

THI-SHOW TRANSCRIPT 2024-09-19

NEWS:

UKRAINE: Yet more child level contradictions from the ministry of clowns. As Ukraine's foreign ministry said on Saturday it was deeply concerned by reports about a possible impending transfer of Iranian ballistic missiles to Russia. In a statement emailed to reporters, the ministry said the deepening military cooperation between Tehran and Moscow was a threat to Ukraine, Europe and the Middle East, and called on the international community to increase pressure on Iran and Russia. In other news, Ukraine asking for weaponry from every nation is not consider a global threat! Classic CIA tactic of accusing others of what they are doing? You see in the West' childlike minds, only they can have weapons to destroy everyone, but everyone else must have no weapons and sit there like lambs to the slaughter. Do they at any point stop and think of what they are saying? Clearly not. Classic school boy bully tactics. Ukraine lost 2 F-16's jet fighters in one day that was sent by the US with American taxpayers money. Average cost of those planes is \$126M. Do you still wish to support Ukraine, Americans?

This was the update posted on Friday in the Mewe chat. The EU should prepare themselves for a potential conflict with Russia. As discussions about firing upon Russia via NATO countries, UK and the US was discussed today between Starmer and fake mask man. Starmer is being operated by a Jewish Elite called Trevor Chinn, who couldn't be more pro-Israel if he tried. Again like America it is the Jewish influence that holds the sway of power for these fake leaders. The gist of Trudeau, NATO and others speaking through their bungholes in relation to Ukraine and the missiles is this sentence: Every nation that is attacked has the right to defend itself. And that right doesn't stop at the border of your own nation. How ironic that statement is, except that doesn't apply to Russia, China, N. Korea or more pertinently Iran, does it? Child level screaming about Iran potentially having nuclear weapons to defend themselves, is not allowed by these playground bullies, all whilst IS RA El stock piles weapons like it is going out of fashion. The back chatter upon this was added to with this statement: If the current surrogate war between the Rothschild Khazarian mafia versus the Russian Federation intensifies dramatically, it seems certain that it will quickly assume an orbital to ground war utilizing the massive deployment of ultra-high-tech Secret Space War weapons. Putin then addressed the Russian nation and fired a stark warning that should the West fire UK and NATO made weapons from Ukraine, that is a declaration of war and they will strike back. I suspect the first country to be attacked, as I kept warning of it for the past two years, plus a Russian dislike for this country since WW2, will be Poland. The Russians blamed Poland for starting WW2, not Germany. Poland is one of the NATO aligned countries who flagrantly broke the 1991 agreement for NATO to not move further East. Poland has stationed NATO missiles within their borders and so closer to Russia, that was not a smart move and now puts all Polish people in the firing line.

Then right on cue. The Polish European Union Parliament Member Grzegorz Braun proclaimed about top Biden-Harris Regime official Secretary of State Antony Blinken yesterday: From our point of view, Antony Blinken is persona non grata in Warsaw. Blinken go home, go home as soon as possible we don't want you here. We don't want Polish people paying and dying for your words. We do not want to be either payers or victims of wars that have been unleashed in Central Europe for centuries by people whose heir and continuator is Secretary Blinken. People whose heir and continuator? That is a direct reference that Poland gets that the Israeli/US axis is the problem now, but the Jewish have been the problem for centuries. But Poland is part of the problem, like society they ignored the problems, concerns or warnings because they never understand the consequences of actions for their decisions. Now is too late, Poland like all other EU countries should have told Rothschild's private army called NATO, where to go. That would have been proactive, everything now is out of their hands and reactive. The same applies to the Baltic States and also the countries just South of Russia. As for the fear in the EU, again you were all warned, but went with the media lies, of Russia bad. If Russia does attack then they will be pointed out as the enemy, but the true enemy is within your own countries, including the people themselves. How is it the people's fault you may well ask, because you did zero research of geopolitics because that is too boring. So, the media provided the research for you and steered you all onto a wrong thinking path, which you all gladly accepted. Consequence of actions is about to unfold.

Russian forces have announced the capture of a facility in Ukraine, housing hundreds of children to be used for adrenochrome and other ritual and sexual practices by the EL-ites in Paris, organized by Maria Abramovich. Russian special forces then completely destroyed the building. That is a great news story that you will not hear on the corrupt MSM. Spewing their pro pagan da all over the place. Just like this next piece.

This utter drivel is a sign of the desperation of the so-called West and their embarrassing efforts to promote Ukraine as some sort of center for saints. The reality was in the last piece, plus the 8m Ukrainian's that were genocided in the 2014 war, all too clear space for migrants, some of which would be Jewish people as well. The heads of MI6 and the CIA have accused Russia of conducting a reckless campaign of sabotage across Europe. No, the reckless campaign is NATO edged further east in Europe, when the 1991 agreement forbade it. Sir Richard Moore and Bill Burns said the world is facing an unprecedented array of threats and that the global order is under the most severe pressure since the Cold War. But America invading 81 countries since WW2 is not an unprecedented array of threats, it seems to these clowns. They specifically pointed to Russian President Vladimir Putin's war in Ukraine as a major concern.

China was also singled out as the principal intelligence and geopolitical challenge of the 21st century, underscoring the complex geopolitical landscape facing Western intelligence agencies. Same tired old script from these people, Russia and China are threats, but where is the evidence? Has Russia or China attacked

Europe or America? No, then how are they a threat? Because whilst the western countries wasted lots of funds invading places, Russia and more so China built their economies and are largely self-sufficient, something the old world order can't accept.

The pair revealed ongoing efforts by MI6 and the CIA to mitigate the risk of wider conflict in the Middle East, including work towards achieving a ceasefire in Gaza. No again, they are not working on peace at all, the reason there is conflict in the Middle East is down to these same agencies creating and inflaming tensions. They also spoke of the resurgent threat posed by the Islamic State. Well if their lot keep attacking them, what do you expect? Do they expect them to just lie down and take it? Lunacy. In their joint statement, published in the Financial Times, Sir Richard and Mr. Burns wrote: Today, we cooperate in a contested international system where our two countries face an unprecedented array of threats. The threats are Israel and these 5 eyes clowns supporting them.

This next line shows they have a serious mental disorder of epic proportions, completely delusional. They added: There is no question that the international world order, the balanced system that has led to relative peace and stability and delivered rising living standards, opportunities and prosperity, is under threat in a way we haven't seen since the Cold War. Has there been peace? No, what about Afghanistan, Iraq, Iran, Lebanon, Syria and Yemen? Rising living standards, opportunities and prosperity? Turn it in, every economic study tells you differently where the people are concerned. The only opportunities and prosperity has been for the war machine junta. The intelligence chiefs highlighted the importance of the UK-US special relationship in addressing these challenges, describing it as built on Trust, openness, constructive challenge, friendship. Which is complete nonsense due to two words – The Crown.

The only thing the US and UK have in common is:

A: They support genocide

B: They promote wars, regional and global instability.

C: They devastate other countries' economies and their own.

D: Their agencies promote and carry out every devious method to destroy humanity, including their own people.

E: They spread democracy, socialism, communism, fascism all of which comes under the banner of Zionism.

F: They are both pathetic puppets of the anti-humanity group.

They expressed confidence that these characteristics can be relied upon into the next century, as can our shared determination to remain champions for global peace and security. The only way the world will have global peace and security is, if these rogue organizations are closed down. The pair warned about the threat of Russian information operations to Western democracies, citing the Kremlin's cynical use of technology to spread lies and disinformation designed to drive wedges between us. That is hilarious, seems these people are comedians like Zelensky. MI5/6 runs the BBC a bastion of pro pagan da. Regarding the war in Ukraine, Sir Richard and Mr. Burns said: Staying the course is more vital than ever. Staying the course is and has led to absolute failure, seems they like to fail. Putin will not succeed in extinguishing Ukraine's sovereignty and independence. Ukraine is a fake created country in 1922 after these same organizations ransacked Russia in WW1, it belongs to Russia no matter how much these his story revisionists state differently. These agency people are mentally disturbed on so many levels it is not funny, they need to be sectioned under the Mental Health Act. The levels of delusion is astounding.

