

## THI-SHOW TRANSCRIPT 2018-05-24

\* It has been found that the NSA via Stingray tech had arms everywhere into every bank legally, quite how they managed that is down to politicians, the team also found all the illegal tentacles in the system too, all been dealt with so they at least at this point can't go back in legally, any further attempts would be illegal and actionable.

\*The spying via data cables, be it phones, tv and wifi is being addressed currently also, also an NSA issue and no surprise they own Comcast and CNN. Apple has their own spyware riddled with malware and trojans, known as I-spy, that is being addressed also.

\*This show has been warning of the dangers of Amazon, in the past it was about costing vast numbers of jobs and also them going all robotized, now it appears Mr Bezos who also owns Washington Post, is dipping into the same realms as Apple, AT&T, Verizon, Comcast etc and offering up facial recognition software to the government. Perhaps a class lawsuit stating you are allowed to go ahead with that, but if those who refuse to give away their rights to privacy, should be paid a \$1000 fine for every time they are recorded on that software, so we would trademark ourselves and that would end not only this nonsense, but the FB and many others using us as extras in their advertising.

\*Long time listeners may remember me exposing Erik Prince and his links to the Chinese Elders aka Rothschilds, and I expressed concern he was in the background of the Trump administration, which is why the unqualified Betsy DeVos ended up as education secretary, she is his sister. Prince and his group of hired assassins created Blackwater, changed the name to Xe and then Academie before causing mayhem in middle east and south america, so it comes as no surprise that he sold out again to the Chinese Elders. Eric Prince founder of Black Water's civilian military was hired by the Chinese Elders to destroy the American Economy and buy it back for pennies on the dollar. Their methods of warfare are to essentially block any money coming into the country, especially from the Trust. He's also supposed to steal as much money from the Trust as possible and take a 20% commission. His contract with them runs out in next 24 hours, and so that will fail also. There's currently a firewall set up around the entire banking system. But it doesn't matter how much money you have if people won't sell to you. Kim has purchase orders from countries all over the world for various products that are desperately needed. She's given the large companies the chance to do the right thing but they refuse to sell her anything for fear of repercussions from the Rothschilds or their Chinese counterparts the Elders. They did after all threaten the world at the United Nations in September that if they did not have absolute control of the world by September 2018 that they would unleash biological weapons and kill everyone on the planet. That won't work either.

\*Word is that there are a number of FBI agents willing to step out soon and reveal all manner of things if subpoenaed

\*Word also out that NYPD is getting restless as well, particularly those who viewed Clinton/Abedin footage

\*Keep an eye on Heritage Foundation, another think tank group in DC that appears to dictate policy, Koch brothers and Kissinger are just a few that take part in it, possibly Black Dragons members as well, the leader of which was Dick Cheney until he was fired, unfortunately they Heritage have now decided to not reveal the names connected to this Foundation, I wonder why.

\*Everyone by now has heard of The Crown, many thought it is linked to QOE it's not, located in the state of City of London, which is not connected to London or the UK a separate principality, well Rothschilds were in control of The Crown, which they had pledged to the Trust, and as they are no longer a part of the Trust, they no longer are in control of The Crown - oops, this was part of the move to disconnect America from the clutches of The Crown and facilitated the sovereignty declaration, the main aspects of which have yet to be implemented. So when Roths turn up to countries spouting they own The Crown and District of Columbia, please tell them to show proof of claims, and when it is not forthcoming, tell them to go and F themselves.

\*Clowns are busy trying to issue lines of credit off the trust accounts, which was never possible but also due to my new firewalls with transparency the whole freaking world knows it, complete dumbasses, well as they say, desperate people do desperate things, and boy are they desperate currently.

\*Iran fun and games has spread to oil shenanigans now, greedy bastards not content with getting oil for \$25 a barrel from some sources, but were also getting free oil which was stolen by ISIS, with ISIS all but defunct and middle east, africa and arabia get more wise, me thinks ISIS and more importantly the mercenaries will be out of a job soon, bye bye Blackwater.

\*We have had several enquiries in last couple of weeks of countries coming to us for information and interest in becoming sovereign

\*Venezuela getting heavily hit currently for the people, reason is blocking because Venezuela President is not interested in donating all of their Oil reserves to the fuckers. Neither are the generals that instigated the Military coup either as they have not been paid and realizing they have been lied to.

