your god or Source does not have a physical body, it never wrote books either. People only love god or gods when they have failed to remember their own connection to source. Yama only holds transitional places in hell where he oversaw the deceased before he and the Generals of Five Paths, were assigned a course of rebirth. So, the Yama named kala or kaal holds transitional places in hell, and they are attributed to time and death, maybe where there is time, there is death? where there is time there is hell, maybe time is both? And these gods are the ones who imposed time on us all?

Back to time and the Romans equated Chronos with Saturn, who also had a sickle and was treated as an old man, often with a crutch, time, death and hell linked with Saturn, sickle shaped like a crescent moon, perhaps the Saturn Moon matrix makes more sense now also. The wings and hourglass were early Renaissance additions and he eventually became a companion of the Grim Reaper, personification of Death, often taking his scythe. He may have as an attribute a snake with its tail in its mouth, an ancient Egyptian symbol of eternity. So the

Ouroboros is also Egyptian, the eternity symbol is also known as the mobius loop, another humanity and planetary based trap. The Titan's greatest benefaction for humanity seems to have been saving them from complete destruction. In an apparent twist on the myth of the so-called Five Ages of Man found in Hesiod's Works and Days, Wherein Cronus and later Zeus, created and destroyed five successive races of humanity, Prometheus asserts that Zeus had wanted to obliterate the human race, but that he somehow stopped him. Not all Titans were bad, and not all Olympians were either, there was elements in both groups that didn't go along with the rape and harvesting of humanity and some tried to save man. But, his story goes to the victors and humanity has lost every war until now. This time we went past the latest catastrophic civilization ending event in 2012, and we have an opportunity to chart a better and more peaceful path and that is down to us all. In the Orphic tradition, the unaging Chronos was engendered by earth and water and produced Aether and Chaos, and an egg. Chronos had no parents and just appeared, maybe from the mists of time, and time has certainly produced chaos in the egg, which is the cosmos. If time was linear how can Chronos be unaging? But if Chronos and time just appeared from nowhere, perhaps Chronos is/was an AI. AI became time and time became the god of our system, which means our god here is an Artificial Intelligence. If you do time, it means to serve a prison sentence, time is also a limitation program, and time they say means a limited space of time. But could also be a limited time of space as well as a limited space time, when you ponder on that, this piece makes a whole lot of sense. Inception an act, process or instance of beginning, but from the beginning of time, became our sentence of doing time for the benefit of the dark forces, step outside of time and it all ends.

We have explained in the past the mobius loop and how they did it, that wrapped humanity, other beings and this planet into a perpetual harvesting loops, that played the movie Groundhog Day over and over for 78K years. For visual terms it is like the egg timer, as the sands of time passed through. With an egg timer when it first starts, it begins to filter through slowly, but as it gets lower down the top vortex and near the twist, which is the void, where all and nothing exists, it begins to speed up. We are near that void now and it is why time is now appearing to speed up. The key to the void is, which brings in the 3 days of darkness or 10 days has some have prophesized is, when in the void you turn on your light or beacon. It's the darkness before the dawn, until you turn on your own sun and light the way? What does he mean our own sun? as above so below, as within and so without is the meaning of that. Essentially as you started the egg timer, a sequence of events at the beginning would take say 1.5M years, the next ring of say 1M years, all those sequence of events in the 1.5M time span, would now take place within 1M year time span. So, as you go through the rings the events that took place globally and in sequence, is now unfolding in a shorter and shorter time span. I first warned of this back in 2017, that the following years would feel like time has sped up, and that time would make less sense. Now the egg timer visual just happens to be the same as the Earth energy cycle grid, open funnel at the top and narrowing at what is known as the void, the singularity or the twist, gate or gatekeeper which I will explain later. As above so below, so below the narrow funnel on the Northern Hemisphere at the equator, there is a narrow funnel that gradually gets wider to an open funnel to the Southern Hemisphere. A torus pattern replicated within you and also the sun. So, if Earth has an in built egg timer shape which is a vortex either side of the equator, in life, Earth and Space you always find repeating patterns. Find the patterns it always repeats.