Here is the state of play in Israel, you won't hear this on the MSM news. Israel's Eliat Port is bankrupt due to Houthi blockade. 46k Israeli businesses closed this year, it is estimated it will be 60K before the year is out. Israeli tourism industry is collapsing. Samsung is shutting down all Israeli operations. Intel chips has halted a \$25B manufacturing plant in Israel. French Insurance group AXA has completely divested from Israel banks and the largest arms manufacturer. Israel energy companies in dire trouble too as they rely on Colombian coal, but Colombia canceled the coal deal. Israeli science impacted as joint research with other nations have been suspended. Jews are leaving Israel which spiked as high as 285% since October 7<sup>th</sup>. This is all part of the boycott, divestment and sanctions campaign. It seems the world has had enough of the Israel and dire times are ahead for them and their people. They had to play their hand in the Day of the Svarog and are now exposed accordingly.

More skullduggery linked to the CIA has emerged and I suspect this is linked to our story recently about the Venezuela/US Petrodollar. This has echoes of a previous mission Project Condor we covered in FHSTOS. The United States has dismissed claims made by Venezuela that the CIA plotted to assassinate President Maduro and other top officials. Three US citizens, two Spaniards and one Czech national have been arrested on suspicion of plotting to destabilize the country, the Interior Minister said. Calling the detainees mercenaries, Diosdado Cabello claimed that the CIA is leading the operation and that hundreds of weapons had been seized. The US rejected the claims, which come after Washington placed 16 senior government officials under sanctions, as categorically false.

The Biden administration just last Thursday said it was imposing U.S. sanctions on 16 allies of Venezuelan President Nicolas Maduro, in response to voter fraud in the country's election and his government's ensuing crackdown on the political opposition. Voter fraud? Oh the irony of that, Americans should be the last to talk about voter fraud. In a news conference on Saturday Cabello said: The CIA is leading this operation, and that does not surprise us but they, the National Intelligence Centre of Spain, have always maintained a low profile knowing that the CIA operates in this area. These two detainees even tell us about a group of mercenaries they are looking for to bring to Venezuela, with very clear objectives to assassinate President Nicolas Maduro, Vice President Delcy Rodriguez, myself, and another group of comrades who are leading our party and our revolution. Argentina is calling on the International Criminal Court to request an arrest warrant for Venezuelan President Nicolas Maduro, amid the ongoing unrest in the country since he was declared the winner of the July election. Argentina government is operated by the Jewish junta – just saying.

Three CIA agents were arrested in the Congo as part of a coup there as well, they are being sentenced to death. Like I said, consequences of action is unfolding now.

The banking fraternity are at it again, extracting more shekels out of their customers. JP Morgan Chase is stirring up trouble again. It's gearing up to start charging people fees for things that have been free for years and its customers are not happy. The most controversial aspect of this new policy is the potential for fees just for opening a bank account and keeping it open. Everyone falls into their overdraft now and then. But for many people, having an overdraft can be a bit of a lifesaver, while others struggle to get themselves out of theirs, partly due to mounting overdraft fees. These fees hit those least able to afford them hardest. Well, the Consumer Financial Protection Bureau (CFPB) is trying to roll out new measures to stop this. The bureau wants to cap overdraft fees at somewhere between \$3 and \$14 – which could save consumers billions of dollars each year. Chase is no stranger to these fees, Chase pocketed over a billion dollars from these fees just last year. All these extra fees despite raking in just under \$50 billion in profit. But still, they're now looking for new ways to charge its customers. Chase is considering adding other fees to checking accounts, which has caused a lot of outcry. Chase isn't just thinking about charging you to look after your money. They're also eyeing all sorts of other services that have been free until now, like credit score tracking and financial planning tools. Chase are banking on the idea that other financial institutions will follow their lead, but it's a risky move and they may be pushing their luck. People are seriously annoyed, and nowadays consumers have more options than ever. At the end of the day, this is a clear case of a massive bank putting its profits ahead of its customers. They always did, but as the pot dwindles the more desperate they will get. Ultimately the people themselves have the power and the solution is to move banks and let them sink. But to most people that is an inconvenience and so nothing ever changes except more fees.

All is not well in the occupied lands it seems. An estimated 750,000 Israelis have taken to the streets in one of Israel's biggest-ever protests, as they demanded that the government of Prime Minister Benjamin Netanyahu strike a deal to free remaining captives in Gaza. The record number of demonstrators comes a week after the Israeli Army announced it had recovered the bodies of six captives from a tunnel in southern Gaza. Family members of Israeli captives and groups representing them blame Israeli Prime Minister Netanyahu and his government, for failing to secure a truce deal that would secure their release. It was also revealed this past week the Israelis killed 3 hostages by mistake, all justified by their policy of shoot anything that is alive.

All their hidden truths and agendas are coming out now. As Israeli National Security Minister Itamar Ben-Gvir vowed, to build a synagogue inside the Muslim holy site Al-Haram Al-Sharif or known as Dome of the Rock. Ben-Gvir, as a representation of Israel's powerful religious Zionist class in the government and society at large, has been candid regarding his designs in occupied East Jerusalem and the rest of Palestine. Indeed. A reminder of what I said in Cosmic Voice, a radio show I was on prior to THI. The hills of Rome will burn in a false flag. The Israelis will build a third temple in Jerusalem, preferably over the Dome of the Rock. The Vatican will move into the 3<sup>rd</sup> temple. (because Catholicism and Christianity was always a Jewish religion) The wall will be extended length ways and upwards. (see the geographical placing of the wars Israel is undertaking) The Israelis would then be expelled to Ukraine. (hence the reduction of Ukrainian people from 90-18M people, why Ukraine? Home of the Sarmatians, Sarmatian means lizard people) That was 10 years ago, no one believed me, but I read an outline document explaining that in the 1990's, before the censorship crew came in and filtered all relevant information out. Now after 2020 and the Day of the Svarog, they reveal themselves for who and what they are.

The kickback against the anti-humanity group is in full flow now. As Turkish President Tayyip Erdogan said on Saturday Islamic countries should form an alliance against what he called the growing threat of expansionism from Israel. He made the comment after describing what Palestinian and Turkish officials said, was the killing by Israeli troops of a Turkish-American woman taking part in a protest on Friday against settlement expansion in the Israeli-occupied West Bank. The only step that will stop Israeli arrogance, Israeli banditry, and Israeli state terrorism is the alliance of Islamic countries, Erdogan said at an Islamic schools' association event near Istanbul. He said recent steps that Turkey has taken to improve ties with Egypt and Syria, are aimed at forming a line of solidarity against the growing threat of expansionism, which he said also threatened Lebanon and Syria. Erdogan hosted Egyptian President Abdel Fattah al-Sisi in Ankara this week and they discussed the Gaza war and ways to further repair their long-frozen ties during what was the first such presidential visit in 12 years. Ties between them started thawing in 2020 when Turkey began diplomatic efforts to ease tensions with estranged regional rivals, including the United Arab Emirates and Saudi Arabia. Erdogan said in July that Turkey would extend an invitation to Syrian President Bashar al-Assad any time,

for possible talks to restore relations between the two neighbors, who severed ties in 2011 after the outbreak of the Syrian civil war. Israel did not immediately comment on Erdogan's remarks on Saturday. Israel's military said after Friday's incident, that it was looking into reports that a female foreign national was killed as a result of shots fired in the area. The details of the incident and the circumstances in which she was hit are under review. And then will be ignored as they have no value for life. The great irony of Israel telling the world that Hamas are using schools and children as human shields. When their top level ilk have used Israelis or Jews for centuries in harm's way to get what they always wanted.

#### MEDICAL SECTION:

News coming out of Canada as Covid-19 vaccine clinics across Canada have been ordered to destroy all vials of Pfizer & Moderna Covid-19 mRNA Vaccines. This can be for two reasons A: they are preparing for new batches as they stated or B: destroying all the evidence due to multiple pending lawsuits. My urgent message to all who have access: Do not destroy or return any vaccine vials, they are priceless! Hide them, as those vials are forensic evidence of mass murder.