Pallets of over printed Boliviar are all over the place courtesy of De La Rue, which is a Rothschild owned company to print currency, message to South America, combine together and throw them all out, including stolen land in Paraguay done by Nazis and Bush Cartel. As for the over printed non number allocated currencies, details of that via Full Reports has been sent and has been received by Head of Interpol for all of South America by the trust

\*Our friend Peter or is it Jesper or maybe it is both, tried to get into the system again last week and remove \$50M but like the RV - it failed - I will have more details on Jesper/Peter in a forthcoming show, when the full details are recounted, message to person trying to make contact on that, email: [truth.honor.and.integrity@gmail.com](mailto:truth.honor.and.integrity@gmail.com)

\*Chase bank tried to install a worm virus into the system as well, no damage done but expect repercussions for that act of stupidity, do I hear a bid of \$1

\*Last week Anna put an article on Facebook describing the 4800 trusts and claimed that she knew some trustees. She said that she is working on a \$2000 per month stipend for the peoples of the world. Are these 4800 part of the Manna World Holding Trusts? Every off ledger "Trust" was consolidated into one in February 2013. The consolidated Trust was renamed as Manna at that time. Before this was done there were over 600 trustees and several names of trusts involved. At this time it is still named Manna although I can change it anytime I want to anything I want. Contemplating Dragon Repellent.

\*So it appears Tank is getting a lot of flak from members of the #operationstupidity brigade, yes you the GCR or RV goons, according to the narrative in the world of illusion, the elders have been paying out all kinds people except the ones on the forum Tank frequents. They even mentioned the White Dragon group are paying out, haha really, stupidity goes beyond the RV wait it seems, for those unfamiliar White Dragon or White Powder group is more fitting, exists of Benjamin Fulford, Neil Keenan and some unknown Japanese guy, no ninjas, no authority and no anything of note, unless you like working with rogue CIA agents, rothschilds or fake chinese elders, who no one has met or even knows their name or whether they actually exist, you cant make this stuff up. You carry on with your fists full of fake currencies, be they Zims, Dinars, Dings or Dongs you will all be in your graves multiple lifetimes waiting for that pay out, you have all been duped massively, why blame Tank for your own stupidity? You bet on riches and ended up being fools, not the first and certainly wont be the last, but the key is do you keep on playing the fool for the rest of your days, or do what Tank did and step down and try a new venture, how about you all play a game of hunt the chinese elder, as many of us would love to know their names and ask them where's the money? Meanwhile instead of attacking people trying to help humanity, attack the ones who are really preventing or have hijacked humanity, complete asshats, RV indeed, deary me at which point does

hello McFly moment kick in? Neither Kim or Tank are preventing the RV, it doesn't exist now or ever in this reality. This song is for the RV people you gave

\*Between globalization and nearly 20 years of constant warfare, the industrial part of the US military-industrial complex is not looking so good, putting future wars at risk, according to a new Pentagon report. The Annual Industrial Capabilities report, published by the Pentagon's Office of Manufacturing and Industrial Base Policy, warns that reliance on foreign-sourced materials combined with "twenty years of intermittent conflict," have put a strain on US manufacturers of weapons, parts and ammunition. "While US national defense demands for materials are seldom unmet, there exist risks to their supply now and risks are anticipated in the foreseeable future," the report says, describing the two broad trends as the scarcity of materials used in new technologies and the US' growing reliance on foreign supply sources. One of the biggest problems noted by the Pentagon is the lack of diversity in the industrial base. About 97 percent of the DoD funds for missile and munitions procurement goes to just two companies, Raytheon and Lockheed Martin. Almost all second- and third-tier suppliers of munitions components, 98 percent in both instances, are sole sources. The neglect has been so severe that "in fiscal years 2000 through 2016, inadequate facilities and equipment led to maintenance delays that contributed in part to more than 1,300 lost operational days... for aircraft carriers and 12,500 lost operational days for submarines." A January report by the Pentagon's director of operations and testing noted that half of the F-35 stealth fighter fleet is not mission capable due to supply and maintenance problems. Lockheed Martin's futuristic fighter has a lifetime cost estimated at over \$1 trillion.