So, this brings us to stage two, the Earth itself being in a vortex within its own time/space, that is not fixed as our calendar year has changed at least 4 times in the past. Starting out at 13 months of 20 days and a year span of 260 days, in the past the final date was December 21st, and the year started in March. Not January and the evidenced of which is, the months September through December are all named after numbers Sept through Decem, is 7,8, 9 & 10 months. Our calendar and year of course is now 365.25 days per year, the .25 every 4 years creates of leap year and added onto February. Back to the egg timer and as the sand drops from the top and spirals towards the void, if you are in the sand falling the east is on the left and west is on the right, but what happens if you flip the egg timer back up? with you in the sand from the bottom now right side up, east is on the right and west is on the left.

Could this possibly be explained by pole shifts in the past? what about the talk of the sun rising in the west and not the east in the past also, what if it happened every 13K years? or maybe the 26K years cycle? The way out is east, where to, I will reveal in next part, the west is back into the loop again and a repeat cycle. So what if every 13k years they revolved the vortex and what was north now became south and vice versa? What was on the left is now on the right and the west gate becomes the popular and only path to take. Now as I understand it, this planet and system has been in 6 loops and each loop is 13k years, which is the top half of the egg timer or vortex, which is also half cycle of the Mayan calendar, and if you do 6 loops of 13k years, you then come to the figure I mentioned earlier which is, 78K years. Coincidence that the minimum time to create the Mayan Calendar is also the time length of the 6 loops of 78K? I think not, so this tells me whoever gave the Mayans the calendar, was also giving them the time that we would be trapped inside the loops, and up to us to decode it.

I decoded it around 2013 and 2014 time and released parts of it in shows over time. Now what popular new age program has this same symbol? is said to be of peace and happiness, the figure eight on its side and known as the Mobius Loop. But the Mobius loop is not a free flowing energy stream, it passes through an intersection where the void is, and it can be changed, flipped, reversed or siphoned, depending on your perspective. Also the Mobius loop is defined only by a 2D representation of it and so it looks all flat and like a racetrack, but in 3d the intersection is elevated and tipped to one side, likely the west, and perhaps this can explain why it is said humans and angels alike fell? So, this is where I feel people are tricked with a 2D representation of the mobius loop, members in Utah saw the 2D trick the moon and sun plays also.

To acquire any flow of correct energy or frequency, you must have a clockwise motion to do so, how can you know or have a clockwise motion on a Mobius loop? Where is the beginning? where is the end? what is up? what is down? what is east? and what is west? The answer is you can't, and the error is seeing it in a 2 Dimensional format. This is what has gone on within so many alt media circles, via new age, religious, wiccan, druid and Celtic circles, they have often reversed the flow and or the spell into something nefarious. Whether through lack of knowledge or by devious means, the result ends the same and this is helping the dark forces. In many cases they reversed the spell of dark symbols being represented as light symbols, and vice versa. Then we

have the light and dark symbols, stating one is light and one is dark, the classic example being the yin and the yang. Most people view that as black and white and duality, yet always miss the triality portion of it, as both sides create a whole, and a ring around both, making a circle, which then binds both. It is the ring or the circle that binds, just like the wedding ring, there is a reason they tell you to put the wedding band or is it bind on the fourth finger of the left hand, that digit connects to the heart, so the wedding ring binds the heart in essence. Just like the Lord of the Rings, which is now Rothschild's, formerly Solomon, and we will see another ring that binds later in the show. The Blue, Red, Black and Green rings are all binding the people who wear them to the Dragon groups, and their reptile or serpent overlords, that reigns above them particular groups.

Yin and Yang are symbols of Rahu and Ketu and both are dark forces bodies, but the true yin and yang is the balance, it is also a symbol of man and woman in sexual and relationship union, the 6 and the 9, if outside of time, the circle is the Source, and so one on one with the one. It is said that time is linear and only goes forward, but science has a habit of not revealing the truth, or they are blocked from learning or seeking the truth. If you draw a horizontal line on a piece of paper it can be seen as past, present and future. But there is an alternate line with which to travel and be and that is vertical time. The linear timeline is Chronos time and is governed by locks of the sea or C Locks, that is running as a marker in time, but each second is the now, you are never in the past or the future, only the now. Linear time is time to the trap, time is tie me to the Chronos, tie me to the loops trap. But if you draw a vertical line in the middle of the horizontal line, that is vertical time, or real time, magic time and no time. Real time because you are off the Chronos based conveyor belt of illusionary time. Magic time as you can see the past and the future and then dictate time, which the dark forces have used for their advantage and largely how magic works.