Yet more evidence of FHSTOS provided, in relation to the sterilization program and a severe warning to parents in the UK and other countries. As Prof. Sir John Bell, a key figure in the development of the University of Oxford's Wuhan coronavirus Covid-19 vaccine, let slip the other day the fact, that the school's latest Covid injection is capable of sterilizing between 60 and 70 percent of those who take it. In a recent interview about the new shot, Sir John, who teaches medicine at Oxford, seemed to suggest that one of the goals behind these injections, is to mass sterilize the planet under the guise of protecting public health against the Covid virus. These vaccines are unlikely to completely sterilize a population, Sir John said with seeming disappointment during the interview. They're very likely to have an effect which works in a percentage, say 60 or 70 percent. We'll have to look quite carefully, the regulators will have to look quite carefully to make sure that it's done what we need it to do, before it gets approved. A clinical trial for the shot is still ongoing and Sir John says there will be a delay between when the results are in and when regulators give the shot the green light for public release. Sir John was barely able to complete his sentence before the interviewer cut him off, apparently to keep him quiet from revealing any further incriminating information about the new Oxford shot. Utter psychopaths playing god with our children again. Oxford University like Johns Hopkins in America needs to be closed down and so does all other research centers, immediately. John Bell or is it bellend? has a ridiculous number of roles in science and medicine serving on all boards it seems, including Astra Zeneca, the notorious Wellcome Trust, the founder of 3 biotech companies and a Bilderberger attendee. One look at his images and one wonders whether that guy is actually human. If he is not this whole sterilization program makes a lot more sense, of a hostile alien takeover.

During the Covid crisis we were warned in the Expose series about what would follow the mass jabbing exercise. The increase in injury and also the death rates were forecasted in 2021 to be 2-5 years, some estimated 3-10 years. They expected all who took multiple jabs may not survive beyond those dates. We are now in the 3-5 year stage and so should expect an increase of injury and death. Remember the Deagle report from 10+ years ago? America population would be 100M in 2025. Time will tell, but we are entering a very stressful and challenging period and we must all prepare for that. But more importantly learn to come together. Only unity is the pathway to redemption.

#### SOCIETY SECTION:

The latest from Mewe. You're creating a Frequency Access account, your gateway to accessing and managing your Social Identity. As part of this process, you will grant permission to MeWe as set forth below. Grant Permissions By clicking "Agree", you grant MeWe access to your Social Identity to: Update your handle and profile information Record, delete and modify the public and private follows and connections from your MeWe account to your Social Graph on Frequency. Beginning to sound more like Facebook by the day, the question remains as to why is there so much need for people's data?

Here is an article that adds further to the technology section we did in the last THI show. When you picture the tech industry, you probably think of things that don't exist in physical space, such as the apps and internet browser on your phone. But the infrastructure required to store all this information, the physical datacenters housed in business parks and city outskirts – consume massive amounts of energy. Despite its name, the infrastructure used by the “cloud” accounts for more global greenhouse emissions than commercial flights. In 2018, for instance, the 5bn YouTube hits for the viral song Despacito used the same amount of energy it would take to heat 40,000 US homes annually. So much for conserving energy then! Another illusion program. Like the piece earlier of these datacenters consuming more than 20% of Ireland's electricity. Then when you add in the huge consumption of power for blockchain and cryptocurrencies, a bigger picture emerges. This is the hugely environmentally destructive side to the tech industry. While it has played a big role in reaching net zero, giving us smart meters and efficient solar, it's critical that we turn the spotlight on its environmental footprint. Net zero is zero to do with smart meters and everything to do with control and turning people into batteries. Solar like wind farms are not as efficient as published, due to storage issues. Large language models such as ChatGPT are some of the most energy-guzzling technologies of all. Research suggests, for instance, that about 700,000 liters of water could have been used to cool the machines that trained ChatGPT-3 at Microsoft's data facilities. So not only do they consume large quantities of electricity, but the precious water as well, yet they tell us we are running out of fresh water! How can a planet with 60-70% of its surface being water, how can we possibly run out? What we have run out of is, common sense and investment, as the top people are only interested in the bottom line – the shekels. The tech bubble's self-

glorification has obscured the uglier sides of this industry, from its proclivity for tax avoidance to its invasion of privacy and exploitation of our attention span. The industry's environmental impact is a key issue, yet the companies that produce such models have stayed remarkably quiet about the amount of energy they consume, probably because they don't want to spark our concern. Google's global datacenter and Meta's ambitious plans for a new AI Research SuperCluster (RSC) further underscore the industry's energy-intensive nature, raising concerns that these facilities could significantly increase energy consumption. Additionally, as these companies aim to reduce their reliance on fossil fuels, they may opt to base their datacenters in regions with cheaper electricity, such as the southern US, potentially exacerbating water consumption issues in drier parts of the world. Before making big announcements, tech companies should be transparent about the resource use required for their expansion plans. Good luck with that, as people are too focused on distractions and lack the need to focus on important matters. As some of you pointed out to me last week during the powerful expose pieces talking about nearly 1M deaths due to pharma drugs, some focused on my mispronunciations of the drug names. It is telling in overview and why problems don't go away and worse, exacerbate.

Furthermore, while minerals such as lithium and cobalt are most commonly associated with batteries in the motor sector, they are also crucial for the batteries used in data centers. The extraction process often involves significant water usage and can lead to pollution, undermining water security. The extraction of these minerals are also often linked to human rights violations and poor labor standards. Trying to achieve one climate goal of limiting our dependence on fossil fuels can compromise another goal, of ensuring everyone has a safe and accessible water supply. Classic ouroboros again, but it is delusional to think they are limiting our dependence on fossil fuels, as there is zero evidence of any pull back from it, particularly relating to oil. AI likely to increase energy use and accelerate climate misinformation – report Moreover, when significant energy resources are allocated to tech-related endeavors, it can lead to energy shortages for essential needs such as residential power supply. Recent data from the UK shows that the country's outdated electricity network is holding back affordable housing projects. This will only get worse as households move away from using fossil fuels and rely more on electricity, putting even more pressure on the National Grid. In Bicester, for instance, plans to build 7,000 new homes were paused because the electricity network didn't have enough capacity. Utterly embarrassing for a so-called first world country. The reality is Britain, Canada, America and several EU countries are miles behind in infrastructure, transport and development of their lands, all due to almost zero levels of investment. Next in the article the author supplies solutions to fix things, what a novel idea that is. In an era where we expect businesses to do more than just make profits for their shareholders, governments need to evaluate the organizations they fund and partner with, based on whether their actions will result in concrete successes for people and the planet. In other words, policy needs to be designed not to pick sectors or technologies as winners, but to pick the willing, by providing support that is conditional on companies moving in the right direction. Making disclosure of environmental practices and impacts a condition for government support could ensure greater transparency and accountability. Similar measures

could promote corporate accountability in global mineral supply chains, enforcing greater human rights compliance. In navigating the intersection of technological advancement and environmental sustainability, policymakers are facing the challenge of cultivating less extractive business models. This is not just about adopting a piecemeal approach; it's about taking a comprehensive systematic view, empowering governments to build the needed planning and implementation capacity. Such an approach should eschew outdated top-down methods in favor of flexible strategies that integrate knowledge at all levels, from local to global. All very Blueprint that. Only by adopting a holistic perspective can we effectively mitigate the significant environmental impacts of the tech industry. Ultimately, despite the unprecedented wave of innovation since the 1990s, we have consistently overlooked the repercussions of these advances on the climate crisis. As climate scientists anticipate that global heating will exceed the 1.5C target, it's time we approach today's grand challenges systemically, so that the solution to one problem does not exacerbate another. We will ignore the fake climate crisis part and their global warming nonsense, but the author was speaking of ouroboros programs – Oh my.