\* the curious story of Carrie Underwood The story goes is that Underwood took her dogs out for a walk and then tripped. She fell on her wrist and her face. She required 40 to 50 stitches and, at first, she wasn't sure she'd look the same. "In the beginning, I didn't know how things were going to end up. It just wasn't pretty," she told Kotb. Underwood alarmed her fans when she wrote a letter warning them that she might look "different" after she healed. "I am determined to make 2018 amazing and I want to share things with you along the way. And when I am ready to get in front of a camera, I want you all to understand why I might look a bit different," she explained. switched out?

\*Has anyone else seen the advert for Nexium drug with the girl at the table with a pizza, Rome colloseum and mushrooms all in the picture, this to me is targeted piss taking Nexium the drug is the same pronounciation as Nxium the sex cult and child pedophilia.

\* royals name changes why?

\*Civil rights activists are opposing the passage of a bill that equates criticism of Israeli policies with anti-Semitism in the US state of South Carolina.The new bill would

effectively deem any criticism of Israel in publicly funded schools and state colleges as "anti-Semitic". Unable to pass it as a standalone law for the past two years over questions about its constitutionality, supporters of the measure used a legislative tactic known as a "rider" to insert it into the state's 2018-2019 budget. The measure will expire after one year. Supporters of Israel see the controversial bill as a triumph, arguing that any criticism of Israel is inherently anti-Semitic and should be banned on college campuses. Funny that it doesn't apply to Russia in MSM, perhaps we should draft a bill banning the MSM blaming Russia or Muslim for anything and see how that flies, I am sorry but nobody should be beyond criticism if it is justified. In ancient times it was considered a capital offense to criticize Kings or Queens that never turned out too well did it. Also in 14-1800 blasphemy to criticize or go against the church, that turned out horribly, people burnt at the stake for not loving the all powerful RC church, applied to the science people also back in those days. But until Israel stops breaking every UN laws, having already done so more times than the rest of the world combined, stop committing genocide in middle east, stops creating human rights issues, stops looting the American people of their tax spending, stops declaring every country that opposes them is a terrorist organization, stops dictating American foreign policy via lobbyists and dual citizenship, stops forcing countries to make laws to defend them, and stops thinking as people, that the rest of the world are just goyim aka shit under their shoe, then the world has every right to complain about the political agenda these Zionists operating as the state known as Israel. enough of this nonsense it helps no one least of all the main body of jewish people. This is political correctness, which is not designed to be nice to this group or that group, but solely to put the people in fear of speaking out against anything they want to stifle discourse on. No one is above reproach and everyone should be accountable for their actions, and whoever the clowns are in S.Carolina that draughted this bill, should be sacked immediately, as they obviously have nothing better to do than drought bs'ery, i'm sure the people have far more pressing concerns in their communities than someone criticizing a country located about 7000 miles away

\*Here is another example of that stealthy fascism and infringement on peoples rights. NFL teams will be fined if players kneel for the US national anthem under a new policy. The American football league said players who do not stand for the Star-Spangled Banner can stay in the locker room until it has been performed. The NFL also vowed to "impose appropriate discipline on league personnel who do not stand and show respect for the flag and the Anthem". Players said the protests were against police brutality of African Americans. "It was unfortunate that on-field protests created a false perception among many that thousands of NFL players were unpatriotic.

\*Barack Obama and Michelle Obama are teaming up with Netflix to produce films and TV shows. Netflix say the former US President and First Lady have "entered into a multi-year agreement" with the service. It says the "films and series" will "potentially" include

"scripted series, unscripted series, docu-series, documentaries and features." "Barack and I have always believed in the power of storytelling to inspire us," said Michelle Obama. Exact details of programming have yet to be announced. They should fit in well, they have been telling fairy tales throughout their role as president and first man. oops - obama can tell fairytales about how he is American or how he gave \$1.6B of our money in cash for humanitarian programs and some food packages for the poor Iranians, or perhaps he can tell the tale of the Health director in Hawaii who approved his birth certificate, suddenly died in a plane accident, just after Trump outed him on Twitter back in 2013, or perhaps he can tell the tale of how he paid for muslim brotherhood to fly to S. America and then pour through the southern border, to enable hit squads inside America, some of which tried to take out Kim, here is a song for Michael Lavaughan Robinson