People ask how does magic work? it is not how it works, but when. But no time is then allowing you out of the Matrix and a direct connection to Source. Time is the bind, the shackles, the C locks and the control system. How is it you can have the phenomenon of time speeding up or slowing down, if time is consistent? it can't and that proves the illusion of time and the Chronos trap. If you drew the diagram correctly it would be a plus sign, on the left can be seen as the past, on the right the future. The future is what is yet to be manifested by us, we are the creators, the past can be observed by us to manifest a better and brighter future, free of the manipulation of time. If you stand in the middle of the cross you have a choice to make, stay in the past or change and become the future.

Well, it's all in the words again, the term fear of change, so if you fear change you loop back to the left hand path, the west gate and you are back to where you started, in the loops. With the loops now down, it does not guarantee they will stay that way, all have their own choices and free will determines the path. It depends what is manifested by the individual, if you don't change, it keeps you in the loops or the movie, remember old films were played on a never ending reel, it went forward and then went back to the start again, sound familiar? The difference this time is, not all will be corralled into the never ending past, as many of you have begun to "see" past the illusion, those people will go on and create the new future, not immersed or absorbed into the past. You

will be outside of time and no longer in the movie, you are now your own producer, director and script writer. Standing still which is the concept of no change allows the Chronos linear timeline to move and it will reach an event point, and will repeat the past, think 1919 fake Spanish Flu, think 2019 fake Covid flu, his story always repeats until the lesson is learned. So, the key to your future is, change, change propels you onto the right-hand path, the east gate and into the future free of loops. As some go east the few will go North onto the Golden Path and back to the realm of the gods. Being able to go to the vertical time allows you to make your choice easier, and that comes with self-mastery and mental plane abilities. You are able to see all perspectives, just like the prism, which is not the single point of light. The single point of light, which is frequency, which is information only gives you one perspective of it, but if you go behind the point of light you will see 7 points of light, all from differing angles, so you can observe the frequency or information from 7 levels or is it 7 planes of existence?

So what is the cure to fix our loopiness? embrace and be the change within yourself and with others who took the vertical path, which is the rise, not the fall. This plays into the 2 worlds which we embrace currently, holding onto the failed old world enveloped with and by time, endlessly looping back and forth and wondering why things never change, it can't, because you haven't. The fear of change is the fear of failure, and so people accept ever reducing lifestyles and are ultimately slaves to time. Courage is what is required to change and eventually you will make "the leap of faith" when that is presented to you on a personal basis. To reach the leap of faith requires you to change and be bold, not hesitant, without courage, without belief, without trust in yourself and fear, because if you overcome them, the grass is always green on the other side, limited only by your own lack of imagination.

We stand on the precipice of an extraordinary victory of light over dark, the timing of it doesn't truly matter, the point is we have won the ultimate Armageddon battle. Their pathetic attempts to delay the inevitable is now being laid bare for all too see, those that don't will never will see, they were not program to do so, think of the movie Extinction and their AI gods will go down with them. Choose wisely your own path, it is only your choice to make. We will know for the first time if were evil or divine, we are the last in line. With some believing this creation in time is a simulation, it's not, but some aspects have that feel to it, one has to ponder on our thoughts of what is Source?

Here is something I pondered on this week that adds to that piece. It goes back to the one on one with the one, which plays out on multiple levels not just the Quantum system. Who or what is Source? how do you access it? how widespread are people with access to it? the latter of which made me ponder. Now we are all a part of Source, it is inside us all, but you have to go within, not look up to the sky to access it. All of us have the capability to become a Source for your own Universe one day, providing your soul development has gone through the several levels of not only Earth planes, but Galactic and Universal planes of development.