I warned of this around the time early in the Covid crisis, the kickback would allow some people to change and no longer work, which can be beneficial in some aspects, but sadly that extra time is not used for empowerment and lifestyle improvements, as the UBI report recently proved. The kickback I warned was related to county and state taxes, well now that is starting to kick in. Washington state is losing \$1.5 billion in taxes, because many parents have stopped working and are taking care of their children at home, according to a new report. Child care costs have reached record highs in the period of inflation that arrived after the Covid-19 pandemic. According to the U.S. Census Bureau, in 2021, child care ranged from \$4,810 a year for a school-age child to \$15,417 for infant care, depending on the location. In Washington, the number reaches \$1,050 a month for parents to find care for just one child, making it one of the most expensive states to have and raise a child, according to child care marketplace Winnie. Washington residents in this regard are facing the concerns that many other parents are in states across the country. Child care costs have increased substantially over the past two decades, leaving some parents to drop out of the workforce because that's actually the more financially viable option for them. Those costs are making a significant impact in Washington, where the lost family income, turnover and absenteeism was estimated to cost \$6.9 billion in 2023, according to a report from public policy research firm ECONorthwest. When split among all 7.95 million Washington residents, that would amount to a cost of \$870 each, and a gross state product loss of \$6 billion. In all, looking at lost state, federal and local taxes, Washington parents not working because of child care needs, cost nearly \$1.5 billion, the report found. In the report, which surveyed 600 residents who take care of children, 74 percent of parents of children 12 or younger said the cost, quality or availability of child care presented significant challenges to their ability to work, and they estimated missing five working days per year because of child care disruptions. Forty percent said they had quit or were fired from a job because of child care disruptions, and the majority, 62 percent, missed at least one day of work because of child care

issues in the last three months. People are missing work due to child care issues and are quite often fired from their jobs due to absenteeism, Thompson said. Economically, this is a substantial loss in regard to taxation and revenue from state local governments. But where is the tolerance with employers on this matter? This is why many businesses go bust, due to intolerance, greed based owners and a lack of work flexibility programs. Why where possible can medium to large businesses provide a low cost creche into their operations? Surely that will allow the retention of employees, as the cost of retraining new employees is money that could have been saved, never mind the disruption of an employee leaving. Now the states are facing the backlash of the stupidity of following the Covid program.

#### EXPOSE:

Recently we mentioned a group called JASON and their secretive nature that is connected to rogue elements behind the US government, Agencies and in my opinion they are connected to the former Majestic group. JASON is an independent group of elite scientists that advises the United States government on matters of science and technology, mostly of a sensitive nature. The group was created in the aftermath of the Sputnik launch as a way to reinvigorate the idea of having the nation's preeminent scientists help the government with defense problems, similar to the way that scientists helped in World War II but with a new and younger generation. It was established in 1960 and has somewhere between 30 and 60 members. Its work first gained public notoriety as the source of the Vietnam War's McNamara Line electronic barrier. So what was the electronic barrier line, sounds like another use of technology way ahead of the public's knowledge. The eastern part included fortified field segments, with Khe Sanh as linchpin, along with stretches where roads and trails were guarded by high-tech acoustic and heat-detecting sensors on the ground and interdicted from the air. Assorted types of mines, including so-called gravel mines, and troops at choke points backed sophisticated electronic surveillance. Also in late 1965 or early 1966, Jerry Wiesner and George Kistiakowsky persuaded McNamara to support a summer study program in Cambridge for the group of 47 prominent scientists and academics that made up the JASON advisory division of the Institute for Defense Analysis. No surprise both those men were Jewish, who were also a part of the Manhattan Project as well. Although most of its research is military-focused, JASON also produced early work on the science of global warming and acid rain. Current unclassified research interests include health informatics, cyberwarfare and renewable energy. In other words, think tank clowns.

#### Activities:

For administrative purposes, JASON's activities are run through the MITRE Corporation, a not-for-profit corporation in McLean, Virginia, which operates Federally Funded Research and Development Centers (FFRDCs) for the federal government. All of which sounds like black budget funding and in overview money

laundering. Remember most if not all Federal companies are NGO's, so no accountability. The Department of Defense ended its contract with MITRE in April 2019, effectively cutting ties with JASON. However, due to the efforts of the Department of Energy as well as others within the government, to include an act of Congress, the contract was reinstated and is now again with the Department of Defense. That sounds like faction fighting and also potentially leveraging given they reinstated the contract.

JASON typically performs most of its work during an annual summer study. Why do they only work in the summer? Is that a climate issue for these people? Are they people is the great question? Its sponsors include the Department of Defense, the Department of Energy, and the U.S. Intelligence Community. The Department of Energy seems to be involved in an awful lot of stuff external of energy. Why are they involved with the war department? Most of the resulting JASON reports are classified. But did anyone ask as to why? Why so many secretive groups, does that not imply the groups are operating against the people? If the people have to fund these enterprises, why are they not allowed to hear about it? Investigate it or question the policies or monetary aspects of the group? The name "JASON" is sometimes explained as an acronym, standing either for July August September October November, the months in which the group would typically meet; or, tongue in cheek, for Junior Achiever, Somewhat Older Now. However, neither explanation is correct; in fact, the name is not an acronym at all. Mildred Goldberger, wife of group member Murph Goldberger, disliked the name given by the Pentagon, Project Sunrise, and suggested the group be named Jason, inspired by the mythological character Jason. Notice another a Jewish group member steps forward as a speaker, common theme. Jason was married to the sorceress Medea, seems the modern version Media the sorceress of lies is a direct copy of that period. JASON studies have included a now-mothballed system for communicating with submarines using extremely long radio waves (Project Seafarer, Project Sanguine), an astronomical technique for overcoming the atmosphere's distortion (adaptive optics), the many problems of missile defense, technologies for verifying compliance with treaties banning nuclear tests, a 1979 report describing CO<sub>2</sub>-driven global warming, and the McNamara Line's electronic barrier, a system of computer-linked sensors developed during the Vietnam War which became the precursor to the modern electronic battlefield. In other words, only interested in the war machine, weapons, programs and killing people.

Among the more recent activities was a non-consensus-commensurate (in other words, providing a view alternative to the prevailing one in the federal executive department which commissioned the report), and now declassified, report to the State Department dismissing sounds associated with the Havana syndrome cases as caused by crickets as opposed to microwave weapons. This was followed by a 2021 report, in which JASON again found no compelling evidence that the anomalous health incidents (AHI) were caused by a deliberate attack using a radio-frequency or any other directed energy weapon. Like the media then, they lie, why? Because it was likely this group who invented the weapons. There is/was another secret group people have never heard of called the Prometheus group. A group of very talented individuals on an earthly and

cosmic level. They were brought together by cherry picking out of Universities and also the data-mining tests to improve humanity they were told. They were lied to and were producing technology and results that actually harmed humanity, at least one of that group stepped away from it and revealed small portions of it to me. One of the details was a video showing competent robot making in the 1970's, Musk and Co. are not working towards building competent robots, they already have them.

#### Membership:

JASON members, known informally as "Jasons," include physicists, biologists, chemists, oceanographers, mathematicians and computer scientists, predominated by theoretical physicists. Most theoretical physicists work on advanced weaponry only, as it appears to me. Takeaway the computerized advancements of the last 35 years and what life improvements have any scientists come up with, that actually benefits the people? None, no cancer, flu or common cold cure, no environmental helping technology, no advancement in airlines, cars, trucks, trains, no energy improvements that are discernable. It is like the world stopped in the early 1900's all except one category, the war machines. They are selected by current members, and, over the years, have included eleven Nobel Prize laureates and several dozen members of the United States National Academy of Sciences. Like a 33<sup>rd</sup> degree Mason, it is invite only. Claire Ellen Max was the first female scientist invited to join in 1983. All members have a wide range of security clearances that allow them to do their work. If they were doing stuff beneficial to humanity, they would not need security clearances. The founders of JASON include John Wheeler and Charles H. Townes. Other early members included Murray Gell-Mann, S. Courtenay Wright, Robert Gomer, Walter Munk, Hans Bethe, Nick Christofilos, Fredrik Zachariasen, Marshall Rosenbluth, Ed Frieman, Hal Lewis, Sam Treiman, Conrad Longmire, Steven Weinberg, Roger Dashen, and Freeman Dyson. Some Nobel Prize-winning members of JASON include Donald Glaser, Val Fitch, Murray Gell-Mann, Luis Walter Alvarez, Henry Way Kendall, and Steven Weinberg. Notice the Manhattan Project names within that list? And also the several Jewish names again. People may label that antisemitic, but the question remains as to why there is a high proportion of Jewish people involved in secretive, anti-humanity groups and projects?

#### Chairs: In chronological order:

Marvin Leonard Goldberger (1960–1966), Harold Lewis (1966–1973), Kenneth M. Watson, Edward A. Frieman, Richard Garwin, William Nierenberg, William Happer (1987–1990), Curtis Callan (1990–1995), William H. Press (1995–1998), Steven Koonin, Roy Schwitters (2005–2011), Gerald Joyce (2011–2014), Russell J. Hemley (2014–2019), Ellen D. Williams (2019–present)

Again notice the Jewish presence and the last person who quit last year, Ellen D. Williams works for another secret project called ARPA-E, which is a subsidiary of DARPA. She also wrote 4 published papers on one topic from 2007-2011, on graphene. Was that research then used in the graphene based vaccines? Remember the Rockefellers started the proposal for the jabbing of people with technology around 2009-10, as we exposed in the Expose series.

Early history:

In 1958, a military-issues physics summer study program named Project 137 was launched by physicists John Archibald Wheeler, Eugene Wigner and Oskar Morgenstern. Participants included Murph Goldberger, Kenneth M. Watson, Nick Christofilos and Keith Brueckner. Out of that program came the idea of a permanent institution for advanced scientific research, a proposed National Defense Institute, on behalf of the Department of Defense. Wheeler was offered such a position by DARPA's Herb York but turned it down, having put in the effort to establish Project 137. Murph Goldberger also turned down the request. However, in December 1959 Marvin Stern, Charles H. Townes, Keith Brueckner, Kenneth M. Watson and Marvin Leonard Goldberger met in Los Alamos. Where several of them had been working on nuclear-rocket research and launched JASON as an ongoing summer study program, with financial and administrative support supplied by the Institute for Defense Analyses. In other words they created their own private department with no oversight and out of the range of the government. In the early 1960s, JASON had about 20 members. By the end of the decade it had grown to over 40 members, with close ties to the President's Science Advisory Committee. In the early 1970s the backing institution for JASON was changed from IDA to SRI. So they went from the Institute Defense Association to SRI which is another private group headquartered in Silicon Valley. And we all know they have never done anything beneficial for the people. Silicon Valley is largely ran by the CIA and so JASON is another of their subsidiaries under their control. All very Majestic 12 I have to say.

Vietnam War:

The Vietnam War had a significant effect on JASON's membership and research focus. A major initiative of JASON became the McNamara Line electronic barrier, promoted by the hawks. According to Freeman Dyson, a member of JASON, this research was actually not carried out by JASON, but by a group called JASON EAST. By around 1966, the team had become strongly divided along political and ethical lines. In March 1967, Freeman Dyson, Robert Gomer, Steven Weinberg and S. Courtenay Wright produced a report, approved by Secretary of Defense Robert McNamara and titled Tactical Nuclear Weapons in Southeast Asia. Declassified in 2002 through a Freedom of Information Act action brought by the Nautilus Institute, the paper predicted catastrophic consequences for U.S. global interests, as well as for the people and environment of

Southeast Asia of a tactical nuclear weapons strike in the area. Going into great detail, the paper strongly contradicted game-scenario research from the RAND Corporation and other groups, that was optimistic about a nuclear option. That is the simulation machine they use to make decisions for them. So, the psychopaths wanted to nuke Vietnam as well as Japan, no surprise the RAND Corporation was involved as well. Co-author Wright later stated that the report's main finding, was that employment of nuclear weapons by the US would be of little use against a widely distributed opponent, but disaster if copied by the opponent. In a nuclear counterstrike against U.S. troops, the report concluded that, in the worst-case, the U.S. fighting capability in Vietnam would be essentially annihilated. Co-author Weinberg showed the political point of view of the writers and the increasing political division: I have to admit that its conclusions were pretty much what we expected from the beginning, and if I had not expected to reach these conclusions then, for the ethical reasons that we left out of the report, I would not have helped to write it. Yet nobody to this day can adequately state as to why the US had to go to Vietnam in the first place. Vietnam did not attack America, it was in an engineered war between North and South, just like the American Civil war. All divide and conquer you see, but as always it is the people that lose out. Seymour Deitchman, a national security consultant who served with the IDA for over 28 years, said, to the extent of my personal knowledge, the talk of using nuclear weapons in that war stopped after the JASON report on the subject. Gordon J. F. MacDonald, executive vice president of IDA at the time, reflected on the JASON report in 1998. MacDonald said that the grim picture painted in the report had a major effect on both Johnson and McNamara. It was central to McNamara's differences with the Joint Chiefs of Staff, who were sanguine about the nuclear option; this ultimately led to McNamara's resignation. RAND experts also conceded the report's credibility. There arose internal conflict between hawkish JASON members such as William Happer, Edward Teller and William Nierenberg and others such as MacDonald, Sid Drell, and Richard Garwin. Public attention to JASON's involvement in the Vietnam War led to public criticism and attacks, even against JASON members who were not hawks; for example, MacDonald's garage was burned down and Richard Garwin was called a baby killer. Around this time, some members critical of the war left, and others directed JASON research into unclassified, non-military work on behalf of the U.S. Department of Energy on problems like global warming and acid rain. Global warming is a fake program and acid rain was created by these same think tank military clowns via chemtrails.

JASON was involved in several military studies as you will find out in this list. But also notice the frequency of being involved in health data and research, DNA and Genome testing and future programs to work against the people.

JASON studies include:

Late Stage of Rayleigh-Taylor Instability (August 1961); Air-Sown Mines for the Massive Barrier (August 1966); Manned Barrier Systems: A Preliminary Study (August 1966); Air-Supported Anti-Infiltration Barrier

(August 1966); Tactical Nuclear Weapons in Southeast Asia(March 1967); Oil Pollution in the Sea: Problems for Future Work (June 1968); Generation and Airborne Detection of Internal Waves from an Object Moving through a Stratified Ocean, Vol II (April 1969)

Report of the 1971 JASON Laser Summer Study. Volume I. Recommendations and Conclusions (1971); Report of the 1971 JASON Laser Summer Study. Volume II. Supporting Appendices A-M (1971); Wake Collapse in a Stratified Fluid: Linear Treatment (September 1971); Internal Wave-Surface Wave Interactions Revisited (March 1972); Collected working papers on internal—surface wave interactions and related problems (August 2, 1972); The effect of surface currents on the equilibrium surface wave spectral energy density (October 1973); Low frequency sound propagation in a fluctuating infinite ocean (April 1974); Low frequency sound propagation in a fluctuating infinite ocean (April 1974); Low frequency sound propagation in a fluctuating infinite ocean II (June 1975); Laser Propulsion Study (Summer 1977); Sonic Boom Report (November 1978)

The Long Term Impact of Atmospheric Carbon Dioxide on Climate: preliminary report (1979) and (1980) a more fully published as MacDonald et al., (1982); SEASAT Report (March 1984); SEASAT III & IV (August 1984); Multiple scattering effects in radar observations of wakes (August 1984); SEASAT Report (January 1985); Seismic discrimination (April 1985); Submarine detection: Acoustic contrast versus Acoustic glow (July 1985); Development stability of strategic defenses (October 1986); Occultation study summary (February 1987); JASON study on OTHB radars (1987); Neutrino Detection Primer (March 1988); Airships (1988); JASON Review of Brilliant Pebbles, Vol. I, Executive Summary (September 1989)

Detecting the greenhouse signal (May 1990); High gain arrays /draft/ (July 1990); Verification Technology: Unclassified Version (October 1990); ARM /draft/ (July 1991); Small satellite and RPAs in global change research /draft/ (August 1991); Small Satellites (August 3, 1991); ARM review 1991 /draft/ (September 30, 1991); JASON Global Grid Study (July 1992); SCHAMMP (Dec 1992); Verification of dismantlement of nuclear warheads and controls on nuclear materials (January 1993); Small satellites and RPVs (January 1993); Clouds and radiation – a premier (January 1993); Underwater explosions ONR/DNA/NAVSEA /draft/ (January 1994); CO<sub>2</sub> greenhouse mitigation (May 1994); ARM /draft/ (July 1994); Counter proliferation /draft/ (August 1994); MTPE /draft/ (August 1994); LIDAR (September 1994); Science based stockpile stewardship (November 1994); Jason Final Report, January 1995); JASON Nuclear Testing Study: Summary and Conclusions (1995); Micro surveillance of the Urban Battlefield (February 1995); Accelerator based conversion of plutonium (March 1995); Accelerator production of tritium - 1995 review (June 1995); JASON Nuclear Testing Study: Summary and Conclusions, August 1995); DNA Computing (October 1995)