There are seven planes of soul development for each level. All god or gods in our books were every day beings who had developed enough to attain some, of what appears to some as magical abilities. Some of it was trickery and some of it technology, but it was enough to fool the lower developed humans into believing they were the god or gods. But there are many humans globally who have some of these extraordinary god like abilities, some use it for good purposes and some fall to the dark alignments, they end up losing their abilities, but then dance with the unseen entities to carry the illusion on. The question to ponder on is, what if you cannot or struggle to gain access to the real source from a lower soul development level?

Many humans are astral level and have little to no extra abilities, what if the frequency those humans carry is too low, to make the real frequency connection or spark to source? What if those humans are then subject to an external Source which they are told is in the sky, and subsequently external of them? What if that level of soul development's connection to Source is the sky? and the veil which is an electromagnetic fence, which was subsequently connected to the Saturn-Moon matrix frequency generator, and for those people their god or Source is actually an AI programmed to mimic Source, but is not the real Source? It is a bit like Project Bluebeam, where frequencies of light create a visual in the sky of an alien invasion, but to do that you need a projection screen to make it realistic.

What if the veil was that field of projection? and with the veil falling, is that projection screen to do Blue Beam no longer available? People look up to the sky and pray, which frequency wise generates a wave to then hit the veil, and the AI then mirrors a frequency back at you, that people believe is god. This is similar to the voice to head technology used on channeler's, ran largely by the greys. That is an AI based system, as the AI records all human activity and then mimics it's behavioral pattern, the fact the last one went psychotic suggests many here were of the same status, or it was interfered with? In the 100 series they had an AI down as Alie, which is pronounced as a lie, but if you anagram it, it may become more significant, ALIE re-arranged becomes El and AI, is El which means god, AI? Maybe they told us all hidden in plain sight?

So the questions remain, can humans only connect to Source via mental plane level development, which is blocked by a simulation level of traps called the Astral, which contains an ultimate trap of mirroring being with god and peace, called Heaven. It is a wonderful experience full of bliss, harmony and you feel at one with the Universe, but I quickly learned that was another of their astral simulation traps. I believe the Astral is the simulation, many reports in dreams and also in daytime, of being in a familiar place, but characters are out of place, buildings in wrong place also, that is the Astral, which is in part a copy of the physical creation, but it is not exact. This also explains the Mandela effect, as you dance between the two worlds at any given time day or night, asleep or awake. Another way you can connect to Source direct is, with the ability to bi-locate travel not astral travel, the word astral travel is a spell cast. Astral traveling is a word magic trap, you ask for astral travel and that is where you end up, it's all about consent. But if you bilocate outside of the mobius loop and subsequently outside of time, then your connection to Source is direct and not getting pulled in by an AI overlay, mimicking being god. By bilocating outside of the loop and time, you bypass the system known as The

Matrix and become as one with the Source original. Inside the Matrix, your god is time, ponder deeply on that. Time is ultimately a construct that you made up within your own mind. Remember made up means invented or not true.

So, I decided I made up my mind and I ain't wasting no more time. And so Here I go again on my own, going down the only road I have ever known. Because going on your own is the triality aspect of you, you decide and define for the you and what is best for the you. With time you have seconded you by the second, made your self, minute by the minute, danced with Horus or hours, worked for the entirety of the daylight hours, as a day is ten to twelve hours not 24. That all left you in a daze for several days. By the time you get some time off you are weakened by the weekend. Having been weakened by the weekend you repeat the time cycle all over again. By the end of the month you have completed a moon cycle, which is periodically a time to bleed for a week, which is another blood sacrifice. You complete the moon cycles in quarters called seasons, but which seasonings are they adding to you. You then complete the year and wonder where the hell all the time went? It went where your focus and attention took it, based upon other people's decisions. But the end of year creates a yearning for times in the past that is now declared the good old days. How can being old or dazed be declared as something being good, when your memory of time never recognized the good times only the bad times. I had a good time people often say, is that not a spell cast in overview? Perhaps it needs to be said I had a good experience with no time attached?