Inertial Confinement Fusion (ICF) Review (March 1996); Quantum Computing (July 1996); New Technological Approaches to Humanitarian Demining, November 1996); Subcritical Experiments (March 1997); Small Scale Propulsion: Fly on the Wall, Cockroach in the Corner, Rat in the Basement, Bird in the Sky (September 1997); Human Genome Project (October 1997); High Energy Density Explosives (October 1997); Counterproliferation (January 1998); Signatures of Aging [of nuclear weapons] (January 1998); Signatures of Aging Revisited (March 1998); Small Unit Operations (June 1998); Electro Thermal Chemical Gun Technology Study (March 1999); Non-destructive Evaluation and Self-Monitoring Materials (April 1999); Characterization of Underground Facilities (April 1999); Remanufacture (of Nuclear Weapons), (October 1999); System-Level Flight Tests, (December 1999); Primary Performance Margins (December 1999) (unclassified introduction)

Data Mining and the Human Genome (January 2000); 100 LBS TO Low Earth Orbit (LEO): Small-Payload Launch Options, (January 2000); Power Sources for Ultra Low Power Electronics, (June 2000); Molecular Electronics: Interfacing the Nano- and Micro-Worlds, (May 2000); Imaging Infrared Detectors II, (June 2000); Space Infrastructure for 2020, (September 2000); Advantage of Base-Line Redundancy in Sparse Apertures, (September 2000); Imaging Infrared Detectors II, (October 2000); Spintronics, (February 2001); Bio futures, (June 2001); Radiological Weapons, (2002); Non-GPS Methods of Geolocation, (January 2002); Atmospheric Radiation Measurement (ARM) Program, (April 2002); Opportunities at the Intersection of Nanoscience, Biology and Computation, (November 2002); Bio detection Architectures, (February 2003); High Power Lasers, (April 2003); Turbulent Boundary Layer Drag Reduction, (May 2003); Portable Energy for the Dismounted Soldier, (June 2003); Requirements for ASCI, (October 2003); The Computational Challenges of Medical Imaging, (February 2004); Active Sonar Waveform, (June 2004); Horizontal Integration: Broader Access Models for Realizing Information Dominance (December 2004); Sensors to Support the Soldier (Feb. 2005); High Performance Bio computation (March 2005); Quantifications of Margins and Uncertainties, (March 2005); Tactical Infrasound (May 2005); NIF Ignition (June 2005)

Reducing DoD Fossil-Fuel Dependence, (September 2006); Engineering Microorganisms for Energy Production, (June 2006); DAHRT, (October 2006); Pit Lifetime, (January 2007); Reliable Replacement Warhead Executive Summary, (September 2007); Navy Ship Underwater Shock Prediction and Testing Capability Study, (October 2007); Wind Farms and Radar, (January 2008); Microbial Forensics, (May 2008); Human Performance, (March 2008); High Frequency Gravitational Waves, (October 2008)

Science of Cyber-Security, (November 2010); The \$100 Genome: Implications for the DoD. (November 2010) in timing with Project Lockstep; Impacts of Severe Space Weather on the Electric Grid, (November 2011); Compressive Sensing for DoD Sensor Systems, (November 2012); A Robust Health Data Infrastructure, (April 2014); Data for Individual Health, (November 2014); Artificial Intelligence in Health

and Healthcare, (December 2017); Fundamental Research Security, (December 2019); Managing the Risk From Covid-19 During a Return to On-Site University Research, (August 2020)

Apart from the war based operations, the frequent dip into the health sector along with mapping and data is the most alarming thing connected with this group.

Research:

About half of JASON's work is classified, ranging from recommendations on the United States nuclear arsenal and missile defense, to electronic surveillance and cyber-security. Much of JASON's public work has involved energy and the environment, including Gordon MacDonald's project to model climate change that soon convinced him that fossil-fuel burning would lead to dangerous global warming, that would outstrip any industrial cooling effects. For decades, MacDonald was a prominent scientific advocate for action on climate change. Current JASON energy research has included reports on advanced biofuel production and how to reduce the Department of Defense's carbon footprint for strategic and environmental reasons. How about reducing the destruction of the planet by increasingly destructive weaponry? Does any of these clowns not ask, what is the war machine doing to the environment? No, too busy making clown statements like cows farting causes global warming, utter jackasses. However, several other members of JASON, including past chairs Nierenberg, Happer and Koonin, have cast doubt on climate science and policies that would limit the use of fossil fuels. I guess it depends upon whether you get oil kickbacks of whether you support it or not.

Recent history:

In 2002, DARPA decided to cut its ties with JASON. DARPA had not only been one of JASON's primary sponsors, it was also the channel through which JASON received funding from other sponsors. DARPA's decision came after JASON's refusal to allow DARPA to select three new JASON members. Since JASON's inception, new members have always been selected by its existing members. After much negotiation and letter-writing, including a letter by Congressman Rush Holt of New Jersey, funding was subsequently secured from an office higher in the defense hierarchy, the office of the Director, Defense Research & Engineering, name changed to Assistant Secretary of Defense (Research & Engineering) in 2011. In 2009, JASON issued its classified recommendations on the future of the United States nuclear arsenal, finding that a new generation of nuclear weapons was unnecessary. In 2010, JASON issued recommendations for the Department of Defense to support cyber-security research. In 2011, the panel published a public analysis of and recommendations for international greenhouse gas monitoring by the United States government. In 2014, the panel published results of its 2013 summer-study focus on health information exchange. In April 2019, JASON lost its contract with the Department of Defense. On 28 March, Representative Jim Cooper (D-TN),

who chairs the strategic forces subcommittee of the House Armed Services Committee, revealed that the MITRE Corporation, a nonprofit based in McLean, Virginia, that manages the JASON contract, received a letter from the Department of Defense ordering it to close up shop by 30 April. McLean, Virginia is Langley and the CIA country. However, on 25 April 2019 the National Nuclear Security Administration in the Department of Energy offered the group an 8-month contract that would continue to employ JASON. One has to ask as to why the Nuclear side of the Department of Energy would employ this dark agenda and programming think tank group at all? One also has to ask as to why the Pentagon dropped them? And more importantly, who or what replaced them? All that research and funding and nothing beneficial for the people came out of it, is the most damaging thoughts. But in reality, no research is done for the benefit of the people and that has to change going forward.

#### FHSTOS SECTION:

There has been many stories covered up about ancient history as we know and in particular about the giants that were once here in abundance. As bodies are found or dug up of these mammoth giants, there are institutions then going around and removing them and covering up the story. All of which reveals, the giants where not our friends. The giants like the dinosaurs where also in Arizona and some evidence of the former was unearthed by a THI trip there two years ago. Redhaired giants once lived in the North Americas. The animals were also bigger at that time. But these particular giants were evil and those giants had a penchant for humans and consumed them. After the giants just disappeared from a his-story perspective, with no clue as to how they just disappeared, the reality is they were extinguished by the Rus and possibly the URs. Remember the UR's also included some of the Greek and Nordic gods, who are both stated as slaying the giants, even in their story. After the giants removal then the Rus-Aryan-Slavs came into the Americas. They were called the Wa-gas, the white people by a tribe in California, already lived in North Americas, Middle Americas and the South Americas. Then the "Indians" arrived from India. Is it possible the word Waga derives from the word swaga? That may well be the case. There are many northwestern traditions which talk about a race of giants dwelling in the remote mountains of northern California, and also a mysterious spirit-people, the Wa-gas, (designated as Woge, Woga, or even Little People or the Star People in other variations of the legend) who inhabited these lands in ancient times and then mysteriously vanished.

In some traditions, the Woga were said to have left for the heavens from the sacred high country, presumably mountaintops, but a number of them chose to remain behind here on Earth and serve as stewards of the land and conduits to the spirit world. The Wagas resided in sacred natural dwellings which were viewed as portals to another realm through which they could pass back and forth. The Whites taught the Natives their arts and sciences, and the two lived together in peace and happiness. They lived together for centuries, maybe even thousands of years. The Whites once hastily left North, but also left by Vitmara and Vitmanas. The Natives

did not know why the whites left, only that they had promised one day to return. That has not happened yet, but some of us think that could well change soon. When Conquistadors and others came to the Americas, the natives thought that the great white men of ancient times had returned. But these false white men brought epidemics, whiskey and rape to the tribes. Perhaps the line we came in the form of the enemy makes more sense now? Perhaps the story of Avatar 3, was about the fall of the natives and their precious way of living with the great teachers of the past? Until the Cosmic Genetic crew came in, all looking very white by skin, but not by DNA. But many of them still lived their lives, just as they were when living together with their white teachers. Perhaps at some point all American Native tribes were taught by the whites and thus they had a very high culture back then. I would suspect that the natives taught were more of the red race of the natives, but they did try to teach everyone. All of which was revealed by the EBE in the Aztec crash, of how the natives long in the past where much more advanced than the modern day ones.

So how and why did it change? Well lessons learned were ignored or forgotten and a multitude of wars between the tribes ended much of their numbers, long before the so-called Spanish came, when actually they were the Sephardic Jews. All courtesy of the name changer club as Theodoros Griego became Christopher Columbus. Who was a Greek Jew that was raised in Genoa, Italy, and later declared Spanish by HIS-story. He was the last in line of hundreds to “find” the alleged new continent known as America. <https://www.youtube.com/watch?v=JMOmkBWisFM> His name Ferens = Roman - Latin name, out of Egypt. He essentially went from a pirate to iconic hero, in classic Hollywood and biblical scripts. But, he and his 2 brothers slaughtered around 10 million peace-loving Natives in the Caribbeans through torture. Natives living in the old and real white-man traditions, did not have weapons, they never needed them as they lived peacefully alongside the white race. Who were said to have been all across the Americas, thousands of years before the Natives themselves. Today those tribes are called Yurok, I wonder in the past if it was Ur-ok?

In FHSTOS we spoke about the unknown holocaust of 80-90M Russians between WW1 and WW2, plus the ongoing genocide in between the wars. But there was another smaller version of a holocaust done right at the end of the war, that was completely unnecessary in the scheme of the war. Yet again his-story is repeating itself, as we will see. At the end of WW2, at a time when the German army was all but defeated and retreating on all fronts, the Allied forces launched a joint British and American indiscriminate aerial fire bombing attack on the city of Dresden, the capital of the German state of Saxony. Dresden was a cultural landmark with little strategic significance, whose main export was dolls and cigarettes and provided no value to the German war industry. At that time, it housed hundreds of thousands of refugees that fled from the east, as it was one of the only cities that remained relatively untouched from the war. The purpose of the attack was to inflict maximum civilian casualties possible and to decimate the refugees that had fled there. Just like what is happening in Gaza now, tell the people to evacuate to a region then cowardly bomb them into oblivion, just pure evil. In a memo sent to the Chiefs of Staff Committee by Air Marshal Sir Douglas Evill on 1 February, Evill states

interfering with mass civilian movements was a key factor in the decision to bomb the city center. Attacking main railway junctions, telephone systems, city administration, and utilities would result in chaos. Estimates total the number of civilians casualties from the bombings to be around 200k-500k, including innocent men, women, and children who suffered the most brutal fate imaginable. Bodies were incinerated and reduced to puddles of congealed fat on the concrete as temperatures reached 3000 degrees Fahrenheit. Nothing in sight was left standing. Those who made out alive were then targeted in the subsequent waves of attacks by allied bombers. Allied propaganda has re-written history to claim the total number of casualties to be around 25k in order to cover up their involvement in a genocide of the German people, and one of the most horrific crimes against humanity to ever be committed to date.

Why isn't this holocaust in schools? Where are the museums and memorials to commemorate it? Why weren't they paid out reparations? Where are the laws criminalizing the trivialization of the number of casualties in the historical record? He noted that the ensuing chaos would hamper Wehrmacht reinforcements which were moving up to meet the Russian advance. Evill wrote: Evacuees from German and German-Occupied Provinces to the east of Berlin are streaming westward through Berlin itself, and through Leipzig, Dresden and other cities in the East of Germany. The administrative problems involved in receiving the refugees and re-distributing them are likely to be immense. All about the shekels again. The strain on the administration and upon the communications must be considerably increased, by the need for handling military reinforcements on their way to the Eastern Front. A series of heavy attacks by day and night, is likely to create considerable delays in the deployment of troops at the Front, and may well result in establishing a state of chaos in some or all of these centers. Less than two weeks later, the bombing of Dresden began. Like when Japan was about to surrender they did Hiroshima, like when WW2 was about to end they did another Hiroshima style event in Dresden. Neither where necessary, both were a death and destruction events to disturb the psyche of the locals for generations. The same is happening now in Gaza and Yemen, next Lebanon, Syria and potentially Jordan, after that Turkey. Well good luck with that, because the end is coming for the dark forces of this world, sadly the US who hijacked America is part of it. Buckle up, strap in and drop your fear, it is the wild ride time.

#### MYSTERY SECTION:

In an announcement from China's Institute of Geology and Geophysics, the country's low latitude long range ionospheric radar (LARID) detected plasma bubbles above the Midway Islands and Egypt's Great Pyramids. The detection of equatorial plasma bubbles (EPBs) that can occur in the Earth's ionosphere. This technology will help supplement other data supplied by NASA's Global-scale Observations of the Limb and Disk (GOLD) mission, which similarly studies this atmospheric phenomenon. For the first time, China's powerful low-latitude, long-range ionospheric radar (LARID), located on Hainan Island, has detected plasma bubbles above

the Midway Islands and perhaps more ominously the pyramids of ancient Egypt. But let's just get this out of the way right off the bat: it's not aliens. Instead, these well-known space weather anomalies are called equatorial plasma bubbles (EPBs), and they occur in the region of the Earth's atmosphere known as the ionosphere. Here, the Sun's UV light knocks electrons loose from atoms, forming a diffuse layer of ions extending from 50 to 400 miles above the surface. However, sometimes, pockets of density irregularities form in the ionosphere and lead to a depletion of ions, which can significantly impact radio and satellite-based communication.

On August 27, the Institute of Geology and Geophysics—a part of the Chinese Academy of Sciences—announced that LARID detected these plasma bubbles during a solar storm back in early November of 2023. With a detection range of nearly 6,000 miles, LARID can detect these bubbles as far as Hawaii in the east or Libya in the west by blasting high-powered electromagnetic waves into the ionosphere, which can then bounce along vast distances. If this powerful wave encounters a bubble—which can sometimes grow to a couple hundred miles in diameter—the wave reflects and is then received by a suite of transceiver antennas. Interesting article, but I suspect they are not well-known space weather anomalies at all, otherwise they would not write about it. Perhaps the frequency changes are creating these bubbles due to a harmonic resonance, that certain clowns wish to stop with their radar machines? It won't work – just saying.

This was written by a member and bear deeper thinking upon in the now and the future. The consciousness of lack is a thread that's woven-into the tapestry of the human psi-che. It's part and parcel of the 7-deadly sins which are about coverted-ness leading to co-dependency, in an unconscious attempt to possess what is perceived to be missing. The Blue Print for Humanity is an opportunity for a new beginning. It's a beginning that inspires a co-operative mindset through the implementation of the 7-Ethical Codes of Conduct leading to a more fulfilling lifestyle. It's the journey towards sovereignty.

For those new and a reminder for long time members. Are the moons unnatural to the solar system? Does it bring good or bad tid-ings? Something to consider: The moon is not a natural object. The moon is a technological anomaly. In the past the moon object (dark) began to replace the light (sun) The moon is a lifeless object. The sun is the life giving object. Cultures who adopted the moon calendar all fell into darkness. The moon is symbolized by Lilith, half woman half serpent who captured and sacrificed children at night. The moon wrapped all women into the sacrificial blood cycle of 28 days. The moon is represented by the Kali Ma, who taught all the moon cultures to sacrifice their children. The Kali Ma is the dark mother or black Madonna. Astrology is flawed as one zodiac is missing - Ophiuchus - which just happens to represent the serpent - hence Lilith. In light of, are all moons unnatural to a solar system, involved a deeper pondering of sorts. Are all moons just rocks turned into technological based crafts?

Is there evidence of such? Yes our own moon, it is mathematically impossible to be in an exact space to create an eclipse, to symbolize the black sun. What I am saying is, it could not have just arrived in orbit around our planet with the exact measurement to create full eclipses, what I'm saying is, it was placed there or better described as being driven there. Some Native Americans say this current moon arrived around 11500- 12500 years ago, which is just after the flood. Who brought it here and why? The Kosheys and to create the Saturn/Moon Matrix, why Saturn? Because it was once a sun I was told long in the past, hence the 7 planets not 8 following the removal of Pluto. But Pluto itself could possibly be an oversized "moon" given its relative size. The moon helps with the ocean tides according to our scientists, but is this true? Because according to the original description of the word tide, it appears not and has potentially more sinister and controlling natures. Middle English tide means time or season; recurring interval, space of time, especially as regards a particular purpose or natural process. From Old English *tīd* point or portion of time, due time, period, season; feast-day, canonical hour. From Proto-Germanic *\*tīdi* meaning division of time, source also of Old Saxon *tid*, Dutch *tijd*, Old High German *zit*, German *Zeit* time, according to Watkins from PIE *\*di-ti-* division, division of time, suffixed form of root *\*da-* to divide. Tide means time, recurring intervals related to space time? Now given what we know about time and the Merkaba of time, plus time is but a mere illusion, is interval related to time – a loop? Feast day and canonical hour, brings in the church and their sacrifice feast and ritual days. Division of time which leads to the organization and creation of system, mainly of control. Because time is a means of control, whether that is work related or based at home, plus the division of night and day, which is the symbolized into dark and light or the yin and yang. The clock or the c-lock and the division of time has been used to enslave people by labor, hence the clock in and clock off mechanism of control used by the corporates. So does the moon bring to us good tides or bad tidings?

#### UPDATED INTEL:

The latest assassination attempts on Trump, two this week not one, are in my mind pure theater and means Trump is involved in it all. The guy Routh has 70 convictions for heavy crimes including the use of a machine gun, yet never served any time in prison. That is a Manchurian MK Ultra style candidate pure and simple, if they wanted Trump gone, he would be gone. Trump and the Republicans received \$100M of anti-humanity money for securing the Israeli embassy in Jerusalem. He has received another \$100M, I wonder what that is for? In my opinion at this point, if you are following Trump, you are just nowhere near as awake as you may think you are. All hail the vaccine king, is Stockholm Syndrome on steroids, he and his anti-humanity buddies are laughing at us hysterically. Word of warning to them, not for long. The coming word of the day, week, year and decade is – pariah. Ironically the word pariah means one that is cast out of their caste, and is most commonly associated with India. And we all know who came out of India by now. If you are new read our book FHSTOS available at Lulu.com.

The Houthis in Yemen hit a target in Israel with a missile that the Israelis could not take down, despite the media reporting it landed nowhere. Meaning our reports of the Iron Dome not working recently was correct. In further news Hezbollah hit a Mossad 8200 Base near Tel Aviv with attack drones that killed 22 and 74 injured. Seems the Israelis now are very vulnerable and wide open to attacks should they continue their genocide program. It is also rumored that 2 million Israelis are wishing to leave the occupied state, seems they have had enough also. In the West Bank it will be deliberately set under a severe starvation program. Netanyahu will have to face the Courts again in December, regarding serious corruption, when he really should be facing genocide charges.

As for Ukraine, their combat forces can no longer perform as they have little to no weapons, shells or missiles left available. NATO is said to have hardly any left either, added to America's shortage of available weaponry as well, leaves the EU and America now vulnerable to attack.

An update with regards to firing missiles deep into Russia, Biden agreed to Keir Starmer's request for weapons to be fired upon Russia this past weekend, but the Pentagon stepped in and said no. Finally someone at the Pentagon sees sense, Europe and America are now a sitting duck due to Israeli not American foreign policy. But it has emerged Russia has many conventional weapons that are non-nuclear, more powerful than the Hiroshima bombs. Targets for last Saturday were Kiev, Britain, Germany, Brussels, NATO and the US. We were all very close to all-out war last weekend, thankfully the Pentagon exercised caution for once and protected the country and others. Now they need to go one step further and remove all the criminal clowns within this country that pushed the world towards an unsustainable war. Starting with the corrupt media, followed by removing all the Jewish heads from all departments, including the politicians bought and paid for by AIPAC.

So what did the Israelis do in response, they had to reveal their hidden hand. By detonating pagers, following the smart meters in California, what happens next? Phones of targeted people or the masses themselves? At least 37 people including children were killed and 3 thousand more injured, many seriously, after communication devices, some used by the armed group Hezbollah, dramatically exploded across Lebanon on Tuesday and Wednesday. This was a desperate move by the anti-humanity group, revealing now that all technology is a potential incendiary device or if installed in cars, planes or trucks that can send you to your death. Remember they own the chip companies and those chips were in the vaccines. It is not like THI didn't warn of the dangers of technology, we have. But in today's world you are swamped with it, whether you want it or not. Facial recognition, digital recognition and even human recognition, all in your face. Well now things are literally going off in your face. The cornered snake is lashing out and the final battle is now in full swing. This was not a declaration of war on Hezbollah, but on the whole world.

As I was writing this final piece for the show this morning, more news came in of an Israeli bombardment on Lebanon, just as we forecasted. They wanted the cover of war between NATO and Russia but didn't get it, so now in their petulance they have launched war on their own, without the cover. This show has warned what will unfold next as part of the sacrifice for the greater good. Operation Deep Cleanse is now in full swing, after I warned of it in the August 29<sup>th</sup> show.

#### ENDING PIECE:

The clowns are desperate now because of one word – truth. The truth is not their friend as they wished to lie in their deep state. We have all heard and seen the banning, blocking, deleting of accounts and shows, plus the arrests of truthers but here is another element to it. In 20 years of the Vietnam war 63 journalists were murdered. In 7 years of WW2 67 journalists were murdered. Yet in just ten months of the Gazan war, 176 journalists have been murdered. All of which reveals the Israeli Ministry of Lies are desperate to silence us all. The anecdote to that oppression, open your throat chakras and spit out the truth wherever you go. The truth in the end saves lives, the lies ultimately kills people daily.

#### A Blueprint Assignment team update:

As mentioned last week contacts have been made in relation to the Blueprint but also on a wider scale. The team secured a private call with Joachim Hapogian, whose books we covered in the true horrors of the world series. That call was very enlightening on both sides and he was impressed with our knowledge and said he would make other connections available for and with me. Some of that is ongoing, but the first part of the connections is being assessed by the team. The second part was for me to attend a roundtable discussion on the Jim Fetzer podcast on Revolution Radio. I was on air yesterday at 10am and that show went very well. Given there was 5 people on the show, I didn't get that much time to speak, but managed to get across our message in several exchanges and from my perspective it went very well. I will post the link to that show in the Mewe chat soon The Raw Deal (18 Sept 2024) with Vaca, Winter, Hagopian & Spec Guest, Thomas Williams (bitchute.com) Out of interest, the show was pulled only a few minutes into it, but the zoom recording was retained. That made me smile after the Richard Vobes show being pulled as well. Following the show I was asked for contact details for a new connection, who wants to engage me privately and then invite me on his show as well. As of this morning arrangements have been made for me to go on another show sometime next week. Other connections are now being made for both private calls and the potential for much more shows. Of a potential 2-3 shows which would be aired in another country, following discussions by myself with a person who is making contact with their own connections as well. Quite a rip roaring to start with the new assignment team and it is expected to grow hereonin. Stay tuned for more updates.

A year ago this week several of our members were in Ireland for some work and a lot of fun. Much has happened within the past year in relation to THI, the Blueprint and myself. Many changes have unfolded, many proofs have been garnered and I have stuck firmly to the path of the restoration plan for humanity. Today we stand proudly within the uncharted waters and ready for the developing next stage of our plan. All of you have been prepared and it's time to act upon that preparation and be ready for what is to come. Read the guardian piece again in the Blueprint as a reminder of your obligation and duty. Read the Santies again to re-align yourself if required. A reminder to you all, you cannot expect external changes without changing yourself internally and aligning with the new frequencies. Deluding yourself at this juncture is pure folly. As consequence of actions ramps up exponentially now, our days of reckoning is upon us. Embrace change for it will become you. Here is a reminder for those who were in Ireland this time last year.
